Prix à la consommation et indices des prix

Janvier-mars 1993

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct on-line access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Information and Current Analysis Unit, Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9606) or to the Statistics Canada reference centre in:

St. John's	(1-800-565-7192)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Sous-section de l'information et de l'analyse courante, Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9606) ou au centre de consultation de Statistique Canada à:

St. John's	(1-800-565-7192)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres régionaux de consultation.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

Most of the data published in this publication is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. The Databank identification numbers, by which data may be retrieved from CANSIM, are given in the headings of the relevant series in Tables in the publication. For further information on CANSIM call (613) 951-8200 or write to Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A

This publication was prepared under the direction of:

- Michel Jacod, Director, Prices Division
- Margaret Parlor, Chief, Consumer Prices Section
- Harold Harnarine, Head, Information and Current Analysis Unit

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans cette publication peuvent être obtenues sous forme lisible par machine de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Les numéros d'identification de la Databank qui servent à retrouver les données de CANSIM sont inscrits à l'en-tête des séries respectives de la publication. Pour plus d'information sur CANSIM, composer le (613) 951-8200 ou écrire à la Division de la commercialisation, Statistique Canada, Immeuble R.H. Coats Building, Ottawa, K1A 0T6.

Cette publication a été rédigée sous la direction de:

- Michel Jacod, Directeur, Division des prix
- Margaret Parlor, Chef, Section des prix à la consommation
- Harold Harnarine, Chef, Sous-section de l'information et de l'analyse courante

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Consumer Price Behaviour

First Quarter, 1993.

Trends in the All-items Index.

In seasonally adjusted terms, the All-items Consumer Price Index (CPI) for Canada rose by 0.4% between December 1992 and March 1993 (first quarter). This increase followed an advance of 0.8% in the fourth quarter of 1992. It also matched the rates of change registered in the second and third quarters of 1992. The seasonally adjusted monthly movements in the first quarter of 1993 rose by 0.2% in January and 0.3% in February but fell by 0.1% in March. The drop in March was largely attributable to seasonally adjusted declines in the Food index and, to a lesser extent, in the Transportation index.

In unadjusted terms, the CPI increased by 0.6% in the first quarter, the same as that posted in the fourth quarter of 1992. In the first quarter of 1992, the CPI rose by a rapid 0.9% but slowed down subsequently to increases of 0.5% and 0.2% in the second and third quarter respectively.

The average of the 12-month rates of increase in the latest quarter stood at 2.1%, higher than the 1.8% reported for the fourth quarter, 1992. These rises exceeded those of 1.6%, 1.4% and 1.3% noted in the first three quarters of 1992.

Contributions by Major Components.

In the first guarter of 1993, all the major component indexes showed increases, ranging from a low of 0.2% in the Housing index to a high of 2.7% in the Clothing index. The increase in the Clothing index accounted for over one third of the rise in the All-items index. This was followed by a rise of 1.0% in the Food index which contributed close to one quarter of the total change. Another one quarter of the explanation resulted from the combined effects of increases in the Housing (0.2%) and Transportation (0.4%) indexes. Increases in the remaining three major component indexes -- Recreation, Reading and Education (0.6%), Health and Personal Care (0.8%) and Tobacco Products and Alcoholic Beverages (0.3%) -- added relatively moderate upward pressures on the All-items index.

Contributions by Lower-Level Indexes.

The 2.7% rise in the Clothing index was partly the result of returns to regular prices following sales and promotions in November and December when the index fell by 1.2% and 0.5% respectively. The pattern of a drop in clothing prices in November and

Points saillants

Comportement des prix à la consommation

Premier trimestre de 1993

Tendances de l'indice d'ensemble

En données désaisonnalisées, l'indice d'ensemble des prix à la consommation (IPC) pour le Canada a avancé de 0.4% entre décembre 1992 et mars 1993 (premier trimestre). Cette hausse suivait la progression de 0.8% affichée au quatrième trimestre de 1992. Elle s'accordait aussi avec les variations observées aux deuxième et troisième trimestres de 1992. Au premier trimestre de 1993, les mouvements désaisonnalisés inscrivaient une hausse de 0.2% en janvier et de 0.3% en février, mais une baisse de 0.1% en mars. Le recul observé en mars était largement attribuable aux baisses désaisonnalisées de l'indice des aliments et, dans une moindre mesure, de l'indice des transports.

Sans correction des variations saisonnières, l'IPC a progressé de 0.6% au premier trimestre, la hausse étant la même que celle affichée au quatrième trimestre de 1992. Au premier trimestre de 1992, l'IPC a augmenté rapidement de 0.9%, puis son rythme d'accroissement s'est ralenti à 0.5% et à 0.2% aux deuxième et troisième trimestres respectivement.

Au dernier trimestre, la moyenne des taux d'augmentation sur 12 mois se fixait à 2.1%, dépassant le taux de 1.8% affiché au quatrième trimestre de 1992. Ces hausses étaient supérieures à celles de 1.6%, de 1.4% et de 1.3% observées pour les trois premiers trimestres de 1992.

Contributions des principales composantes

Au premier trimestre de 1993, les principales composantes affichaient toutes des hausses, qui se situaient entre 0.2% pour l'indice de l'habitation et 2.7% pour celui de l'habillement. La hausse de l'indice de l'habillement figurait pour plus d'un tiers de la progression de l'indice d'ensemble. Suivait la hausse de 1.0% de l'indice des aliments, qui représentait près du quart de la variation globale. Un autre quart s'expliquait par les effets combinés des hausses de l'indice de l'habitation (0.2%) et de celui des transports (0.4%). Les augmentations des trois autres composantes principales -- les loisirs, la lecture et la formation (0.6%), la santé et les soins personnels (0.8%) et les produits du tabac et les boissons alcoolisées (0.3%) -- ont exercé des pressions relativement modérées sur l'indice d'ensemble.

Contribution des indices de niveau inférieur

La progression de 2.7% de l'indice de l'habillement s'expliquait en partie par le retour aux prix ordinaires après les soldes et les promotions qui se déroulaient en novembre et en décembre, lorsque l'indice a reculé de 1.2% et de 0.5% respectivement. La tendance à la baisse des prix de

December followed by price increases in each of the first three months of the new year has been observed consistently over the last five years. Price increases for women's sportswear, dresses and footwear along with those for men's suits and furnishings were the principal contributors to the latest quarterly change in this index.

The 1.0% rise in the Food index resulted from increases of 1.2% in the Food from Stores index and 0.3% in the index for Food Purchased from Restaurants. The index for Food Purchased from Stores fell in each month from July to October 1992 and then rose in each month until February 1993. In March, the index fell by a noticeable 0.6% largely due to a grocery chain price war in Western Canada. The bulk of the upward pressure on the index resulted from an increase of 19.0% in the Fresh Vegetable index as prices for most vegetables rose (tomatoes being a notable exception). Small upward price pressures also originated from beef, turkey, selected fresh fruits and carbonated beverages. At the same time, moderate price declines were observed for chicken, certain dairy and bakery products and eggs.

The Housing index edged up by 0.2% in the first quarter with all the increase concentrated in January as the index registered no change in February and March. Electricity rates jumped by 2.5% in the first quarter reflecting increases in January from several parts of the country with the most pronounced advances found in Ontario and Saskatchewan. Water rates rose by an average of 5.2% as municipalities increased metered and flat rates. Higher charges for rented accommodation, basic telephone services, postal services, child care and horticultural goods were also reported. Partly offsetting these increases were declines in the Owned Accommodation index mainly associated with lower maintenance and repair charges and a further drop in mortgage interest cost. In addition, price declines were noted for long distance telephone services, pet food, household textiles and chemical specialties.

The 0.4% rise in the Transportation index was mainly due to a 4.2% advance in the Public Transportation component offset, in part, by a drop of 0.1% in the Private Transportation index. Much of the advance in public transportation charges resulted from a rise of 7.0% in the Air Fares index which fell marginally in January but rose sharply in both February and March. In addition, local commuting fares rose by 2.3% in the first quarter. The marginal decline in private transportation charges was due to a sharp 3.4% decline in gasoline prices offset, to a large extent, by an average rise of 3.8% in automobile insurance premiums (concentrated in British Columbia, Ontario and Manitoba) and 2.4% in auto registration fees.

l'habillement en novembre et en décembre, suivie de leur relèvement pendant chacun des trois premiers mois de l'année a été observée régulièrement au cours des cinq dernières années. L'augmentation des prix des vêtements de sport, des robes et des chaussures pour femmes et celle des prix des complets et des articles vestimentaires pour hommes ont été les principaux facteurs de la dernière variation trimestrielle de cet indice.

La progression de 1.0% de l'indice des aliments était attribuable à la hausse de 1.2% des aliments achetés au magasin et de 0.3% des aliments achetés au restaurant. L'indice des aliments achetés au magasin a reculé pendant chaque mois compris entre juillet et octobre 1992, puis est remonté chaque mois jusqu'en février 1993. En mars, l'indice a connu une baisse notable de 0.6%, surtout sous l'effet de la guerre des prix menée par les chaînes d'alimentation dans l'Ouest canadien. La majeure partie de la pression exercée à la hausse sur l'indice était due à la progression de 19.0% de l'indice des légumes frais, les prix de la plupart des légumes ayant augmenté (les tomates étant l'exception notable). Les prix ont grimpé légèrement sous l'effet de la hausse des prix du boeuf, de la dinde, de certains fruits frais et des boissons gazeuses. En même temps, des baisses modérées ont été observées pour les prix du poulet, de certains produits laitiers et produits de boulangerie et des oeufs.

L'indice de l'habitation a avancé de 0.2% au premier trimestre, la hausse étant survenue en janvier et aucune variation n'étant enregistrée en février et en mars. Les tarifs d'électricité ont bondi de 2.5% au premier trimestre, sous l'effet des hausses observées en janvier en plusieurs points du pays, les plus fortes étant enregistrées en Ontario et en Saskatchewan. Les taux de la taxe d'eau ont grimpé en movenne de 5.2%, les municipalités avant augmenté les taux au compteur et les taux fixes. Des hausses ont aussi été observées pour les frais de logement en location, les services téléphoniques de base, les services postaux, les soins aux enfants et les produits horticoles. Ces hausses ont été compensées en partie par le recul de l'indice du logement en propriété, qui était surtout attribuable à la diminution des frais des réparations et des travaux d'entretien et à un autre abaissement des intérêts hypothécaires. Des baisses de prix ont aussi été observées pour les appels interurbains, les aliments pour animaux de maison, les articles ménagers en matière textile et les spécialités chimiques.

La progression de 0.4% de l'indice des transports s'expliquait principalement par la hausse de 4.2% de la composante du transport public, compensée en partie par la baisse de 0.1% de la composante du transport privé. L'augmentation des frais du transport public était en bonne part attribuable à la hausse de 7.0% de l'indice des tarifs aériens, lequel a reculé légèrement en janvier pour remonter brusquement en février et en mars. En outre, les frais du transport local et de banlieue se sont accrus de 2.3% au premier trimestre. La légère diminution des frais du transport privé était due à une forte baisse de 3.4% des prix de l'essence, compensée dans une large mesure par l'augmentation moyenne de 3.8% des primes d'assurance-automobile (concentrée en Colombie-Britannique, en Ontario et au Manitoba) et 2.4% des frais d'immatriculation des automobiles.

Increases in the Recreation, Reading and Education index (0.6%), in the Health and Personal Care index (0.8%) and in the Tobacco Products and Alcoholic Beverages index (0.3%) had small upward influence on the latest quarterly change in the All-items index. In the first index, a hike in cablevision rates explained a large part of the change. In the second index, the major contribution was associated with higher prices for personal care supplies and equipment. In the third major component index, small increases in the prices of alcoholic beverages were moderated by a marginal drop in cigarette prices.

La progression de l'indice des loisirs, de la lecture et de la formation (0.6%), de l'indice de la santé et des soins personnels (0.8%) et de l'indice des produits du tabac et des boissons alcoolisées (0.3%) a exercé un léger effet à la hausse sur la dernière variation trimestrielle de l'indice d'ensemble. Pour le premier indice, la hausse des tarifs de câblovision expliquait une bonne part de la variation. Pour le deuxième, le principal facteur d'accroissement résidait dans la hausse des prix des produits et des appareils de soins personnels. Pour le troisième, la faible augmentation des prix des boissons alcoolisées était modérée par une légère baisse des prix des cigarettes.

Introduction

This quarterly publication presents a compendium of consumer prices and price index related information of both a current and historical nature. It provides a wide range of timely and detailed statistical information and serves as a complement to the monthly publication, The Consumer Price Index, Catalogue 62-001.

Part I of this report presents a synopsis of current consumer price index movements. This is presented in the form of tabular and graphic information. Some tabular information on international prices is also presented, in particular for some Canada - U.S. comparisons.

Parts II and III provide a detailed historical summary of monthly consumer price indexes in recent years. This summary contains considerable disaggregated information, again in the perspective of both the urban Canada and the separate city contexts.

Part IV of this report contains tables for the All-items and seven major components for each province.

Place-to-place comparative retail price information forms Part V of the report. This segment presents the most recent data with regards to average city retail prices and inter-city indexes of retail price differentials. Special feature articles, which are periodically included in the publication, are presented in Part VI.

Appendices serve as sources of reference for the statistical data presented in the preceding segments of the report. Appendices 1 and 2 contain explanatory notes pertaining to consumer price index data; Appendix 3 provides reference material for seasonal adjustment methodology in the context of its application to the Consumer Price Index; Appendices 4, 5 and 6 present background information relating to place-to-place retail price comparisons.

Introduction

Cette publication présente un résumé de renseignements historiques et courants des prix à la consommation et des indices de prix. Elle fournit une gamme d'informations statistiques étendue, d'une façon détaillée, et sert de complément à la publication mensuelle, L'indice des prix à la consommation, n° 62-001 au catalogue.

La partie I de ce rapport contient un aperçu synoptique qui présente les mouvements courants des prix à la consommation. Ces informations sont présentées sous la forme de tableaux et de graphiques. Des tableaux comportant de l'information sur les prix internationaux sont également présentés, particulièrement en ce qui regarde certaines comparaisons entre le Canada et les É.-U.

Les parties II et III fournissent un résumé historique détaillé des indices mensuels des prix à la consommation des dernières années. Ce résumé contient des renseignements pour le Canada et les villes à un niveau beaucoup plus désagrégé.

La partie IV de ce rapport contient des tableaux pour l'ensemble et les sept composantes principales pour chaque province.

Des informations sur les prix de détail comparés d'un endroit à l'autre composent la partie V de ce rapport. Cette section fournit les plus récentes données au sujet des prix de détail moyens par ville et des indices comparatifs des prix de détail entre les villes. Les articles spéciaux, qui font périodiquement partie de cette publication, se retrouvent à la partie VI.

Les appendices servent de référence aux données statistique présentées dans les parties précédentes du rapport. Les appendices 1 et 2 contiennent les notes explicatives reliées aux données de l'indice des prix à la consommation; l'appendice 3 fait référence à la méthode des ajustements saisonniers dans son application à l'indice des prix à la consommation; les appendices 4, 5 et 6 fournissent des informations de base reliées aux comparaisons de prix d'un endroit à l'autre.

Seasonal adjustment of the Consumer Price Index for Canada is undertaken separately for each of the seven major components of the CPI with the quarterly calculation being made before linking or chaining takes place. The resulting seven major component indexes as well as the All-items and All-items excluding Food aggregates are then "linked" or "chained" to form continuous series starting from January 1978. The seasonally adjusted monthly data are published without further revision until the year end, when revisions to any months data may be made from January 1985 forward (the start of the 1986 basket). These revision are published with the December release.

La désaisonnalisation de lindice des prix à la consommation pour le Canada est effectuée séparément pour chacune des sept composantes principale de l'IPC. Les calculs sont faits avant de procéder à l'enchaînement. Les indices des sept composantes principales, d'ensemble et d'ensemble sans les aliments ainsi obtenus sont ensuite "enchaînés" pour déterminer les séries continues à partir de janvier 1978. Les données désaisonnalisées mensuelles sont publiés sans autre révision jusqu'à la fin de l'année où une révision peut être effectuée pour tout mois à compter de janvier 1985 (le début du panier de 1986). Ces révisions sont émis avec la publication de décembre.

For explanatory notes and detail, see Appendix 4.

Blanks appear on this table where the quality and (or) quantity of the prices were insufficient to produce a good average. Whitehorse is not included in weighted city averages.

As of October 1991, tenderloin removed in all cities.

Chicoutimi (450 g).

One package yielding 2.25 L in total.

Appendix 1

THE CONSUMER PRICE INDEX

The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is of an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time. Changes in the costs of this basket are therefore due only to "pure" price movements, i.e., price movements that are not associated with changes in the quality and/or quantity of the set of consumer goods and services in the basket.

The Consumer Price Index for each city measures price change from one time period to another within that specific city. Thus, while city CPI's show the **movement** of prices over time in each city, they do not indicate price level differences between cities or between cities and Canada. Such inter-city price comparisons for a selected number of items sold in grocery stores for 26 cities are available at present in Part V of this publication. Inter-spatial indexes covering approximately two thirds of the CPI basket for a selected number of cities are also available in this section.

Coverage

Beginning with the December 1988 to January 1989 price change, the weights used in the Consumer Price Index are those pertaining to 1986 expenditure patterns. Data used for establishing these patterns were obtained through the 1986 Family Expenditure Surveys. The expenditure data represents the expenditures of all private households (families and individuals) living in Canadian urban centres with a population of 30,000 or more. Population estimates for 1986 revealed 82 such urban centres. Largely due to limitations on the availability of detailed information on consumer expenditures it has become necessary to group the 82 urban centres into 34 urban centre strata. An urban centre stratum may be interpreted as a geographical unit around which the sampling framework of the CPI is constructed.

Separate CPI's are published for 18 of these centres which, together, accounted for approximately 75% of the total 1986 current consumption expenditures reported in the 82 centres. These 18 centres were, in part, selected in order to permit the publication of at least one CPI in each province. Some 300 commodities are priced in each of these 18 cities while in the remaining 64 urban centres, the number of commodities surveyed is fewer, with clothing and home furnishings being the notable exclusions.

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION

L'indice des prix à la consommation (IPC) mesure la variation dans le temps, exprimée en pourcentage, du coût à l'achat d'un "panier" constant de biens et de services, qui représente les achats faits par un groupe particulier de la population au cours d'une période donnée. Le "panier" renferme des biens et des services de quantité et de qualité invariables ou équivalentes et dont les prix sont mesurables au cours du temps. C'est ainsi que les variations de son coût résultent uniquement des mouvements "purs" de prix, c.-à-d. des mouvements de prix qui ne sont pas attribuables à des changements de qualité ou de quantité des biens et services de consommation du panier.

L'indice des prix à la consommation de chaque agglomération urbaine mesure les variations de prix entre deux périodes dans cette agglomération. Aussi les IPC des villes indiquent-ils le **mouvement** des prix dans le temps dans chaque agglomération, mais non les différences de niveau des prix entre les villes ou bien entre les villes et le Canada. De telles comparaisons entre les villes en ce qui concerne les niveaux de prix de certains articles vendus dans les épiceries sont présentées, pour 26 villes, à la Partie V de la présente publication. On y trouve également, pour certaines villes, des indices interspatiaux portant sur les deux tiers environ du panier de l'IPC.

Champ d'observation

À compter de janvier 1989, les pondérations utilisées pour l'indice des prix à la consommation se rapportent à la composition des dépenses de 1986. Les données qui ont servi à établir cette composition proviennent des enquêtes sur les dépenses des familles de 1986. Les données sur les dépenses représentent les dépenses de tous les ménages privés (familles et personnes seules) qui habitent les centres urbains du Canada qui comptent 30,000 habitants ou plus. D'après les estimations démographiques pour 1986, 82 centres urbains répondent à ce critère de population. En raison principalement du manque de renseignements détaillés sur les dépenses des consommateurs, il a été nécessaire de grouper les 82 centres urbains en 34 strates de centres urbains. Une strate de centres urbains peut se définir comme une unité géographique à partir de laquelle est constituée la base de sondage de l'IPC.

Des IPC distincts sont publiés pour 18 centres qui, ensemble, interviennent pour près de 75% du total des dépenses courantes de consommation déclarées en 1986 par les 82 centres. Les 18 centres ont été choisis, en partie, parce qu'ils permettent la publication d'un IPC au moins dans chaque province. On relève les prix de quelque 300 produits dans chacune des 18 villes; ce nombre est plus faible dans les 64 centres restants, les produits exclus étant principalement l'habillement et les articles d'ameublement.

Prices

The prices used in the calculation of the CPI are retail prices without regard to whether they are described as regular, special, etc. inclusive of all sales and excise taxes applicable to individual commodities. The pricing cycle starts in the latter part of each month and extends to the middle part of the following month. Although prices for most CPI items are collected on a monthly basis, some are priced less frequently, e.g., property taxes, automobile registration fees, dry cleaning services. However, such goods or services scheduled for pricing at less than monthly intervals will be priced in any month when there is evidence to suggest that significant price changes may occur prior to the next regularly scheduled pricing. The number of prices observed in a given city depends upon the importance of that city's expenditures to the total Canada expenditure and also the nature of the commodity, with those commodities displaying a high variability of price change generally requiring more observations. The selection of outlets in which prices are to be collected is judgmental (other than for rents) with the sample being designed to cover volume selling establishments.

Weights and Linking

The weights used in the calculation of the Consumer Price Index are periodically updated. This is a necessary procedure which serves to ensure that weights reflect changes in consumer expenditures thereby maintaining the relevancy of the index. As a result, different weighting systems are in effect in different time periods.

The 1982 family expenditure patterns were used to compile the CPI from January 1985 to December 1988. In January 1989 the 1982 weights were replaced by those derived from the expenditure patterns of 1986. This updating continues the policy of updating on a four-year cycle.

Prix

Les prix servant au calcul de l'IPC sont les prix au détail qu'il s'agisse de prix réguliers, de prix spéciaux, etc. et englobent toutes les taxes de vente, d'accise et autres taxes imposées aux produits. Le cycle des relevés commence vers la fin de chaque mois et se termine au milieu du mois suivant. Les prix de la plupart des articles de l'IPC sont recueillis chaque mois, mais certains articles sont observés moins souvent. notamment l'impôt foncier, l'immatriculation d'automobiles, le nettoyage à sec. Cependant, dans le cas des biens et services dont l'observation est prévue à des intervalles de plus d'un mois, on en relèvera le prix dans tout mois où il apparaît qu'une variation importante se produira avant le prochain relevé prévu au calendrier. Le nombre de prix observés dans une ville donnée dépend de l'importance des dépenses de cette ville par rapport au total des dépenses pour le Canada ainsi que de la nature du produit, les observations étant généralement plus fréquentes pour les produits dont les prix varient beaucoup. Le choix des points de vente où les prix doivent être recueillis est fait au jugé (sauf pour les loyers) et l'échantillon a pour but de couvrir les établissements à gros volume de vente.

Pondérations et enchaînement

Les pondérations utilisées dans le calcul de l'indice des prix à la consommation sont mises à jour périodiquement. Ce procédé est nécessaire pour que les pondérations tiennent compte des changements qui s'opèrent au niveau des dépenses à la consommation et, par le fait même, pour que l'indice conserve son utilité. En conséquence, différents schémas de pondérations sont utilisés pour des périodes de temps distinctes.

La composition des dépenses des familles de 1982 a servi au calcul de l'IPC à partir de janvier 1985 jusqu'à décembre 1988. En janvier 1989, les pondérations de 1982 ont été remplacées par d'autres dérivées de la composition des dépenses de 1986. Cette mise à jour poursuit la politique de Statistique Canada de mettre à jour les pondérations régulièrement à tous les quatre ans.

TEXT TABLE II. Comparison of 1982 and 1986 Expenditure Weights Used in the Consumer Price Index, by Major Component for Canada

TABLEAU EXPLICATIF II. Comparaison des pondérations des dépenses de 1982 et de 1986 utilisées pour l'indice des prix à la consommation, par composante principale pour le Canada

1982	Weights 1986
Pondérations 1982	Pondérations 1986
100.00¹	100.00¹
20.02 38.14 8.37 15.75 4.02 8.25	18.05 36.32 8.69 18.29 4.20 8.84
	1982 100.00 ¹ 20.02 38.14 8.37 15.75 4.02

¹ Figures may not add up due to rounding.

The weights shown in Text Table II represent expenditures in 1982 (1982 quantities valued in 1982 prices) and in 1986 (1986 quantities valued in 1986 prices). They cannot be used to reconstruct or reaggregate indexes on a 1981 = 100 time base. The methodology required to permit such a reaggregation can be obtained on request by contacting the:

Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (Telephone: (613) 951-9606).

The indexes based on 1986 weights were linked or connected in December 1988 to the appropriate indexes based on 1982 weights which had been in use since January 1985.

This linking procedure ensures that conceptually equivalent series are made continuous over time. It should be noted that the linking method is such that aggregate indexes cannot be considered as the direct average of their respective component indexes. In exceptional cases, this may cause the level, as well as the percentage changes, of an aggregate index to fall slightly outside the range of its component indexes.

Les pondérations du tableau explicatif II représentent les dépenses en 1982 (quantités et prix de 1982) et en 1986 (quantités et prix de 1986). Elles ne peuvent servir à reconstruire ni à réagréger des indices sur la base de 1981 = 100. La méthode à suivre pour une telle reconstruction peut être obtenue sur demande auprès de la:

Section des prix à la consommation Division des prix, Statistique Canada Ottawa (Ontario) K1A 0T6 (Téléphone: (613) 951-9606).

Les indices fondés sur les pondérations de 1986 ont été enchaînés ou raccordés en décembre 1988 aux indices correspondants fondés sur les pondérations de 1982, en usage depuis janvier 1985.

Grâce à cet enchaînement, des séries équivalentes sur le plan conceptuel sont continues dans le temps. On notera que cette méthode d'enchaînement ne permet pas de considérer les indices composés comme des moyennes directes de leur composante respective. Dans des cas exceptionnels, le niveau et les variations en pourcentage d'un indice agrégé peuvent ainsi dépasser légèrement l'étendue des indices composantes.

¹ Les chiffres ayant été arrondis, les totaux peuvent ne pas correspondre.

Time Base

The All-items Consumer Price Index for Canada and each index city is expressed in terms of 1986 = 100, except for certain items, as noted, where the pricing survey was introduced subsequent to that year. The 1986 = 100 time base became effective with the release of the June 1990 index. The base period for the Consumer Price Index, as well as for other Statistics Canada index series, is revised periodically.

Rebasing the CPI is a straightforward arithmetic operation which does not change the picture of economic events. Percentage changes computed will be the same, except for small differences due to rounding, regardless of whether the 1981 = 100 or 1986 = 100 time base is used. Rebasing of the CPI does not involve changes in the base period expenditure weights. Furthermore, the method employed in converting to the 1986 = 100 time base does not affect the continuity or statistical comparability of the index series.

It should be noted, however, that although the percentage changes in an index series will be the same, except for small differences due to rounding, regardless of whether they are computed from the 1981 or 1986 time base series, the same is not true for changes measured in terms of index points.

Current Annual Rate of Change

A rate of change representative of an annual movement in prices may be derived in several ways, none of which is free of shortcomings and interpretational problems. Statistics Canada presently calculates three measures of annual change, the percentage change between any given month and the same month a year ago, the percentage change between annual averages based on a calendar year and the current annual rate of change.

The method selected for calculating the current seasonally adjusted annual rate of change in the CPI in Table 1 involves compounding the growth rate over the latest three-month period on the seasonally adjust ed level (see Appendix 3). For more information on CPI growth rates, see "A Note on the Current Annual Rate of Change of the Consumer Price Index", **Retail Prices and Living Costs** – Service Bulletin (Catalogue 62-005), Vol. 4, No. 4, April 1975.

Reconstructed Indexes

With the release of the January 1985 Consumer Price Index, certain series were reconstructed historically to reflect the introduction of the Consumer Classification System of Statistics Canada which was introduced with the 1982 Updating. A few additional reconstructions were made with the introduction of the 1986 basket. For further information, contact Prices Division (613-951-9606 or 951-3353).

Période de base

L'indice d'ensemble des prix à la consommation du Canada et les indices de chaque ville sont exprimés sur la base de 1986 = 100, sauf pour certains articles, qui sont signalés et dont l'enquête sur les prix n'a été introduite qu'après cette année là. La base temporelle de 1986 = 100 est devenue effective à partir de la diffusion de l'indice de juin 1990. La période de base pour l'indice des prix à la consommation, et pour d'autres séries d'indices de Statistique Canada, fait l'objet d'une révision periodiquement.

Pour recalculer la base de l'IPC, il suffit d'effectuer une opération arithmétique simple qui ne modifie pas le tableau des événements économiques. Les variations en pourcentage calculées sur la base 1981 = 100 et 1986 = 100 sont équivalentes, les petites différences étant attribuables à l'arrondissement. Le calcul de la nouvelle base de l'IPC ne change pas les pondérations des dépenses de la période de base. De plus, la méthode de conversion selon la base 1986 = 100 ne compromet pas la continuité ou la comparabilité statistique des séries d'indices.

Toutefois, même si les variations en pourcentage d'une série d'indices seront identiques, à quelques différences d'arrondissement près, quelle que soit la base (1981 ou 1986) utilisée pour les calculer, tel ne sera pas le cas de ses mouvements exprimés en points.

Taux de variation annuel courant

Plusieurs méthodes permettent de dériver un taux de variation pour représenter le mouvement annuel des prix, mais toutes comportent des points faibles et des problèmes d'interprétation. Statistique Canada calcule actuellement trois mesures de la variation annuelle, soit le changement en pourcentage pour un mois donné par rapport à un autre et au mois correspondant de l'année précédente, le changement en pourcentage entre des moyennes annuelles basées sur l'année civile et le taux de variation annuel courant.

La méthode retenue pour calculer le taux de variation annuel courant après désaisonnalisation de l'IPC au tableau 1 consiste à prendre un taux de croissance composé sur le niveau désaisonnalisé des trois derniers mois (voir appendice 3). Pour plus de renseignements sur le taux de croissance de l'IPC, se reporter à "Note sur le taux annuel courant de l'indice des prix à la consommation", **Prix de détail et coût de la vie** - Bulletin de service (n° 62-005 au catalogue), vol. 4, n° 4, avril 1975.

Indices reconstruits

À compter de l'émission de l'indice des prix à la consommation de janvier 1985, certaines séries historiques ont été reconstruites de façon à ce qu'elles représentent l'introduction du système de classification de la consommation de Statistique Canada qui fut introduit avec la mise à jour de 1982. L'adoption du panier de 1986 a amené quelques autres remaniements. Pour plus de renseignements, communiquez avec la Divison des prix (613-951-9606 ou 951-3353).

Whitehorse and Yellowknife

In keeping with its commitment to publish consumer price indexes for at least one urban centre in each province and territory, Statistics Canada, as part of the 1978 Updating, began to develop consumer price indexes for the urban centres of Whitehorse and Yellowknife. As no Family Expenditure Survey was conducted in these centres in 1978, 1972 expenditure patterns for these two centres were extrapolated to 1978 using the change in expenditure patterns between 1972 and 1978 in other urban centres. As the 1978 expenditure patterns were incorporated into the official CPI, commencing with the release of the April 1982 index, consumer price indexes for Whitehorse and Yellowknife were developed on a March 1982 = 100 time reference base. Since the expenditure patterns for Whitehorse and Yellowknife were derived and not directly observed, the indexes for these two urban centres were not included in the calculation of the official CPI for Canada. With the introduction of the 1982 Updating, these two centres were included in the calculation of the official CPI for Canada.

It was not possible, at this time, to develop an owned accommodation index for these two centres comparable to that in concept of the national CPI. The nature and the relatively small size of the housing market in these two centres is such that Statistics Canada was unable to construct reliable price indexes for new houses. It was decided that as an interim and only available alternative measure, the price movement of rental accommodation would be used to represent that of owned accommodation. As a consequence, the All-items indexes published for these centres are not comparable to those for Canada or for any of the sixteen urban centres for which a CPI is produced. The rent data used are collected on a quarterly basis by the respective territorial governments. For rents, the data are incorporated into the consumer price indexes for these two centres with a two-month lag.

Provincial CPI's

Consumer price indexes for provincial urban centres were published for the first time in the July-September 1988 issue of this publication. An article describing the coverage and method of these indexes was published in the same issue. Updated Provincial CPI's are now a permanent feature of this publication.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in **The Consumer Price Index**, **Reference Paper**, **Updating Based on 1986 Expenditures**, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in Family Expenditure in Canada, 1986, Catalogue 62-555.

Whitehorse et Yellowknife

Statistique Canada, conformément à son engagement de publier des indices des prix à la consommation pour au moins un centre urbain dans chaque province et territoire, a commencé à élaborer des indices de prix à la consommation. pour les centres urbains de Whitehorse et Yellowknife dans le cadre de la mise à jour de 1978. Puisqu'il n'y a pas eu dans ces centres d'enquête sur les dépenses des familles en 1978, les données sur la composition des dépenses de 1972 pour ces deux villes ont été extrapolées pour l'année 1978 en se fondant sur l'évolution de la composition des dépenses entre 1972 et 1978 dans d'autres centres urbains. Étant donné que la composition des dépenses de 1978 a été incorporée dans l'IPC officiel à la consommation avec l'indice d'avril 1982, les indices des prix à la consommation pour Whitehorse et Yellowknife ont été élaborés sur la base mars 1982 = 100. La composition des dépenses pour Whitehorse et Yellowknife ayant été dérivée plutôt qu'observée directement. les indices pour ces deux centres urbains n'étaient pas compris dans le calcul de l'IPC officiel pour le Canada. Avec l'introduction de la mise à jour de 1982, ces deux centres ont été pris en compte lors du calcul de l'IPC officiel pour le Canada.

Il n'a pas été possible d'élaborer, pour ces deux centres, un indice du logement en propriété qui soit conceptuellement comparable à celui incorporé à l'IPC national. La nature et la petitesse relative du marché de l'habitation dans ces deux centres ont empêché Statistique Canada de construire des indices de prix fiables pour les maisons neuves. Comme c'est la seule mesure disponible, il a été décidé d'utiliser, pour le moment, le mouvement des prix du logement en location pour représenter celui du logement en propriété. En conséquence, les indices d'ensemble publiés pour ces centres ne sont pas comparables à ceux du Canada ou d'aucun des seize autres centres urbains pour lesquels un IPC est calculé. Les données sur les loyers utilisées sont recueillies trimestriellement par les deux administrations publiques territoriales. S'agissant des loyers, les données pour ces deux centres sont incorporées aux indices de prix à la consommation avec deux mois de retard.

IPC Provinciaux

Des indices de prix à la consommation pour les centres urbains provinciaux ont été publiés pour la première fois dans le numéro de juillet-septembre 1988 de la présente publication. Un article décrivant la couverture et la méthodologie de ces indices est paru dans ce même numéro. Les IPC provinciaux mis à jour sont devenus partie intégrante de la présente publication.

Renseignements supplémentaires et publications connexes

Le Document de référence de l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1986, (hors-série), n° 62-553 au catalogue, décrit en détail les méthodes et les concepts de l'IPC. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans Dépenses des familles au Canada, 1986, n° 62-555 au catalogue.

The latest information on the Consumer Price Index for Canada and 18 cities is also available in the **Consumer Price Index**, Catalogue 62-001 monthly. In addition, selected educational and promotional material are available. For these and further information contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606 or 613-951-3353).

De plus, les derniers renseignements sur l'indice des prix à la consommation du Canada et de 18 villes sont publiés dans le bulletin mensuel **L'indice des prix à la consommation**, n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606 ou 613-951-3353).

Appendix 2

THE PURCHASING POWER OF THE CONSUMER DOLLAR

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

Changes in the purchasing power of the consumer dollar, put simply, are inversely related to movements in the Consumer Price Index. For example, between 1986 and June 1990, consumer prices as measured by the CPI rose 19.2% such that, goods and services which could have been purchased for \$100.00 in 1986 would cost \$119.20 in June 1990. Each consumer dollar in June 1990 therefore buys less than in 1986. The extent to which the purchasing power of the dollar has declined is matched precisely by the increase in the consumer price index. Thus the purchasing power of a dollar in June 1990 compared to the 1986

dollar was 83.9 (100 cents X
$$\frac{100.0}{119.2}$$
 = 83.9 cents).

This process may be interpreted as the deflation of money, that is, adjusting values expressed in monetary terms in order to eliminate price effects.

Users of the tabulation which shows the purchasing power of the consumer dollar compared to the 1986 dollar at different points in time (Table 2) should note that, as in the case of the Consumer Price Index from which the numbers are derived, the data may not measure closely the experiences of any one specific family within the large urban group to which the CPI relates. At the same time changes in the purchasing power of the dollar are not expected to match the experience of other population groups whose expen diture behaviour is significantly different from those associated with the CPI target population. It should also be noted that like the CPI, changes in the purchasing power of the dollar are not directly affected by changes in income taxes, unemployment insurance premiums, other types of security payments and all other goods and services that are not included in the CPI basket.

Appendice 2

LE POUVOIR D'ACHAT DU DOLLAR DE CONSOMMATION

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie et la baisse des prix est liée à la hausse du pouvoir d'achat.

En somme, le pouvoir d'achat du dollar de consommation varie en relation inverse avec les mouvements de l'indice des prix à la consommation. Par exemple, entre 1986 et juin 1990, les prix à la consommation mesurés par l'IPC ont grimpé de 19.2% de sorte que les biens et services qu'on pouvait acheter en 1986 avec \$100.00 coûtaient \$119.20 en juin 1990. Chaque dollar de consommation en juin 1990 achète donc moins qu'en 1986. Le pouvoir d'achat du dollar a baissé exactement dans la même proportion que l'indice des prix à la consommation a augmenté. Par conséquent, le pouvoir d'achat d'un dollar en juin 1990, par rapport au dollar de 1986,

Ce processus peut être assimilé à la déflation de l'argent, c'est-à-dire à la correction des valeurs monétaires afin d'éliminer l'influence des prix.

Les utilisateurs des totalisations qui indiquent le pouvoir d'achat du dollar de consommation à différentes périodes par rapport à 1986 (tableau 2) doivent noter que ces chiffres sont tirés de l'indice des prix à la consommation et qu'ils peuvent, tout comme ce dernier, ne pas mesurer fidèlement la situation particulière d'une famille faisant partie du grand groupe urbain auquel se rapporte l'IPC. Par ailleurs, les variations du pouvoir d'achat du dollar ne reflètent pas les changements touchant les autres groupes de population dont les habitudes de dépenses diffèrent sensiblement de celles du groupe cible pour l'IPC. Il faut également noter que, tout comme l'IPC, les variations du pouvoir d'achat du dollar ne sont pas touchées directement par les changements de l'impôt sur le revenu, des primes d'assurance-chômage, d'autres paiements de sécurité sociale et des prix de tous les autres biens et services ne faisant pas partie du panier de l'IPC.

Appendix 3

SEASONAL ADJUSTMENT OF THE CONSUMER PRICE INDEX

Economic time series, measuring changes through time in economic activities, reflect the combined effects of the underlying seasonal, cyclical, trend and irregular factors which influence them. Such series can be decomposed into distinct movements representing the separate effects of the seasonal, cyclical and trend factors and a residual movement representing factors causing irregular non-repetitive movements.

Seasonal fluctuations in a series are those that can be identified with a particular season or time of year. These fluctuations tend to occur at about the same time each year with roughly the same magnitude and are the composite result of climatic influences and social and commercial customs (e.g., harvests, end of season sales).

Cyclical movements consist of sequences of change over periods longer than a year, during which the series rises to a peak and then falls back, subsequently to rise again. For many series this type of movement is associated with expansion and contraction of the economy over the "business cycle".

The trend is a steady underlying movement which reflects continuing or slowly changing economic forces.

Finally, the fluctuations that remain unaccounted for by the seasonal, cyclical and trend movements of a series are termed irregular. The factors causing irregular movements in a series are of a non-repetitive, ad-hoc nature. The irregular component tends to have a stable random appearance, but may include some extreme movements having identifiable causes (e.g., strikes or severe weather). They therefore can be distinguished from the much smaller random irregular variations.

Appendice 3

LA DÉSAISONNALISATION DE L'INDICE DES PRIX À LA CONSOMMATION

Les séries chronologiques économiques mesurent l'évolution dans le temps de l'activitié économique. Ces séries reflètent les effets combinés de la saisonnalité, du cycle, de la tendance générale et d'autres facteurs accidentels qui leur sont propres et qui agissent sur elles. Il est possible de décomposer de telles séries ou mouvements distincts représentant séparément les effets de tel ou tel facteur (saisonnalité, cycle, tendance) et en un mouvement résiduel représentant les facteurs de mouvements accidentels (non répétitifs).

Les fluctuations saisonnières d'une série sont celles que l'on peut relier à une saison ou une période donnée de l'année; elles ont tendance à se produire généralement à peu près à la même époque de l'année et avec la même ampleur. Elles sont le résultat à la fois de conditions climatiques et d'habitudes sociales et commerciales (telle les récoltes, les ventes de fin de saison).

Les mouvements cycliques se définissent comme une suite de variations sur des périodes supérieures à un an, au cours desquelles la série atteint un sommet, descend puis remonte à nouveau. Ce type de mouvement est associé, pour de nombreuses séries, à l'expansion et à la récession économique au cours du "cycle économique".

La tendance générale est un mouvement fondamental stable qui reflète la continuité ou un changement lent de l'économie.

Enfin, les fluctuations qui ne se classent ni dans la saisonnalité, ni dans le cycle, ni dans la tendance générale sont désignées comme mouvements accidentels. Les facteurs expliquant ce type de mouvement dans une série sont de nature spéciale et non répétitive. L'élément accidentel tend à présenter une apparence aléatoire stable mais il peut comprendre certains mouvements extrêmes, dont on peut identifier les causes (comme des grèves ou de fortes intempéries). Ils peuvent donc être distingués des variations irrégulières aléatoires beaucoup moins prononcées.

The methodologies used for removing as much of the seasonal fluctuation as possible from a series have been described in detail in numerous articles and texts on the subject. Rather than reiterating those texts, an outline of the methodologies employed in the derivation of seasonally adjusted consumer price indexes for Canada is provided below.

With the introduction of the 1982 basket, the seasonal adjustment methodology was changed. seasonal adjustment is performed at the level of the seven major components with the seasonally adjusted All-items and All-items excluding Food indexes being the weighted average of their components. This indirect seasonal adjustment of the two aggregate series ensures (except for possible rounding differences) that the aggregate movements will be within the range of their components' movements. Since each basket has its own weights, the move to indirect seasonal adjustment of the aggregates dictated the use of unlinked series as the basis for the seasonal adjustment. Estimating a separate seasonal pattern for each basket has some conceptual advantages since it means that the classification and weight changes introduced with each updating of the basket will not distort the estimates. However, there is an operational difficulty which arises due to the desirability of having at least seven years of data for estimation of the seasonal pattern and the current rapidity with which CPI baskets are updated. Given the current updating cycle, at the time a new basket is introduced, we have only three years of data for the new basket. To create a longer time series, we chain on data from the previous basket back to it's beginning. This reintroduces some of the distortions present in estimating seasonal patterns from linked data.

The above distortion will be minimized through the use of concurrent seasonal adjustment rather than forecast seasonal factors. With the concurrent methodology, the seasonal pattern is estimated each month using all available data. However, to minimize revisions we will revise past indexes only at the end of each calendar year.

Les méthodes utilisées pour éliminer le plus possible de saisonnalité d'une série ont fait l'objet de descriptions détaillées dans de nombreux articles et ouvrages sur la question¹. Au lieu d'en reprendre ici le contenu, nous présentons ci-dessous les grandes lignes des méthodes utilisées pour dériver les indices des prix à la consommation désaisonnalisés pour le Canada.

Avec l'introduction du panier 1982, la méthode de désaisonnalisation fût changée. La désaisonnalisation directe est effectuée à l'échelle des sept composantes principales; les versions désaisonnalisées de l'indice des aliments et de l'indice d'ensemble sans les aliments correspondent à la pondérée de leurs composantes. désaisonnalisation indirecte des deux séries agrégées garantit que les mouvements agrégés se situeront dans les limites des mouvements de leurs composantes (exception faite des différences attribuables à l'arrondissement). Puisque chaque panier a ses propres coefficients de pondération, le passage à la méthode indirecte de désaisonnalisation des séries agrégées a entraîné l'utilisation, à titre de base de la désaisonnalisation, des séries non enchaînées. L'estimation de tendances saisonnières distinctes pour chacun des paniers représente certains avantages au point de vue conceptuel, puisqu'elle signifie que les changements apportés à la classification et aux coefficients de pondération au moment de la mise à jour du panier n'entraîneront aucune distortion. Toutefois, une difficulté opérationnelle existe étant donné, d'une part, qu'il est souhaitable d'avoir au moins sept années de données pour estimer la tendance saisonnière et, d'autre part, en raison de la rapidité avec laquelle on met maintenant à jour le panier de l'IPC. étant donné le cycle courant de mise-à-jour, nous n'avons que trois ans de données pour un nouveau panier lorsque celui-ci est introduit. Afin de créer une série plus longue, nous enchaînons les données du nouveau panier à celles du panier précédent jusqu'à son début. Cette mesure ramène certaines distorsions que l'on retrouvait dans l'estimation des tendances saisonnières des données enchaînées.

Ces distortions seront toutefois minimisées par l'utilisation de désaisonnalisations concomitantes plutôt que de coefficients saisonniers projetés. Dans la méthodologie concomitante, la tendance saisonnière est estimée chaque mois au moyen de toutes les données accessibles. Nous ne recalculerons toutefois les indices antérieurs qu'à la fin de chaque année civile, et ce pour réduire au minimum le nombre de révisions.

Shiskin, Julius and Harry Eisenpress, "Seasonal Adjustments by Electronic Computer Methods", Technical Paper 12, National Bureau of Economic Research, New York, 1958.

Appendix 4

CITY AVERAGE RETAIL PRICES

Introduction

The Average Retail Price Survey is under taken to produce an accurate measure of average prices at one point in time which will permit comparison between cities. In order not to generate artificial price differentials it is essential that the qualities, brands and sizes selected are sufficiently similar. Prices of approximately 60 items, consisting mainly of food and some personal care items and household supply items are collected in representative outlets in 26 cities. These cities are: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria and Whitehorse. This survey is normally under taken during the first week of January, April, July and October.

In order that the average prices generated for one city will be comparable with those for another city, price collection is generally limited to widely available manufacturers' brands. For meat and produce, care is taken to narrowly define cuts and qualities. The goods and services tax (GST) and the provincial retail sales tax are included in the retail averages where applicable.

Calculation Methodology

City Prices. Prices are collected in both chain and independent stores. (A chain stores organization is defined as one operating four or more stores under the same legal ownership.) A city average price is calculated for each item by weighting the average prices obtained for chain and independent stores according to their overall market sales share in that city. For branded items sold under brand labels, an average price for each brand is first calculated in the manner described above; the brand averages are then weighted together to form the item average. The weight assigned each brand in this process is proportionate to the number of price quotes obtained for each of the brands in that city.

Appendice 4

PRIX DE DÉTAIL MOYENS PAR VILLE

Introduction

L'enquête sur les prix moyens de détail est effectuée afin d'obtenir une mesure adéquate des prix moyens, à une période donnée, qui permette une comparaison entre les villes. Il est essentiel que les qualités, les marques et les tailles choisies soient suffisamment équivalentes afin de ne pas introduire des différences de prix artificielles. Les prix de principalement des quelques 60 articles. alimentaires, certains articles de soins personnels et des fournitures de ménage, sont relevés dans de nombreux points de vente dans 26 villes: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria et Whitehorse. Cette enquête est normalement effectuée durant la première semaine de janvier, d'avril, de juillet et d'octobre.

Afin que les prix moyens calculés pour une ville puissent être comparables à ceux d'une autre ville, l'observation des prix se limite généralement aux marques des fabricants largement distribuées. Dans le cas de la viande, des fruits et des légumes, on prend soin de définir avec précision les morceaux et les qualités. La taxe sur les produits et services (TPS) et la taxe de vente au détail sont ajoutées au prix de détail moyen s'il y a lieu.

Méthode de calcul

Prix urbains. Les prix sont recueillis dans les magasins à succursales multiples et les magasins indépendants. (Une entreprise à succursales multiples est définie comme celle qui exploite quatre magasins ou plus sous la même raison sociale.) On calcule un prix moyen par ville pour chaque article en pondérant les prix moyens recueillis dans les magasins à succursales multiples et dans les magasins indépendants selon la part de leurs ventes sur le marché général dans leur ville. Dans le cas ces articles vendus sous marque déposée, on calcule d'abord un prix moyen pour chaque marque déposée de la façon décrite plus haut: ensuite on pondère ensemble les moyennes des marques déposées afin d'en arriver à la moyenne pour l'article. Le poids assigné à chaque marque déposée lors de ce processus est proportionnel au nombre de prix observés dans la ville en question pour cette marque déposée.

Weighted city averages. A weighted city average price for each item is derived by weighting the relevant city averages. The importance of each city in calculating the weighted city average is determined by the volume of retail sales in that city.

Item Specifications

A description of the approximately 60 items covered in the Average Prices Survey can be acquired by contacting Prices Division.

Average Retail Prices for Gasoline

Tables 16 through 19 present average retail prices for two types of gasoline retailed in two types of filling stations. The information is collected on a monthly basis as part of the Consumer Price Index survey. Gasoline prices are collected at the pump from a sample of full service and self-serve filling stations in major urban centres across Canada. The prices collected included all applicable Federal and Provincial taxes. They are presented as average prices per litre of gasoline. The series presented in these tables are confined to the 16 urban centres for which Consumer Price Indexes are produced and cover the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to January 1979, are, however, based on the average prices per imperial gallon.

Average Retail Prices for Fuel Oil

Table 20 presents average retail prices for fuel oil. The information is collected nine times yearly as part of the Consumer Price Index Survey. Fuel oil prices are collected from a sample of distributors in major urban centres across Canada. The prices collected include all applicable Federal and Provincial taxes. They are presented as average prices per litre. The series presented in Table 20 are confined to 16 urban centres and for the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to October 1980 are, however, based on the average prices per imperial gallon.

Moyennes pondérées des villes. Une moyenne pondérée du prix de chaque article pour l'ensemble des villes est calculée en pondérant les moyennes appropriées des villes. L'importance de chaque ville dans le calcul de la moyenne pondérée des villes est déterminée par le volume des ventes au détail dans cette ville.

Spécification des articles

Une description des quelques 60 articles contenus dans l'enquête des prix moyens peut être obtenu en communiquant avec la Division des prix.

Prix de détail moyens de l'essence

Les tableaux 16 à 19 présentent les prix de détail moyens de deux types d'essence vendus dans deux genres de stations. Cette information est relevée à chaque mois dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix de l'essence sont relevés, sur place, auprès d'un échantillon de stations offrant un service complet et de stations libre service dans les principaux centres urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ces tableaux sont ceux d'un litre d'essence. Les séries présentées se limitent aux 16 centres urbains pour lesquels on produit un IPC pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant janvier 1979 sont, toutefois, sur la base d'un gallon impérial.

Prix de détail moyens du mazout

Le tableau 20 présente les prix de détail moyens du mazout. Cette information est relevée neuf fois par année dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix du mazout sont relevés auprès d'un échantillon de distributeurs dans les principaux centre urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ce tableau sont ceux d'un litre. Les séries présentées au tableau 20 se limitent à 16 centres urbains, pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant octobre 1980 sont, toutefois, sur la base d'un gallon impérial.

Appendix 5

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications. domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to

Appendice 5

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger: en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking an other complete survey.

parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 7 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 7 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

"Just one more thing...

I received your recommendation - now I need the statistics to back it up.

"Autre chose...

J'ai reçu votre recommandation.
J'ai maintenant besoin des statistiques à l'appui.

Most of us have been in this situation more than once. Usually when there's something else that's pressing.

Now Statistics Canada offers you the *Guide to Statistics Canada's Programs and Products*. In one place, you'll find 550 pages of detailed information for 409 surveys and statistical programs covering just about every topic your boss could ever stump you with.

From Absence from Work through Cable Television, the Mushroom Grower's Survey, and Traveller Accommodation, to the Wholesale Trade Survey and Zoos. The Guide is your quick three-step solution to

the "Just-one-more-thing" syndrome. All you have to do is:

- **1. Choose your topic.** The complete, cross-referenced index puts your finger on <u>every</u> survey covering your subject.
- 2. Choose your surveys. Look up each survey to make sure it's relevant to your needs. The complete survey profile includes everything you need to know:
 - what data are collected
 - when the survey was done
 - who was surveyed
 - how often they are surveyed
 - and other relevant points that will help you find the survey or program with the information you need.
- Phone the experts. For key findings and insights from the survey, just pick up the phone and talk to the person who conducted the survey. A phone number is provided for every survey.

Nombre d'entre nous se sont trouvés dans cette situation plus d'une fois. Cela arrive habituellement lorsque l'on a autre chose à faire de plus pressant.

C'est pourquoi il existe le *Guide d'accès aux programmes et produits de Statistique Canada*. Ce seul ouvrage contient 550 pages de renseignements concernant 409 enquêtes et programmes statistiques couvrant pratiquement tous les sujets auxquels s'intéresse votre patron.

De l'absence du travail en passant par la câblodistribution, l'Enquête relative aux producteurs de champignons, l'hébergement des voyageurs, l'Enquête sur le commerce de gros et les zoos.

- 1. Choisissez le sujet. L'index complet de renvois vous dirige vers <u>chaque</u> enquête qui porte sur le sujet choisi.
- 2. Choisissez les enquêtes. Assurez-vous que chaque enquête choisie répond à vos besoins. Le profil complet des enquêtes répond à toutes vos questions:
 - le <u>type</u> de données recueillies
 - la date à laquelle l'enquête a été menée
 - la population échantillonnée
 - la <u>fréquence</u> de l'enquête
 - On y trouve d'autres éléments pertinents qui vous permettront de choisir l'enquête ou le programme qui répondra le mieux à vos besoins.
- 3. Téléphonez aux experts. Vous pouvez discuter àvec la personne qui a mené l'enquête et obtenir ainsi des résultats clés et des commentaires. Pour chaque enquête, vous trouverez le nom et le numéro de téléphone d'une personne-ressource.

ORDER NOW!

To order your three-step solution, call **1 800 267-6677**, fax **(613) 951-1584**, or mail to Statistics Canada, Marketing Division, Publication Sales, Tunney's Pasture, Ottawa, Ontario, K1A 0T6.

The *Guide to Statistics Canada's Programs and Products 1991* (Cat. no. 12-575E) is \$85.00 in Canada, US\$102.00 in the United States and US\$119.00 in other countries.

If you would prefer the information on diskette, call (613) 951-8576 or fax (613) 951-8578.

COMMANDEZ MAINTENANT!

Pour commander, composez le **1 800 267-6677**, télécopiez au **(613) 951-1584** ou écrivez à Statistique Canada, Division de la commercialisation, Vente des publications, Parc Tunney, Ottawa (Ontario) K1A 0T6.

Le *Guide d'accès aux programmes et produits de Statistique Canada 1991* (N° 12-575F au catalogue) coûte 85 \$ au Canada, 102 \$ US aux États-Unis et 119 \$ US dans les autres pays.

Si vous préférez recevoir cette information sur disquette, téléphonez au (613) 951-8576 ou télécopiez au (613) 951-8578.

MERCI DE VOTRE COMMANDE!

Statistique Canada Statistics Canada Canadä

DID YOU KNOW...

THAT CANADIAN EXPORTS OF NATURAL GAS IN 1990 WERE 80% HIGHER THAN IN 1980?

ue to the unpredictable nature of the energy industry, many reference publications are outdated by the time they're published. Not this one! With the certainty of change in the energy picture, you need a source that remains current and complete.

The *Energy Statistics Handbook* is the most complete source of detailed information on the energy field. This publication is designed to work for you! Your subscription includes:

- An attractive, easy-to-use binder keep it on your bookshelf or beside your telephone.
- Section dividers to organize the monthly updates which enable you to rapidly access the facts you need.
- A monthly 200-page update from Statistics Canada that ensures your facts are the most recently released for this rapidly changing sector.

Data is organized by energy type: total energy, petroleum, natural gas, electricity, uranium and coal. Additional sections include prices and conversion factors. Along with up-to-date information, you'll find historical data going back 10 years, so you can compare trends over time.

Executives, research and development professionals and environmentalists use the *Energy Statistics Handbook* to add authority to their industry analysis, plans and corporate reports.

Subscribe to the Energy Statistics Handbook today!

The *Energy Statistics Handbook* (Cat. #10-602) is \$300 in Canada, US\$360 in the United States and US\$420 in other countries.

Write to:

Publication Sales Statistics Canada Ottawa, Ontario K1A 0T6.

If more convenient, fax your order to **(613) 951-1584**. Or contact your local Statistics Canada Reference Centre listed in this publication.

For faster ordering, call **1-800-267-6677** and use your VISA, MasterCard or Purchase Order number.

SAVIEZ-VOUS...

QUE LES EXPORTATIONS CANADIENNES DE GAZ NATUREL ÉTAIENT 80 % PLUS ÉLEVÉES EN 1990 QU'EN 1980?

n raison de la nature imprévisible de l'industrie de l'énergie, de nombreuses publications de référence sur le sujet sont déjà périmées lorsqu'elles paraissent. Mais pas celle-ci! Le monde de l'énergie est en constante évolution, aussi vous avez besoin d'une source de référence qui soit toujours d'actualité et complète.

Le *Guide statistique de l'énergie* est la source la plus complète de renseignements exacts sur le domaine de l'énergie. Cette publication est conçue pour travailler pour vous! Votre abonnement comprend :

- Un classeur attrayant et facile à consulter vous pouvez le garder dans votre bibliothèque ou à côté de votre téléphone;
- Des sections ordonnées selon les mises à jour mensuelles, ce qui vous permet de trouver rapidement les faits dont vous avez besoin;
- Une mise à jour mensuelle de 200 pages de Statistique Canada qui vous assure d'avoir en main les faits les plus récents qui soient sur ce secteur qui change continuellement.

Les données sont classées selon le type d'énergie : l'énergie totale, le pétrole, le gaz naturel, l'électricité, l'uranium et le charbon. D'autres sections traitent des prix et des facteurs de conversion. En plus d'une information actuelle, vous y trouverez des données historiques des dix dernières années, afin que vous puissiez comparer les tendances à travers le temps.

Les cadres, les professionnels de la recherche et du développement et les écologistes utilisent le *Guide statistique de l'énergie* pour ajouter du poids à leur analyse de l'industrie, leurs projets et à leurs rapports de société.

Abonnez-vous dès aujourd'hui au Guide statistique de l'énergie!

Le Guide statistique de l'énergie (N° 10-602 au Cat.) coûte 300\$ au Canada, 360 \$ US aux États-Unis et 420 \$ US dans les autres pays.

No other monthly report on the Canadian Economy has this much to offer

La seule publication à vous offrir autant d'information sur l'économie canadienne

Canadian Economic Observer

The most extensive and timely information source for people who want objective facts and analysis on the Canadian Economy... every

Current economic conditions

Brief, "to the point" a current update summary of the economy's performance including trend analyses on employment, output, demand and the leading indicator.

Feature articles

In-depth research on current business and economic issues: business cycles, employment trends, personal savings, business investment plans and corporate concentration.

Statistical summary

Statistical tables, charts and graphs cover national accounts, output, demand, trade, labour and financial markets.

Regional analysis

Provincial breakdowns of key economic indicators.

International overview

Digest of economic performance of Canada's most important trading partners — Europe, Japan and the U.S.

Economic and statistical events

Each month, CEO also publishes a chronology of current events that will affect the economy, and information notes about new products from Statistics Canada.

Consult with an expert

The names and phone numbers of the most appropriate Statistics Canada contacts are provided with each data table in the statistical summary; not only can you read the data and the analysis, you can talk to the experts about it.

The Canadian Economic Observer

(Catalogue no. 11-010) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster service, fax your order to 1-613-951-1584. Or call toll free at 1-800-267-6677 and use your VISA or MasterCard.

L'Observateur économique canadien

La revue la plus complète et la plus à jour qui soit pour les gens qui désirent des renseignements objectifs et une analyse de l'économie canadienne... chaque mois.

Les conditions économiques actuelles

Résumé bref et incisif de l'actualité économique du mois, comportant l'analyse des tendances de l'emploi, de la production, de la demande et de l'indicateur avancé.

Les études spéciales

Recherche approfondie sur les questions du domaine des affaires et de l'économie : cycles économiques, tendances de l'emploi, épargne personnelle, projets d'investissement et concentration des sociétés.

L'apercu statistique

Tableaux, graphiques et diagrammes englobant les statistiques des comptes nationaux, de la production, de la demande, du commerce, de l'emploi

et des marchés financiers.

L'analyse régionale

Ventilation par province des indicateurs économiques stratégiques.

Le survol de l'économie internationale

Un sommaire du rendement de l'économie des partenaires commerciaux du Canada, comme l'Europe, le Japon et les États-Unis.

Événements économiques et statistiques

Chaque mois, L'OEC publie une chronologie des événements qui influenceront l'économie de même que des renseignements sur les nouveaux produits de Statistique Canada.

Consultez un expert

Les noms et numéros de téléphone des personnes-ressources figurent à chaque tableau de l'aperçu statistique; non seulement pouvez-vous lire les données et l'analyse, mais vous pouvez de plus discuter du sujet avec les experts de Statistique Canada.

L'Observateur économique canadien.

(nº 11-010 au catalogue) coûte 220 \$ l'abonnement annuel au Canada, 260 \$ US aux États-Unis et 310 \$ US dans les autres pays.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

Most of the data published in this publication is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. The Databank identification numbers, by which data may be retrieved from CANSIM, are given in the headings of the relevant series in Tables in the publication. For further information on CANSIM call (613) 951-8200 or write to Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

This publication was prepared under the direction of:

- Michel Jacod, Director, Prices Division
- Margaret Parlor, Chief, Consumer Prices Section
- Harold Harnarine, Head, Information and Current Analysis Unit

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans cette publication peuvent être obtenues sous forme lisible par machine de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Les numéros d'identification de la Databank qui servent à retrouver les données de CANSIM sont inscrits à l'en-tête des séries respectives de la publication. Pour plus d'information sur CANSIM, composer le (613) 951-8200 ou écrire à la Division du marketing, Statistique Canada, Immeuble R.H. Coats Building, Ottawa, K1A 0T6.

Cette publication a été rédigée sous la direction de:

- Michel Jacod, Directeur, Division des prix
- Margaret Parlor, Chef, Section des prix à la consommation
- Harold Harnarine, Chef, Sous-section de l'information et de l'analyse courante

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Consumer Price Behaviour

Second Quarter 1993

Trends in the All-items Index

In unadjusted terms, the All-items Consumer Price Index (CPI) for Canada increased by 0.2% in the second quarter following advances of 0.6% observed in each of the two previous quarters. In the first six months of 1993, the All-items index rose by 0.9%, less than the increase of 1.3% reported in the first six months of 1992.

The average of 12-month rates of increase in the latest quarter was 1.7%, down noticeably from the 2.1% advance reported for the first quarter and marginally less than the 1.8% rise noted for the fourth quarter of 1992.

In seasonally adjusted terms, the CPI rose by 0.2% between March and June (second quarter) 1993. This rise was half the increase of 0.4% observed in the first quarter and much less than the 0.8% advance reported for the fourth quarter of 1992. In terms of the monthly seasonally adjusted movements, the All-items index rose by 0.2% in April, fell by 0.2% in May and edged up by 0.1% in June.

Contributions by Major Components

In unadjusted terms, five of the seven major component indexes registered increases in the second quarter while the remaining two indexes, Clothing and Transportation, fell. A rise of 0.8% in the Food index accounted for the largest proportion of the upward pressure. Moderate upward contributions also resulted from increases of 0.7% in the Recreation, Reading and Education component, 0.1% in the Housing index and 0.8% in the Health and Personal Care index. The impact of a rise of 0.1% in the Tobacco Products and Alcoholic Beverages index was negligible. At the same time, drops of 0.5% in the Clothing index and 0.2% in the Transportation index caused a noticeable dampening influence on the overall movement.

Contributions by Lower-level Indexes.

The Food index rose by 0.8% in the second quarter following an increase of 1.0% in the first quarter. The rise in the latest period resulted from increases of 1.1% in the index for Food Purchased from Stores and 0.4% in the index for Food Purchased from Restaurants. Much of the advance in the prices of food purchased from stores was associated with increases in the indexes for Meat (1.6%), Fresh

Points saillants

Comportement des prix à la consommation

Deuxième trimestre de 1993

Tendances de l'indice d'ensemble

Avant désaisonnalisation, l'indice d'ensemble des prix à la consommation (IPC) pour le Canada augmente de 0.2% au deuxième trimestre, après s'être accru de 0.6% au cours de chacun des deux trimestres précédents. Au cours des six premiers mois de 1993, l'indice d'ensemble a progressé de 0.9%, ce qui représente une hausse inférieure à celle de 1.3% observée au cours des six premiers mois de 1992.

La moyenne des taux d'augmentation sur douze mois au deuxième trimestre est de 1.7%, soit nettement moins que la hausse de 2.1% observée au premier trimestre et un peu moins que celle de 1.8% du quatrième trimestre de 1992.

En données désaisonnalisées, l'IPC augmente de 0.2% entre mars et juin 1993 (deuxième trimestre). Cette augmentation est la moitié de celle de 0.4% observée au premier trimestre et est très inférieure à celle de 0.8% du quatrième trimestre de 1992. En termes des mouvements mensuels désaisonnalisés, l'indice d'ensemble s'accroît de 0.2% en avril, baisse de 0.2% en mai et se redresse de 0.1% en juin.

Contributions des principales composantes

Avant désaisonnalisation, les indices de cinq des sept principales composantes sont en hausse au deuxième trimestre de 1993, tandis que les deux autres, c'est-à-dire les indices de l'habillement et des transports, diminuent. L'augmentation de 0.8% de l'indice des aliments est la cause principale de la pression à la hausse. Les augmentations de 0.7% de l'indice des loisirs, de la lecture et de la formation, de 0.1% de l'indice de l'habitation et de 0.8% de celui de la santé et des soins personnels contribuent de façon modérée la pression à la hausse. L'impact de l'accroissement de 0.1% de l'indice des produits du tabac et des boissons alcoolisées est négligeable. Par ailleurs, les indices de l'habillement et des transports diminuent respectivement de 0.5% et de 0.2%, ce qui devait freiner de façon notable le mouvement général.

Contributions des indices de niveau inférieur

L'indice des aliments augmente de 0.8% au deuxième trimestre de 1993, après s'être accru de 1.0% au premier trimestre. Cette augmentation est attribuable à des progressions de 1.1% et de 0.4% respectivement de l'indice des aliments achetés au magasin et des aliments achetés au restaurant. La plus grande partie de la progression du prix des aliments achetés au magasin s'explique par la hausse des indices de la viande (1.6%), des légumes frais (4.0%) et

Vegetables (4.0%), and Fresh Fruit (4.6%). Within meat, both beef (2.9%) and pork (4.8%) showed substantial price increases which were related to good domestic and export demand conditions combined with controlled supplies. Within the Fresh Vegetables index, higher prices were registered for storage type vegetables such as potatoes, onions and cabbages as last year's stocks neared depletion, but tomato prices also rose sharply. Large declines were noted, however, in the prices of celery and lettuce. All major types of fresh fruit registered price increases in the second quarter but the sharpest advances were found in grapefruit and oranges.

The Recreation, Reading and Education index jumped by 0.7% in the second quarter. Within the Recreation component, notable price increases were observed for cablevision, photographic goods, home entertainment equipment and admission to baseball games. Membership fees and dues for the use of recreational facilities also rose. The Reading index increased by 1.0% as higher prices for newspapers and books were observed.

The slight 0.1% rise in the Housing index reflected several offsetting price movements found in its components. Higher charges were observed for rented accommodation, fuel and electricity, traveller accommodation, selected household commodities (notably paper products), household textiles and selected household equipment. A large proportion of the total upward impact was offset by a decline of 0.4% in the Owned Accommodation index. The drop in homeownership charges resulted from a continuing decline in mortgage interest costs and a fall in maintenance and repair charges. A large part of this downward pressure was eroded by a rise in homeowners' insurance premiums (partially associated with the addition of this expenditure to the sales tax base in Ontario) and by a rise in new house

Increases of 0.8% in the Health and Personal Care index and 0.1% in the Tobacco Products and Alcoholic Beverages index added moderately to the rise in the All-items index. In the first index, increases in dental care charges and in the prices of personal care supplies and hair grooming services were the major contributing factors. In the second index, higher prices for served alcoholic beverages and for wine and liquor purchased from stores were weakened by a drop in the prices of cigarettes and of beer purchased from stores.

The Clothing index fell by 0.5% in the second quarter. The latest decline was due to seasonal price discounts and sales activities, some of which were associated with a persistent weakness in demand. Women's Wear prices fell on average by 0.7% with much of the drop found in suits and dresses. The Men's Wear index fell by 0.5% reflecting lower prices mainly for suits and footwear. The Girls' Wear index fell by 1.0% and the Clothing Materials index by 0.6%, while the Boys' Wear index rose by 0.2%.

des fruits frais (4.6%). S'agissant de la viande, le prix du boeuf et du porc augmente de façon sensible (2.9% et 4.8%), ce qui s'explique par les bonnes conditions des demandes intérieure et de l'exportation et par des arrivages mesurés. Pour les légumes frais, on note une majoration du prix des légumes d'entreposage tels que les pommes de terre, les oignons et les choux à mesure que les stocks de l'an dernier s'épuisent, mais le prix des tomates s'accroît lui aussi fortement. Par contre, on observe d'importantes diminutions pour le céleri et la laitue. Le prix de tous les principaux types de fruits frais s'accroît au deuxième trimestre, mais le prix des pamplemousses et des oranges augmentant le plus.

L'indice des loisirs, de la lecture et de la formation augmente de 0.7% au deuxième trimestre. S'agissant des loisirs, on note une augmentation du prix de la télédistribution, du matériel photographique, du matériel de divertissement au foyer et des matchs de base-ball. Les frais et cotisations pour les activités de loisirs s'accroissent également. L'indice de la lecture progresse de 1.0% en raison de la majoration du prix des journaux et des livres.

La légère hausse de 0.1% de l'indice de l'habitation traduit plusieurs mouvements de prix de sens opposés. On constate une hausse dans le cas du logement en location, du mazout et de l'électricité, de l'hébergement des voyageurs, de certains produits ménagers (en particulier des produits en papier), des articles ménagers en matière textile et de divers équipement ménager. Une partie importante de la progression totale est compensée par une diminution de 0.4% de l'indice du logement en propriété. La chute des frais de propriété s'explique par la baisse continue des coûts des intérêts hypothécaires et par la diminution des frais d'entretien et de réparation. Cette pression à la baisse est compensée dans une large mesure par le relèvement des primes d'assurance des propriétaires de maison (en partie à cause de l'élargissement de l'assiette de la taxe de vente en Ontario, qui couvre maintenant cet élément de dépense) et du prix des maisons neuves.

Les augmentations de 0.8% et de 0.1% des indices de la santé et des soins personnels ainsi que des produits du tabac et des boissons alcoolisées accentuent de façon modérée la progression de l'indice d'ensemble. Dans le premier cas, les causes principales sont la majoration des frais de soins dentaires et du prix des produits de soins personnels ainsi que des services de coiffeur. Dans le deuxième, l'augmentation du prix des boissons alcoolisées servies dans des débits et des vins et spiritueux achetés dans des magasins est freinée par la chute du prix des cigarettes et de la bière achetée au magasin.

L'indice de l'habillement diminue de 0.5% au deuxième trimestre de 1993. Cette diminution s'explique par les rabais et les soldes de la saison, dont certains se rattachent à la faiblesse persistante de la demande. Le prix des vêtements pour femmes baisse en moyenne de 0.7%, en raison surtout de la diminution du prix des tailleurs et des robes. La baisse de 0.5% de l'indice des vêtements pour hommes traduit avant tout la diminution du prix des complets et des chaussures. L'indice des vêtements pour filles recule de 1.0% et celui des tissus pour vêtements, de 0.6%. L'indice des vêtements pour garçons s'accroît de 0.2%.

The decline of 0.2% in the Transportation index resulted from lower prices for new cars (associated with increases in manufacturers' price rebates on selected models) and from a fall in air fares. The price for travel by air fell in each month of the second quarter. The drop in April and May was partly due to seasonal price adjustments while the decline in June resulted from a drop in seat-sale fares. Somewhat offsetting these declines were higher prices for gasoline and, to a lesser extent, increases in automobile rental charges, parking rates, and rail fares.

La diminution de 0.2% de l'indice des transports résulte de la baisse du prix des voitures neuves (reliée au relèvement des rabais offerts par les fabricants sur certains modèles) et des tarifs aériens. Le prix des voyages aériens se replie au cours de chacun des trois mois du deuxième trimestre. La baisse en avril et en mai s'explique en partie par des rajustements de prix saisonniers, tandis que le recul en juin résulte d'une diminution des tarifs des "ventes de sièges". Ces diminutions sont compensées quelque peu par le relèvement du prix de l'essence et, dans une moindre mesure, des frais de location automobile, des tarifs de stationnement et des tarifs ferroviaires.

Introduction

This quarterly publication presents a compendium of consumer prices and price index related information of both a current and historical nature. It provides a wide range of timely and detailed statistical information and serves as a complement to the monthly publication, The Consumer Price Index, Catalogue 62-001.

Part I of this report presents a synopsis of current consumer price index movements. This is presented in the form of tabular and graphic information. Some tabular information on international prices is also presented, in particular for some Canada - U.S. comparisons.

Parts II and III provide a detailed historical summary of monthly consumer price indexes in recent years. This summary contains considerable disaggregated information, again in the perspective of both the urban Canada and the separate city contexts.

Part IV of this report contains tables for the All-items and seven major components for each province.

Place-to-place comparative retail price information forms Part V of the report. This segment presents the most recent data with regards to average city retail prices and inter-city indexes of retail price differentials. Special feature articles, which are periodically included in the publication, are presented in Part VI.

Appendices serve as sources of reference for the statistical data presented in the preceding segments of the report. Appendices 1 and 2 contain explanatory notes pertaining to consumer price index data; Appendix 3 provides reference material for seasonal adjustment methodology in the context of its application to the Consumer Price Index; Appendices 4, 5 and 6 present background information relating to place-to-place retail price comparisons.

Introduction

Cette publication présente un résumé de renseignements historiques et courants des prix à la consommation et des indices de prix. Elle fournit une gamme d'informations statistiques étendue, d'une façon détaillée, et sert de complément à la publication mensuelle, L'indice des prix à la consommation, n° 62-001 au catalogue.

La partie I de ce rapport contient un aperçu synoptique qui présente les mouvements courants des prix à la consommation. Ces informations sont présentées sous la forme de tableaux et de graphiques. Des tableaux comportant de l'information sur les prix internationaux sont également présentés, particulièrement en ce qui regarde certaines comparaisons entre le Canada et les É.-U.

Les parties II et III fournissent un résumé historique détaillé des indices mensuels des prix à la consommation des dernières années. Ce résumé contient des renseignements pour le Canada et les villes à un niveau beaucoup plus désagrégé.

La partie IV de ce rapport contient des tableaux pour l'ensemble et les sept composantes principales pour chaque province.

Des informations sur les prix de détail comparés d'un endroit à l'autre composent la partie V de ce rapport. Cette section fournit les plus récentes données au sujet des prix de détail moyens par ville et des indices comparatifs des prix de détail entre les villes. Les articles spéciaux, qui font périodiquement partie de cette publication, se retrouvent à la partie VI.

Les appendices servent de référence aux données statistique présentées dans les parties précédentes du rapport. Les appendices 1 et 2 contiennent les notes explicatives reliées aux données de l'indice des prix à la consommation; l'appendice 3 fait référence à la méthode des ajustements saisonniers dans son application à l'indice des prix à la consommation; les appendices 4, 5 et 6 fournissent des informations de base reliées aux comparaisons de prix d'un endroit à l'autre.

Seasonal adjustment of the Consumer Price Index for Canada is undertaken separately for each of the seven major components of the CPI with the calculation being made before linking or chaining takes place. The resulting seven major component indexes as well as the All-items and All-items excluding Food aggregates are then "linked" or "chained" to form continuous series starting from September 1978. The seasonally adjusted monthly data are published without further revision until the year end, when revisions to any months data may b∈ made from January 1989 forward (the start of the 1986 basket). These revision are published with the December

La désaisonnalisation de lindice des prix à la consommation pour le Canada est effectuée séparément pour chacune des sept composantes principale de l'IPC. Les calculs sont faits avant de procéder à l'enchaînement. Les indices des sept composantes principales, d'ensemble et d'ensemble sans les aliments ainsi obtenus sont ensuite "enchaînés" pour déterminer les séries continues à partir de septembre 1978. Les données désaisonnalisées mensuelles sont publiés sans autre révision jusqu'à la fin de l'année où une révision peut être effectuée pour tout mois à compter de janvier 1989 (le début du panier de 1986). Ces révisions sont émis avec la publication de décembre.

For explanatory notes and detail, see Appendix 4.
Blanks appear on this table where the quality and (or) quantity of the prices were insufficient to produce a good average. Whitehorse is not included in weighted city averages.
As of October 1990, tenderloin removed in all cities.
Chicoutimi (450 g).
One package yielding 2.25 L in total.

Pour de plus amples renseignements et détails, consulter l'appendice 4.

Nous avons laissé les espaces en blanc dans ce tableau lorsque la qualité et (ou) la quantité des prix relevés ne nous a pas permis d'établir des moyennes fiables. Whitehorse n'est pas inclus dans les moyennes pondérées des villes. A compter d'octobre 1990, les prix du bifteck de surlonge sans la partie du filet sont relevés dans toutes les villes. Chicoutimi (450 g). Un paquet donnant en tout 2.25 L

Appendix 1

THE CONSUMER PRICE INDEX

The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is of an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time. Changes in the costs of this basket are therefore due only to "pure" price movements, i.e., price movements that are not associated with changes in the quality and/or quantity of the set of consumer goods and services in the basket.

The Consumer Price Index for each city measures price change from one time period to another within that specific city. Thus, while city CPI's show the **movement** of prices over time in each city, they do not indicate price level differences between cities or between cities and Canada. Such inter-city price comparisons for a selected number of items sold in grocery stores for 26 cities are available at present in Part V of this publication. Inter-spatial indexes covering approximately two thirds of the CPI basket for a selected number of cities are also available in this section.

Coverage

Beginning with the December 1988 to January 1989 price change, the weights used in the Consumer Price Index are those pertaining to 1986 expenditure patterns. Data used for establishing these patterns were obtained through the 1986 Family Expenditure Surveys. The expenditure data represents the expenditures of all private households (families and individuals) living in Canadian urban centres with a population of 30,000 or more. Population estimates for 1986 revealed 82 such urban centres. Largely due to limitations on the availability of detailed information on consumer expenditures it has become necessary to group the 82 urban centres into 34 urban centre strata. An urban centre stratum may be interpreted as a geographical unit around which the sampling framework of the CPI is constructed.

Separate CPI's are published for 18 of these centres which, together, accounted for approximately 75% of the total 1986 current consumption expenditures reported in the 82 centres. These 18 centres were, in part, selected in order to permit the publication of at least one CPI in each province. Some 300 commodities are priced in each of these 18 cities while in the remaining 64 urban centres, the number of commodities surveyed is fewer, with clothing and home furnishings being the notable exclusions.

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION

L'indice des prix à la consommation (IPC) mesure la variation dans le temps, exprimée en pourcentage, du coût à l'achat d'un "panier" constant de biens et de services, qui représente les achats faits par un groupe particulier de la population au cours d'une période donnée. Le "panier" renferme des biens et des services de quantité et de qualité invariables ou équivalentes et dont les prix sont mesurables au cours du temps. C'est ainsi que les variations de son coût résultent uniquement des mouvements "purs" de prix, c.-à-d. des mouvements de prix qui ne sont pas attribuables à des changements de qualité ou de quantité des biens et services de consommation du panier.

L'indice des prix à la consommation de chaque agglomération urbaine mesure les variations de prix entre deux périodes dans cette agglomération. Aussi les IPC des villes indiquent-ils le **mouvement** des prix dans le temps dans chaque agglomération, mais non les différences de niveau des prix entre les villes ou bien entre les villes et le Canada. De telles comparaisons entre les villes en ce qui concerne les niveaux de prix de certains articles vendus dans les épiceries sont présentées, pour 26 villes, à la Partie V de la présente publication. On y trouve également, pour certaines villes, des indices interspatiaux portant sur les deux tiers environ du panier de l'IPC.

Champ d'observation

À compter de janvier 1989, les pondérations utilisées pour l'indice des prix à la consommation se rapportent à la composition des dépenses de 1986. Les données qui ont servi à établir cette composition proviennent des enquêtes sur les dépenses des familles de 1986. Les données sur les dépenses représentent les dépenses de tous les ménages privés (familles et personnes seules) qui habitent les centres urbains du Canada qui comptent 30,000 habitants ou plus. D'après les estimations démographiques pour 1986, 82 centres urbains répondent à ce critère de population. En raison principalement du manque de renseignements détaillés sur les dépenses des consommateurs, il a été nécessaire de grouper les 82 centres urbains en 34 strates de centres urbains. Une strate de centres urbains peut se définir comme une unité géographique à partir de laquelle est constituée la base de sondage de l'IPC.

Des IPC distincts sont publiés pour 18 centres qui, ensemble, interviennent pour près de 75% du total des dépenses courantes de consommation déclarées en 1986 par les 82 centres. Les 18 centres ont été choisis, en partie, parce qu'ils permettent la publication d'un IPC au moins dans chaque province. On relève les prix de quelque 300 produits dans chacune des 18 villes; ce nombre est plus faible dans les 64 centres restants, les produits exclus étant principalement l'habillement et les articles d'ameublement.

Prices

The prices used in the calculation of the CPI are retail prices without regard to whether they are described as regular, special, etc. inclusive of all sales and excise taxes applicable to individual commodities. The pricing cycle starts in the latter part of each month and extends to the middle part of the following month. Although prices for most CPI items are collected on a monthly basis, some are priced less frequently, e.g., property taxes, automobile registration fees, dry cleaning services. However, such goods or services scheduled for pricing at less than monthly intervals will be priced in any month when there is evidence to suggest that significant price changes may occur prior to the next regularly scheduled pricing. The number of prices observed in a given city depends upon the importance of that city's expenditures to the total Canada expenditure and also the nature of the commodity, with those commodities displaying a high variability of price change generally requiring more observations. The selection of outlets in which prices are to be collected is judgmental (other than for rents) with the sample being designed to cover volume selling establishments.

Weights and Linking

The weights used in the calculation of the Consumer Price Index are periodically updated. This is a necessary procedure which serves to ensure that weights reflect changes in consumer expenditures thereby maintaining the relevancy of the index. As a result, different weighting systems are in effect in different time periods.

The 1982 family expenditure patterns were used to compile the CPI from January 1985 to December 1988. In January 1989 the 1982 weights were replaced by those derived from the expenditure patterns of 1986. This updating continues the policy of updating on a four-year cycle.

Prix

Les prix servant au calcul de l'IPC sont les prix au détail qu'il s'agisse de prix réguliers, de prix spéciaux, etc. et englobent toutes les taxes de vente, d'accise et autres taxes imposées aux produits. Le cycle des relevés commence vers la fin de chaque mois et se termine au milieu du mois suivant. Les prix de la plupart des articles de l'IPC sont recueillis chaque mois, mais certains articles sont observés moins souvent, notamment l'impôt foncier. l'immatriculation d'automobiles, le nettoyage à sec. Cependant, dans le cas des biens et services dont l'observation est prévue à des intervalles de plus d'un mois, on en relèvera le prix dans tout mois où il apparaît qu'une variation importante se produira avant le prochain relevé prévu au calendrier. Le nombre de prix observés dans une ville donnée dépend de l'importance des dépenses de cette ville par rapport au total des dépenses pour le Canada ainsi que de la nature du produit, les observations étant généralement plus fréquentes pour les produits dont les prix varient beaucoup. Le choix des points de vente où les prix doivent être recueillis est fait au jugé (sauf pour les loyers) et l'échantillon a pour but de couvrir les établissements à gros volume de vente.

Pondérations et enchaînement

Les pondérations utilisées dans le calcul de l'indice des prix à la consommation sont mises à jour périodiquement. Ce procédé est nécessaire pour que les pondérations tiennent compte des changements qui s'opèrent au niveau des dépenses à la consommation et, par le fait même, pour que l'indice conserve son utilité. En conséquence, différents schémas de pondérations sont utilisés pour des périodes de temps distinctes.

La composition des dépenses des familles de 1982 a servi au calcul de l'IPC à partir de janvier 1985 jusqu'à décembre 1988. En janvier 1989, les pondérations de 1982 ont été remplacées par d'autres dérivées de la composition des dépenses de 1986. Cette mise à jour poursuit la politique de Statistique Canada de mettre à jour les pondérations régulièrement à tous les quatre ans.

TEXT TABLE II. Comparison of 1982 and 1986 Expenditure Weights Used in the Consumer Price Index, by Major Component for Canada

TABLEAU EXPLICATIF II. Comparaison des pondérations des dépenses de 1982 et de 1986 utilisées pour l'indice des prix à la consommation, par composante principale pour le Canada

Major components	Weights 1982	Weights 1986
Composantes principales	Pondérations 1982	Pondérations 1986
All-items - Ensemble	100.00¹	100.00¹
Food - Aliments Housing - Habitation Clothing - Habillement Transportation - Transports Health and personal care - Santé et soins personnels Recreation, reading and education - Loisirs, lecture et formation Tobacco products and alcoholic beverages - Produits du tabac et boissons alcoolisées	20.02 38.14 8.37 15.75 4.02 8.25	18.05 36.32 8.69 18.29 4.20 8.84

Figures may not add up due to rounding

The weights shown in Text Table II represent expenditures in 1982 (1982 quantities valued in 1982 prices) and in 1986 (1986 quantities valued in 1986 prices). They cannot be used to reconstruct or reaggregate indexes on a 1981 = 100 time base. The methodology required to permit such a reaggregation can be obtained on request by contacting the:

Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (Telephone: (613) 951-9606).

The indexes based on 1986 weights were linked or connected in December 1988 to the appropriate indexes based on 1982 weights which had been in use since January 1985.

This linking procedure ensures that conceptually equivalent series are made continuous over time. It should be noted that the linking method is such that aggregate indexes cannot be considered as the direct average of their respective component indexes. In exceptional cases, this may cause the level, as well as the percentage changes, of an aggregate index to fall slightly outside the range of its component indexes.

Les pondérations du tableau explicatif II représentent les dépenses en 1982 (quantités et prix de 1982) et en 1986 (quantités et prix de 1986). Elles ne peuvent servir à reconstruire ni à réagréger des indices sur la base de 1981 = 100. La méthode à suivre pour une telle reconstruction peut être obtenue sur demande auprès de la:

Section des prix à la consommation Division des prix, Statistique Canada Ottawa (Ontario) K1A 0T6 (Téléphone: (613) 951-9606).

Les indices fondés sur les pondérations de 1986 ont été enchaînés ou raccordés en décembre 1988 aux indices correspondants fondés sur les pondérations de 1982, en usage depuis janvier 1985.

Grâce à cet enchaînement, des séries équivalentes sur le plan conceptuel sont continues dans le temps. On notera que cette méthode d'enchaînement ne permet pas de considérer les indices composés comme des moyennes directes de leur composante respective. Dans des cas exceptionnels, le niveau et les variations en pourcentage d'un indice agrégé peuvent ainsi dépasser légèrement l'étendue des indices composantes.

Les chiffres ayant été arrondis, les totaux peuvent ne pas correspondre.

Time Base

The All-items Consumer Price Index for Canada and each index city is expressed in terms of 1986 = 100, except for certain items, as noted, where the pricing survey was introduced subsequent to that year. The 1986 = 100 time base became effective with the release of the June 1990 index. The base period for the Consumer Price Index, as well as for other Statistics Canada index series, is revised periodically.

Rebasing the CPI is a straightforward arithmetic operation which does not change the picture of economic events. Percentage changes computed will be the same, except for small differences due to rounding, regardless of whether the 1981 = 100 or 1986 = 100 time base is used. Rebasing of the CPI does not involve changes in the base period expenditure weights. Furthermore, the method employed in converting to the 1986 = 100 time base does not affect the continuity or statistical comparability of the index series.

It should be noted, however, that although the percentage changes in an index series will be the same, except for small differences due to rounding, regardless of whether they are computed from the 1981 or 1986 time base series, the same is not true for changes measured in terms of index points.

Current Annual Rate of Change

A rate of change representative of an annual movement in prices may be derived in several ways, none of which is free of shortcomings and interpretational problems. Statistics Canada presently calculates three measures of annual change, the percentage change between any given month and the same month a year ago, the percentage change between annual averages based on a calendar year and the current annual rate of change.

The method selected for calculating the current seasonally adjusted annual rate of change in the CPI in Table 1 involves compounding the growth rate over the latest three-month period on the seasonally adjust ed level (see Appendix 3). For more information on CPI growth rates, see "A Note on the Current Annual Rate of Change of the Consumer Price Index", **Retail Prices and Living Costs** – Service Bulletin (Catalogue 62-005), Vol. 4, No. 4, April 1975.

Reconstructed Indexes

With the release of the January 1985 Consumer Price Index, certain series were reconstructed historically to reflect the introduction of the Consumer Classification System of Statistics Canada which was introduced with the 1982 Updating. A few additional reconstructions were made with the introduction of the 1986 basket. For further information, contact Prices Division (613-951-9606 or 951-3353).

Période de base

L'indice d'ensemble des prix à la consommation du Canada et les indices de chaque ville sont exprimés sur la base de 1986 = 100, sauf pour certains articles, qui sont signalés et dont l'enquête sur les prix n'a été introduite qu'après cette année là. La base temporelle de 1986 = 100 est devenue effective à partir de la diffusion de l'indice de juin 1990. La période de base pour l'indice des prix à la consommation, et pour d'autres séries d'indices de Statistique Canada, fait l'objet d'une révision periodiquement.

Pour recalculer la base de l'IPC, il suffit d'effectuer une opération arithmétique simple qui ne modifie pas le tableau des événements économiques. Les variations en pourcentage calculées sur la base 1981 = 100 et 1986 = 100 sont équivalentes, les petites différences étant attribuables à l'arrondissement. Le calcul de la nouvelle base de l'IPC ne change pas les pondérations des dépenses de la période de base. De plus, la méthode de conversion selon la base 1986 = 100 ne compromet pas la continuité ou la comparabilité statistique des séries d'indices.

Toutefois, même si les variations en pourcentage d'une série d'indices seront identiques, à quelques différences d'arrondissement près, quelle que soit la base (1981 ou 1986) utilisée pour les calculer, tel ne sera pas le cas de ses mouvements exprimés en points.

Taux de variation annuel courant

Plusieurs méthodes permettent de dériver un taux de variation pour représenter le mouvement annuel des prix, mais toutes comportent des points faibles et des problèmes d'interprétation. Statistique Canada calcule actuellement trois mesures de la variation annuelle, soit le changement en pourcentage pour un mois donné par rapport à un autre et au mois correspondant de l'année précédente, le changement en pourcentage entre des moyennes annuelles basées sur l'année civile et le taux de variation annuel courant.

La méthode retenue pour calculer le taux de variation annuel courant après désaisonnalisation de l'IPC au tableau 1 consiste à prendre un taux de croissance composé sur le niveau désaisonnalisé des trois derniers mois (voir appendice 3). Pour plus de renseignements sur le taux de croissance de l'IPC, se reporter à "Note sur le taux annuel courant de l'indice des prix à la consommation", **Prix de détail et coût de la vie** - Bulletin de service (n° 62-005 au catalogue), vol. 4, n° 4, avril 1975.

Indices reconstruits

À compter de l'émission de l'indice des prix à la consommation de janvier 1985, certaines séries historiques ont été reconstruites de façon à ce qu'elles représentent l'introduction du système de classification de la consommation de Statistique Canada qui fut introduit avec la mise à jour de 1982. L'adoption du panier de 1986 a amené quelques autres remaniements. Pour plus de renseignements, communiquez avec la Divison des prix (613-951-9606 ou 951-3353).

Whitehorse and Yellowknife

In keeping with its commitment to publish consumer price indexes for at least one urban centre in each province and territory, Statistics Canada, as part of the 1978 Updating, began to develop consumer price indexes for the urban centres of Whitehorse and Yellowknife. As no Family Expenditure Survey was conducted in these centres in 1978, 1972 expenditure patterns for these two centres were extrapolated to 1978 using the change in expenditure patterns between 1972 and 1978 in other urban centres. As the 1978 expenditure patterns were incorporated into the official CPI, commencing with the release of the April 1982 index, consumer price indexes for Whitehorse and Yellowknife were developed on a March 1982 = 100 time reference base. Since the expenditure patterns for Whitehorse and Yellowknife were derived and not directly observed, the indexes for these two urban centres were not included in the calculation of the official CPI for Canada. With the introduction of the 1982 Updating, these two centres were included in the calculation of the official CPI for Canada.

It was not possible, at this time, to develop an owned accommodation index for these two centres comparable to that in concept of the national CPI. The nature and the relatively small size of the housing market in these two centres is such that Statistics Canada was unable to construct reliable price indexes for new houses. It was decided that as an interim and only available alternative measure, the price movement of rental accommodation would be used to represent that of owned accommodation. As a consequence, the All-items indexes published for these centres are not comparable to those for Canada or for any of the sixteen urban centres for which a CPI is produced. The rent data used are collected on a quarterly basis by the respective territorial governments. For rents, the data are incorporated into the consumer price indexes for these two centres with a two-month lag.

Provincial CPI's

Consumer price indexes for provincial urban centres were published for the first time in the July-September 1988 issue of this publication. An article describing the coverage and method of these indexes was published in the same issue. Updated Provincial CPI's are now a permanent feature of this publication.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in **The Consumer Price Index**, **Reference Paper**, **Updating Based on 1986 Expenditures**, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in Family Expenditure in Canada, 1986, Catalogue 62-555.

Whitehorse et Yellowknife

Statistique Canada, conformément à son engagement de publier des indices des prix à la consommation pour au moins un centre urbain dans chaque province et territoire, a commencé à élaborer des indices de prix à la consommation pour les centres urbains de Whitehorse et Yellowknife dans le cadre de la mise à jour de 1978. Puisqu'il n'y a pas eu dans ces centres d'enquête sur les dépenses des familles en 1978, les données sur la composition des dépenses de 1972 pour ces deux villes ont été extrapolées pour l'année 1978 en se fondant sur l'évolution de la composition des dépenses entre 1972 et 1978 dans d'autres centres urbains. Étant donné que la composition des dépenses de 1978 a été incorporée dans l'IPC officiel à la consommation avec l'indice d'avril 1982, les indices des prix à la consommation pour Whitehorse et Yellowknife ont été élaborés sur la base mars 1982 = 100. La composition des dépenses pour Whitehorse et Yellowknife ayant été dérivée plutôt qu'observée directement, les indices pour ces deux centres urbains n'étaient pas compris dans le calcul de l'IPC officiel pour le Canada. Avec l'introduction de la mise à jour de 1982, ces deux centres ont été pris en compte lors du calcul de l'IPC officiel pour le Canada.

Il n'a pas été possible d'élaborer, pour ces deux centres, un indice du logement en propriété qui soit conceptuellement comparable à celui incorporé à l'IPC national. La nature et la petitesse relative du marché de l'habitation dans ces deux centres ont empêché Statistique Canada de construire des indices de prix fiables pour les maisons neuves. Comme c'est la seule mesure disponible, il a été décidé d'utiliser, pour le moment, le mouvement des prix du logement en location pour représenter celui du logement en propriété. En conséquence, les indices d'ensemble publiés pour ces centres ne sont pas comparables à ceux du Canada ou d'aucun des seize autres centres urbains pour lesquels un IPC est calculé. Les données sur les loyers utilisées sont recueillies trimestriellement par les deux administrations publiques territoriales. S'agissant des loyers, les données pour ces deux centres sont incorporées aux indices de prix à la consommation avec deux mois de retard.

IPC Provinciaux

Des indices de prix à la consommation pour les centres urbains provinciaux ont été publiés pour la première fois dans le numéro de juillet-septembre 1988 de la présente publication. Un article décrivant la couverture et la méthodologie de ces indices est paru dans ce même numéro. Les IPC provinciaux mis à jour sont devenus partie intégrante de la présente publication.

Renseignements supplémentaires et publications connexes

Le Document de référence de l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1986, (hors-série), n° 62-553 au catalogue, décrit en détail les méthodes et les concepts de l'IPC. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans Dépenses des familles au Canada, 1986, n° 62-555 au catalogue.

The latest information on the Consumer Price Index for Canada and 18 cities is also available in the **Consumer Price Index**, Catalogue 62-001 monthly. In addition, selected educational and promotional material are available. For these and further information contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606 or 613-951-3353).

De plus, les derniers renseignements sur l'indice des prix à la consommation du Canada et de 18 villes sont publiés dans le bulletin mensuel **L'indice des prix à la consommation**, n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606 ou 613-951-3353).

Appendix 2

THE PURCHASING POWER OF THE CONSUMER DOLLAR

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

Changes in the purchasing power of the consumer dollar, put simply, are inversely related to movements in the Consumer Price Index. For example, between 1986 and June 1990, consumer prices as measured by the CPI rose 19.2% such that, goods and services which could have been purchased for \$100.00 in 1986 would cost \$119.20 in June 1990. Each consumer dollar in June 1990 therefore buys less than in 1986. The extent to which the purchasing power of the dollar has declined is matched precisely by the increase in the consumer price index. Thus the purchasing power of a dollar in June 1990 compared to the 1986

dollar was 83.9 (100 cents X
$$\frac{100.0}{119.2}$$
 = 83.9 cents).

This process may be interpreted as the deflation of money, that is, adjusting values expressed in monetary terms in order to eliminate price effects.

Users of the tabulation which shows the purchasing power of the consumer dollar compared to the 1986 dollar at different points in time (Table 2) should note that, as in the case of the Consumer Price Index from which the numbers are derived, the data may not measure closely the experiences of any one specific family within the large urban group to which the CPI relates. At the same time changes in the purchasing power of the dollar are not expected to match the experience of other population groups whose expen diture behaviour is significantly different from those associated with the CPI target population. It should also be noted that like the CPI, changes in the purchasing power of the dollar are not directly affected by changes in income taxes, unemployment insurance premiums, other types of security payments and all other goods and services that are not included in the CPI basket.

Appendice 2

LE POUVOIR D'ACHAT DU DOLLAR DE CONSOMMATION

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie et la baisse des prix est liée à la hausse du pouvoir d'achat.

En somme, le pouvoir d'achat du dollar de consommation varie en relation inverse avec les mouvements de l'indice des prix à la consommation. Par exemple, entre 1986 et juin 1990, les prix à la consommation mesurés par l'IPC ont grimpé de 19.2% de sorte que les biens et services qu'on pouvait acheter en 1986 avec \$100.00 coûtaient \$119.20 en juin 1990. Chaque dollar de consommation en juin 1990 achète donc moins qu'en 1986. Le pouvoir d'achat du dollar a baissé exactement dans la même proportion que l'indice des prix à la consommation a augmenté. Par conséquent, le pouvoir d'achat d'un dollar en juin 1990, par rapport au dollar de 1986.

Ce processus peut être assimilé à la déflation de l'argent, c'est-à-dire à la correction des valeurs monétaires afin d'éliminer l'influence des prix.

Les utilisateurs des totalisations qui indiquent le pouvoir d'achat du dollar de consommation à différentes périodes par rapport à 1986 (tableau 2) doivent noter que ces chiffres sont tirés de l'indice des prix à la consommation et qu'ils peuvent, tout comme ce dernier, ne pas mesurer fidèlement la situation particulière d'une famille faisant partie du grand groupe urbain auguel se rapporte l'IPC. Par ailleurs, les variations du pouvoir d'achat du dollar ne reflètent pas les changements touchant les autres groupes de population dont les habitudes de dépenses diffèrent sensiblement de celles du groupe cible pour l'IPC. Il faut également noter que, tout comme l'IPC, les variations du pouvoir d'achat du dollar ne sont pas touchées directement par les changements de l'impôt sur le revenu, des primes d'assurance-chômage, d'autres paiements de sécurité sociale et des prix de tous les autres biens et services ne faisant pas partie du panier de l'IPC.

Appendix 3

SEASONAL ADJUSTMENT OF THE CONSUMER PRICE INDEX

Economic time series, measuring changes through time in economic activities, reflect the combined effects of the underlying seasonal, cyclical, trend and irregular factors which influence them. Such series can be decomposed into distinct movements representing the separate effects of the seasonal, cyclical and trend factors and a residual movement representing factors causing irregular non-repetitive movements.

Seasonal fluctuations in a series are those that can be identified with a particular season or time of year. These fluctuations tend to occur at about the same time each year with roughly the same magnitude and are the composite result of climatic influences and social and commercial customs (e.g., harvests, end of season sales).

Cyclical movements consist of sequences of change over periods longer than a year, during which the series rises to a peak and then falls back, subsequently to rise again. For many series this type of movement is associated with expansion and contraction of the economy over the "business cycle".

The trend is a steady underlying movement which reflects continuing or slowly changing economic forces.

Finally, the fluctuations that remain unaccounted for by the seasonal, cyclical and trend movements of a series are termed irregular. The factors causing irregular movements in a series are of a non-repetitive, ad-hoc nature. The irregular component tends to have a stable random appearance, but may include some extreme movements having identifiable causes (e.g., strikes or severe weather). They therefore can be distinguished from the much smaller random irregular variations.

Appendice 3

LA DÉSAISONNALISATION DE L'INDICE DES PRIX À LA CONSOMMATION

Les séries chronologiques économiques mesurent l'évolution dans le temps de l'activitié économique. Ces séries reflètent les effets combinés de la saisonnalité, du cycle, de la tendance générale et d'autres facteurs accidentels qui leur sont propres et qui agissent sur elles. Il est possible de décomposer de telles séries ou mouvements distincts représentant séparément les effets de tel ou tel facteur (saisonnalité, cycle, tendance) et en un mouvement résiduel représentant les facteurs de mouvements accidentels (non répétitifs).

Les fluctuations saisonnières d'une série sont celles que l'on peut relier à une saison ou une période donnée de l'année; elles ont tendance à se produire généralement à peu près à la même époque de l'année et avec la même ampleur. Elles sont le résultat à la fois de conditions climatiques et d'habitudes sociales et commerciales (telle les récoltes, les ventes de fin de saison).

Les mouvements cycliques se définissent comme une suite de variations sur des périodes supérieures à un an, au cours desquelles la série atteint un sommet, descend puis remonte à nouveau. Ce type de mouvement est associé, pour de nombreuses séries, à l'expansion et à la récession économique au cours du "cycle économique".

La tendance générale est un mouvement fondamental stable qui reflète la continuité ou un changement lent de l'économie.

Enfin, les fluctuations qui ne se classent ni dans la saisonnalité, ni dans le cycle, ni dans la tendance générale sont désignées comme mouvements accidentels. Les facteurs expliquant ce type de mouvement dans une série sont de nature spéciale et non répétitive. L'élément accidentel tend à présenter une apparence aléatoire stable mais il peut comprendre certains mouvements extrêmes, dont on peut identifier les causes (comme des grèves ou de fortes intempéries). Ils peuvent donc être distingués des variations irrégulières aléatoires beaucoup moins prononcées.

The methodologies used for removing as much of the seasonal fluctuation as possible from a series have been described in detail in numerous articles and texts on the subject. Rather than reiterating those texts, an outline of the methodologies employed in the derivation of seasonally adjusted consumer price indexes for Canada is provided below.

With the introduction of the 1982 basket, the seasonal adjustment methodology was changed. Direct seasonal adjustment is performed at the level of the seven major components with the seasonally adjusted All-items and All-items excluding Food indexes being the weighted average of their components. This indirect seasonal adjustment of the two aggregate series ensures (except for possible rounding differences) that the aggregate movements will be within the range of their components' movements. Since each basket has its own weights, the move to indirect seasonal adjustment of the aggregates dictated the use of unlinked series as the basis for the seasonal adjustment. Estimating a separate seasonal pattern for each basket has some conceptual advantages since it means that the classification and weight changes introduced with each updating of the basket will not distort the estimates. However, there is an operational difficulty which arises due to the desirability of having at least seven years of data for estimation of the seasonal pattern and the current rapidity with which CPI baskets are updated. Given the current updating cycle, at the time a new basket is introduced, we have only three years of data for the new basket. To create a longer time series, we chain on data from the previous basket back to it's beginning. This reintroduces some of the distortions present in estimating seasonal patterns from linked data.

The above distortion will be minimized through the use of concurrent seasonal adjustment rather than forecast seasonal factors. With the concurrent methodology, the seasonal pattern is estimated each month using all available data. However, to minimize revisions we will revise past indexes only at the end of each calendar year.

Les méthodes utilisées pour éliminer le plus possible de saisonnalité d'une série ont fait l'objet de descriptions détaillées dans de nombreux articles et ouvrages sur la question¹. Au lieu d'en reprendre ici le contenu, nous présentons ci-dessous les grandes lignes des méthodes utilisées pour dériver les indices des prix à la consommation désaisonnalisés pour le Canada.

Avec l'introduction du panier 1982, la méthode de désaisonnalisation fût changée. La désaisonnalisation directe est effectuée à l'échelle des sept composantes principales; les versions désaisonnalisées de l'indice des aliments et de l'indice d'ensemble sans les aliments correspondent à la pondérée de leurs composantes. désaisonnalisation indirecte des deux séries agrégées garantit que les mouvements agrégés se situeront dans les limites des mouvements de leurs composantes (exception faite des différences attribuables à l'arrondissement). Puisque chaque panier a ses propres coefficients de pondération, le passage à la méthode indirecte de désaisonnalisation des séries agrégées a entraîné l'utilisation, à titre de base de la désaisonnalisation, des séries non enchaînées. L'estimation de tendances saisonnières distinctes pour chacun des paniers représente certains avantages au point de vue conceptuel, puisqu'elle signifie que les changements apportés à la classification et aux coefficients de pondération au moment de la mise à jour du panier n'entraîneront aucune distortion. Toutefois, une difficulté opérationnelle existe étant donné, d'une part, qu'il est souhaitable d'avoir au moins sept années de données pour estimer la tendance saisonnière et, d'autre part, en raison de la rapidité avec laquelle on met maintenant à jour le panier de l'IPC. étant donné le cycle courant de mise-à-jour, nous n'avons que trois ans de données pour un nouveau panier lorsque celui-ci est introduit. Afin de créer une série plus longue, nous enchaînons les données du nouveau panier à celles du panier précédent jusqu'à son début. Cette mesure ramène certaines distorsions que l'on retrouvait dans l'estimation des tendances saisonnières des données enchaînées.

Ces distortions seront toutefois minimisées par l'utilisation de désaisonnalisations concomitantes plutôt que de coefficients saisonniers projetés. Dans la méthodologie concomitante, la tendance saisonnière est estimée chaque mois au moyen de toutes les données accessibles. Nous ne recalculerons toutefois les indices antérieurs qu'à la fin de chaque année civile, et ce pour réduire au minimum le nombre de révisions.

Appendix 4

CITY AVERAGE RETAIL PRICES

Introduction

The Average Retail Price Survey is under taken to produce an accurate measure of average prices at one point in time which will permit comparison between cities. In order not to generate artificial price differentials it is essential that the qualities, brands and sizes selected are sufficiently similar. Prices of approximately 60 items, consisting mainly of food and some personal care items and household supply items are collected in representative outlets in 26 cities. These cities are: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Winnipeg, Regina, Saskatoon, Edmonton, Vancouver, Victoria and Whitehorse. This survey is normally under taken during the first week of January, April, July and October.

In order that the average prices generated for one city will be comparable with those for another city, price collection is generally limited to widely available manufacturers' brands. For meat and produce, care is taken to narrowly define cuts and qualities. The goods and services tax (GST) and the provincial retail sales tax are included in the retail averages where applicable.

Calculation Methodology

City Prices. Prices are collected in both chain and independent stores. (A chain stores organization is defined as one operating four or more stores under the same legal ownership.) A city average price is calculated for each item by weighting the average prices obtained for chain and independent stores according to their overall market sales share in that city. For branded items sold under brand labels, an average price for each brand is first calculated in the manner described above; the brand averages are then weighted together to form the item average. The weight assigned each brand in this process is proportionate to the number of price quotes obtained for each of the brands in that city.

Appendice 4

PRIX DE DÉTAIL MOYENS PAR VILLE

Introduction

L'enquête sur les prix moyens de détail est effectuée afin d'obtenir une mesure adéquate des prix moyens, à une période donnée, qui permette une comparaison entre les villes. Il est essentiel que les qualités, les marques et les tailles choisies soient suffisamment équivalentes afin de ne pas introduire des différences de prix artificielles. Les prix de quelques 60 articles, principalement des produits alimentaires, certains articles de soins personnels et des fournitures de ménage, sont relevés dans de nombreux points de vente dans 26 villes: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria et Whitehorse. Cette enquête est normalement effectuée durant la première semaine de janvier, d'avril, de juillet et d'octobre.

Afin que les prix moyens calculés pour une ville puissent être comparables à ceux d'une autre ville, l'observation des prix se limite généralement aux marques des fabricants largement distribuées. Dans le cas de la viande, des fruits et des légumes, on prend soin de définir avec précision les morceaux et les qualités. La taxe sur les produits et services (TPS) et la taxe de vente au détail sont ajoutées au prix de détail moyen s'il y a lieu.

Méthode de calcul

Prix urbains. Les prix sont recueillis dans les magasins à succursales multiples et les magasins indépendants. (Une entreprise à succursales multiples est définie comme celle qui exploite quatre magasins ou plus sous la même raison sociale.) On calcule un prix moyen par ville pour chaque article en pondérant les prix moyens recueillis dans les magasins à succursales multiples et dans les magasins indépendants selon la part de leurs ventes sur le marché général dans leur ville. Dans le cas ces articles vendus sous marque déposée, on calcule d'abord un prix moyen pour chaque marque déposée de la façon décrite plus haut: ensuite on pondère ensemble les moyennes des marques déposées afin d'en arriver à la moyenne pour l'article. Le poids assigné à chaque marque déposée lors de ce processus est proportionnel au nombre de prix observés dans la ville en guestion pour cette marque déposée.

Weighted city averages. A weighted city average price for each item is derived by weighting the relevant city averages. The importance of each city in calculating the weighted city average is determined by the volume of retail sales in that city.

Item Specifications

A description of the approximately 60 items covered in the Average Prices Survey can be acquired by contacting Prices Division.

Average Retail Prices for Gasoline

Tables 16 through 19 present average retail prices for two types of gasoline retailed in two types of filling stations. The information is collected on a monthly basis as part of the Consumer Price Index survey. Gasoline prices are collected at the pump from a sample of full service and self-serve filling stations in major urban centres across Canada. The prices collected included all applicable Federal and Provincial taxes. They are presented as average prices per litre of gasoline. The series presented in these tables are confined to the 16 urban centres for which Consumer Price Indexes are produced and cover the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to January 1979, are, however, based on the average prices per imperial gallon.

Average Retail Prices for Fuel Oil

Table 20 presents average retail prices for fuel oil. The information is collected nine times yearly as part of the Consumer Price Index Survey. Fuel oil prices are collected from a sample of distributors in major urban centres across Canada. The prices collected include all applicable Federal and Provincial taxes. They are presented as average prices per litre. The series presented in Table 20 are confined to 16 urban centres and for the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to October 1980 are, however, based on the average prices per imperial gallon.

Moyennes pondérées des villes. Une moyenne pondérée du prix de chaque article pour l'ensemble des villes est calculée en pondérant les moyennes appropriées des villes. L'importance de chaque ville dans le calcul de la moyenne pondérée des villes est déterminée par le volume des ventes au détail dans cette ville.

Spécification des articles

Une description des quelques 60 articles contenus dans l'enquête des prix moyens peut être obtenu en communiquant avec la Division des prix.

Prix de détail moyens de l'essence

Les tableaux 16 à 19 présentent les prix de détail moyens de deux types d'essence vendus dans deux genres de stations. Cette information est relevée à chaque mois dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix de l'essence sont relevés, sur place, auprès d'un échantillon de stations offrant un service complet et de stations libre service dans les principaux centres urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ces tableaux sont ceux d'un litre d'essence. Les séries présentées se limitent aux 16 centres urbains pour lesquels on produit un IPC pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant janvier 1979 sont, toutefois, sur la base d'un gallon impérial.

Prix de détail moyens du mazout

Le tableau 20 présente les prix de détail moyens du mazout. Cette information est relevée neuf fois par année dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix du mazout sont relevés auprès d'un échantillon de distributeurs dans les principaux centre urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ce tableau sont ceux d'un litre. Les séries présentées au tableau 20 se limitent à 16 centres urbains, pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant octobre 1980 sont, toutefois, sur la base d'un gallon impérial.

Appendix 5

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section. Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to

Appendice 5

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger: en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking an other complete survey.

parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 7 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

Principal commodity group Number of items priced (if available) 104 Food at home Meals away from home 9 Household maintenance and 11 services Household supplies 8 Communications 3 Domestic help (depending on 2-8 Clothing and home furnishings 22 Transportation and automobile 22 operation 25 Health and personal care Reading and recreation 13 Tobacco and alcohol 12

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 7 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

PICK A TOPIC ... ANY TOPIC

The 1993 Statistics Canada Catalogue is your guide to the most complete collection of facts and figures

you in the right direction.

From the most popular topics of the day – like employment, income, trade, and education – to specific research studies – like mineral products shipped from Canadian ports and criminal victimization in urban areas – you'll find it all

... the 1993
Statistics
Canada Catalogue
will help you get your
bearings ...

The Catalogue puts all this information at your fingertips. With the expanded index, you can search by subject, author or title – even periodical articles are indexed.

There's also a separate index for all our electronic products.

The *Catalogue* has everything you need to access all Statistics Canada's products:

- descriptions of over 200 new titles, plus succinct abstracts of the over 900 titles and 7 map series already produced;
- newly released 1991 Census products;
- a complete guide to finding and using statistics;
- electronic products in a variety of media, and advice on getting expert assistance on electronic products and on-line searches;
- tabs to each section so you can immediately flip to the information you need.

... time and time again

To make sure that the *Catalogue* stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today - you'll be lost without it.

CHOISISSEZ UN SUJET ... N'IMPORTE LEQUEL

Le Catalogue de Statistique

Canada 1993 est votre guide
pour la collection la plus
complète de faits et de chiffres
dans les domaines, en constante
évolution, du commerce, de la
société et de l'économie du Canada.
Peu importe ce que vous voulez
savoir, le Catalogue
vous mettra sur la
bonne piste.

Des sujets

actuels les plus populaires

- comme l'emploi, le revenu, le commerce et l'éducation - à des études de recherche spécialisées
- comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines - vous trouverez tout dans ce document.

... le Catalogue de Statistique Canada 1993 vous aidera à vous orienter ...

Le *Catalogue* vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre – les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le *Catalogue* a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

- descriptions de plus de 200 nouveaux titres et courts résumés des 900 titres et plus et des 7 séries de cartes déjà disponibles;
- produits du Recensement de 1991 récemment publié;
- un guide complet pour obtenir et utiliser les données statistiques;
- produits électroniques sur supports divers et conseils sur l'obtention d'aide d'experts pour les produits électroniques et les recherches en direct:
- système d'onglets pour chaque section – pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

... maintes et maintes fois

Pour garantir que le Catalogue puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abimés et les coins de page pliés.

Commandez aujourd'hui – vous ne pourrez plus vous passer de lui.

MERCI DE VOTRE COMMANDE!

Statistique Canada Statistics Canada Canadä

Find out the inside story on 20% of the labour force

ncovering the latest labour changes in the public sector can be tough. But now there's a publication to help.

Public Sector Employment and Remuneration 1991/92, (With Historical Data from 1987) gives you reliable data, consistent comparisons, and concise analysis on the changing levels of public sector employment.

This publication brings you all the facts! Public Sector

Employment and Remuneration 1991/92

provides you with the most up-to-date

public sector employment

statistics, including for the

first time, FULL

COVERAGE OF THE

PUBLIC SECTOR and

new CENSUS
METROPOLITAN AREA

DATA for federal and local governments.

This valuable working tool will help you to:

- Chart changes in public sector employment: nationally, provincially and locally.
- Make direct comparisons between employment levels: federal, provincial, inter-provincial, and municipal.

Don't miss this opportunity to get the information you need to understand where we are and make informed decisions about public sector employment strategies for the '90s.

Order your copy of **Public Sector Employment and Remuneration** today!

Each copy of *Public Sector Employment and Remuneration* (Catalogue no. 72-209) costs only \$39 in Canada (plus GST), US\$47 in the United States and US\$55 in other countries.

To order, write to **Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6**, or contact the nearest Statistics Canada Regional Office listed in this publication.

For faster ordering, call toll-free 1-800-267-6677 and use your VISA or MasterCard. Or fax your order to (613) 951-1584.

Découvrez les faits réels qui touchent 20 % de la population active

l est parfois difficile de se tenir informé des derniers développements survenus dans le dossier de l'emploi. Heureusement, il existe maintenant une nouvelle publication pour combler cette lacune.

Emploi et rémunération dans le secteur public en 1991-1992, (Avec les données historiques de 1987) fournit des données fiables, des comparaisons pertinentes et des analyses concises sur l'évolution du niveau d'emploi dans le secteur public.

Cette publication est une source de données factuelles.

Emploi et rémunération dans le secteur public en
1991-1992 vous offre les statistiques les plus récentes sur l'emploi dans le secteur public et, pour la première fois,
UNE COUVERTURE COMPLÈTE DU SECTEUR PUBLIC et les nouvelles DONNÉES SUR LES RÉGIONS
MÉTROPOLITAINES DE RECENSEMENT pour les administrations fédérale et locales.

Cet ouvrage de référence inestimable vous aidera à :

■ représenter graphiquement l'emploi total dans le secteur public, à l'échelle nationale, provinciale et locale;

établir des comparaisons directes entre les niveaux d'emploi dans les administrations fédérale, provinciales, interprovinciales et municipales.

Ne ratez pas l'occasion d'en savoir davantage sur la situation actuelle de l'emploi afin de pouvoir prendre des décisions éclairées sur les stratégies d'emploi à adopter pour le secteur public dans les années 1990.

Commandez dès aujourd'hui votre exemplaire d'Emploi et rémunération dans le secteur public.

Emploi et rémunération dans le secteur public en 1991-1992 (nº 72-209 au Catalogue) est vendu seulement 39 \$ l'exemplaire au Canada (TPS en sus), 47 \$ US aux États-Unis et 55 \$ US dans les autres pays.

Pour commander, écrivez à : **Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6** ou communiquez avec le bureau régional de Statistique Canada le plus proche (la liste figure dans la présente publication).

Pour un service plus rapide, composez sans frais le **1-800-267-6677** et faites débiter votre carte VISA ou MasterCard. Il est aussi possible de passer votre commande par télécopieur au **(613) 951-1584**.

UN PORTRAIT DU CANADA

POUR CÉLÉBRER LA GRANDEUR DE NOTRE PAYS

Canada challenges the imagination. Imagine a country where Newfoundlanders live closer to Africans than they do to fellow Canadians in British Columbia. Or a country with an island that has a glacier bigger than Ireland. Imagine a country with two million lakes, and the world's longest coastline – but that shares a border with only one nation.

Statistics Canada has created the 54th edition of Canada: A Portrait as a celebration of our great

nation. Drawn from Statistics Canada's rich palette of national data, it paints a picture of where we are socially, economically, culturally and politically.

Over 60 unique and beautiful photographs combined with lively text, provide a close-up look at the Canada of today.

Experience this land's remarkable natural regions and diverse human landscape through six chapters entitled: This Land, The People, The Society, Arts and Leisure, The Economy, and Canada in the World.

Eminent Canadians such as astronaut Roberta Bondar, former hockey star Jean Béliveau, and writer W.O. Mitchell have contributed their personal visions of Canada.

Canada: A **Portrait** is a beautiful illustration of the Canada of today.

Presented in a 30 cm X 23 cm (12 1/4" X 9") format, prestige hardcover, with over 200 pages, **Canada:** A **Portrait** (Catalogue No. 11-403E) is available in Canada for \$38.00 plus GST, US \$41.95 in the United States, and US \$48.95 in other countries.

To order write Statistics Canada, Publications Sales, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. For faster ordering call toll-free 1-800-267-6677 and use your VISA and MasterCard or fax your order to (613) 951-1584.

Le Canada est un pays qui défie l'imagination. Imaginez un pays où les Terre-Neuviens vivent plus près des Africains que de leurs compatriotes de la Colombie-Britannique. Un pays où se trouve une île sur laquelle s'étend un glacier plus grand que l'Irlande. Imaginez un pays qui compte 2 millions de lacs et le plus long littoral du monde, et pourtant un seul voisin.

Statistique Canada a créé la 54^e édition d'**Un portrait du Canada** pour célébrer la grandeur de

notre pays. C'est à partir du riche éventail de données nationales de Statistique Canada que l'on a brossé ce

Canada que l'on a brosse ce tableau de notre situation sociale, économique, culturelle et politique.

Plus de 60 magnifiques photos, mariées à un texte vivant, offrent une vision claire et détaillée de ce qu'est le Canada d'aujourd'hui.

Découvrez les splendides régions naturelles de ce pays, de même que son paysage humain des plus diversifiés, à travers six chapitres intitulés :

Le territoire, La population, La société, Les arts et les loisirs, L'économie et Le Canada dans le monde.

D'éminents Canadiens, tels Roberta Bondar, astronaute, Jean Béliveau, ancienne vedette de hockey, et W.O. Mitchell, écrivain, y font part de leur vision personnelle du Canada.

Un portrait du Canada... un magnifique ouvrage de collection qui décrit admirablement bien le Canada d'aujourd'hui.

Présenté dans un format de 30 cm sur 23 cm (12,25 po X 9 po), dans une couverture rigide de luxe et en plus de 200 pages, *Un portrait du Canada* (N° 11-403F au catalogue) coûte 38 \$ plus TPS au Canada, 41,95 \$ US aux États-Unis et 48,95 \$ US dans les autres pays.

Pour commander, écrivez à **Statistique Canada**, **Vente des publications**, **Ottawa (Ontario)**, **K1A 076** ou communiquez avec le Centre régional de consultation de Statistique Canada le plus proche. La liste figure dans la publication. Pour commander plus rapidement, composez sans frais le **1-800-267-6677** et utilisez votre carte VISA ou MasterCard ou télécopiez votre commande au **(613) 951-1584**.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct on-line access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should he directed to:

Information and Current Analysis Unit, Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9606) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

Most of the data published in this publication is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. The Databank identification numbers, by which data may be retrieved from CANSIM, are given in the headings of the relevant series in Tables in the publication. For further information on CANSIM call (613) 951-8200 or write to Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

This publication was prepared under the direction of:

- Louis Marc Ducharme, Assistant Director, Prices Division
- François Bordé, Chief, Consumer Prices Section
- Harold Harnarine, Head, Information and Current Analysis Unit

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- ' nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans cette publication peuvent être obtenues sous forme lisible par machine de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Les numéros d'identification de la Databank qui servent à retrouver les données de CANSIM sont inscrits à l'en-tête des séries respectives de la publication. Pour plus d'information sur CANSIM, composer le (613) 951-8200 ou écrire à la Division du marketing, Statistique Canada, Immeuble R.H. Coats Building, Ottawa, K1A 0T6.

Cette publication a été rédigée sous la direction de:

- Louis Marc Ducharme, Directeur adjoint, Division des prix-
- François Bordé, Chef, Section des prix à la consommation
- Harold Harnarine, Chef, Sous-section de l'information et de l'analyse courante

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

HIGHLIGHTS

Consumer Price Behaviour

Third quarter, 1993

Trends in the All-items Index

The Canada level All-items Consumer Price Index (CPI) rose 0.4% before seasonal adjustment in the third quarter (June to September) 1993, following a 0.2% increase for the previous three month period. The third quarter rate of change is slightly higher than that of 1992 when the index advanced 0.2%. The three month compound annual rate of change for the third quarter was 1.5%, as compared to 0.6% for the same period in 1992.

For the months comprising the third quarter, the CPI increased 0.2% in July, and 0.1% in both August and September. Slight but progressive increases were recorded for the corresponding 12-month intervals: in July, the CPI level of 130.5 (1986 = 100) was 1.6% higher than 1992; in August the CPI level of 130.6 was 1.7% higher; and in September the level of 130.7 was 1.9% higher.

On a seasonally adjusted basis, the All-items CPI edged up 0.1% in July and 0.2% in August. The September change of 0.4%, was the largest single month-to-month increase since June 1991. The current annual rate of change for the CPI All-items remained unchanged in July for the second time this year. By contrast, the August and September indexes registered sharp increases of 1.2% and 2.5%, respectively.

Major Components and Special Aggregates (not seasonally adjusted)

Price increases were recorded for six of the seven major components in the third quarter while one showed a decline. The most significant upward pressure came from the Transportation index which turned up 1.1%. This was largely the result of higher rates for private and public vehicle insurance (5.7%); however, this was offset, in part, by a decline in the gasoline index. The second major contributor to the overall increase in prices was the Housing index which edged up 0.5%, reflecting important increases in the costs of traveller accommodations, and household furnishings; partially offsetting these movements was a deceleration in mortgage interest costs. An increase of 1.1% in the Recreation, Education index, and consequence of increased tuition fees in September, also impacted somewhat on the movement of the CPI. Additional upward influences, although to a lesser degree, were noted for the Clothing (0.3%), Health and Personal Care (0.4%), and the Tobacco and Alcoholic Beverages (0.8%)Products components.

FAITS SAILLANTS

Comportement des prix à la consommation

Troisième trimestre de 1993

Tendances de l'indice d'ensemble

Sans correction des variations saisonnières, l'indice d'ensemble des prix à la consommation (IPC) pour le Canada a avancé de 0,4% au troisième trimestre de 1993 (de juin à septembre), après une augmentation de 0,2% au trimestre précédent. Le taux de variation au troisième trimestre de 1993 est légèrement supérieur à la hausse de 0,2% observée au troisième trimestre de 1992. Le taux de variation annuelle composé pour le troisième trimestre a été de 1,5%, comparativement à 0,6% pour la même période en 1992.

Pour les mois composant le troisième trimestre, l'IPC s'est accru de 0,2% en juillet et de 0,1% en août et en septembre. Des hausses légères mais progressives ont été enregistrées pour les intervalles de 12 mois correspondants: en juillet, à 130,5 (1986 = 100), le niveau de l'IPC représentait une progression de 1,6% par rapport à 1992; en août, à 130,6, il représentait une progression de 1,7%; et, en septembre, à 130,7, il représentait une progression de 1,9%.

En terme désaisonnalisé, l'indice d'ensemble des prix à la consommation a augmenté de 0,1% en juillet et de 0,2% en août. Le taux de variation de 0,4% observé en septembre était la hausse mensuelle la plus importante depuis juin 1991. Le taux annuel de variation de l'indice d'ensemble est demeuré inchangé en juillet pour la deuxième fois cette année. Par contre, en août et en septembre, on a enregistré de fortes progressions, soit 1,2% et 2,5% respectivement.

Principales composantes et agrégats spéciaux (non désaisonnalisés)

Six des sept principales composantes ont affiché des hausses au troisième trimestre, tandis que l'autre a affiché une baisse. C'est l'indice des transports qui a exercé les plus fortes pressions à la hausse sur l'indice d'ensemble, avec une augmentation de 1,1% attribuable en grande partie à une progression des primes d'assurance-automobile (5,7%) dans le cadre des régimes publics et privés; toutefois, cette progression a été compensée dans une certaine mesure par une baisse de l'indice de l'essence. En deuxième lieu, le mouvement à la hausse de l'indice d'ensemble a été influencé par une augmentation de 0,5% de l'indice de l'habitation, augmentation due à des hausses importantes des frais d'hébergement des voyageurs et du prix des articles d'ameublement; ces augmentations ont été compensées en partie par un abaissement des frais hypothécaires. Une progression de 1,1% de l'indice des loisirs, de la lecture et de la formation, principalement attribuable augmentation des frais de scolarité en septembre, a également eu un impact sur l'indice d'ensemble. On a observé d'autres pressions à la hausse, quoique dans une plus faible mesure, venant de l'indice de l'habillement (0,3%), de celui de la santé et des soins personnels (0,4%) et de celui du tabac et des boissons alcoolisées (0,8%).

After rising 0.8% in the second quarter, the index for food declined 1.0% in the third quarter. The Food and Non-alcoholic Beverages Purchased from Stores index declined 1.4%, as a result of a sharp downturn in the prices for fresh vegetables (-27.5%), most notably tomatoes and onions. A 0.8% decline in the Bakery Products index also contributed to the overall decline in the average price of food purchased from stores. The Food and Non-alcoholic Beverages Purchased from Restaurant index increased 0.1% during the third quarter.

The 0.2% decline in the Goods index in the third quarter was mainly due to a downward movement in the prices for non-durable goods (-0.5%). This was largely offset by increases in the indexes for durable goods (0.7%) and semi-durable goods (0.1%). The Services index registered a significant increase of 1.0% during the third quarter.

The All-items excluding Food and Energy index moved up 0.8% in the third quarter, a significant difference from that recorded for the All-items index (0.4%). The combined Food and Energy index dropped 0.9%, while the Energy index alone moved down 0.7%.

Canada-Other Country Comparisons

Compared with the United States, the monthly percentage change in the All-items CPI prior to seasonal adjustment for Canada was smaller for two of the three months comprising the third quarter in 1993. For July the Canada CPI grew 0.2% against 0.0% for the United States; in August and September the Canadian rate was 0.1% as opposed to 0.3% and 0.2%, respectively, for the United States. The corresponding months annual rate of price change for Canada were much smaller in the third quarter than for the United States, a trend which has held steady since January 1992. While the Canadian annual rate moved progressively from 1.6% to 1.9% from July to September, the United States rate has remained fairly stable at around 2.8%.

Only Denmark and the United Kingdom had consistently lower annual rates of price change than Canada throughout the third quarter. The CPI for Denmark remained constant at 1.2% from July to September, while that of the United Kingdom advanced from 1.4% to 1.8% during that period. Germany, Italy, and Sweden all registered annual increases in their CPI's which were at or above 4.0%.

Average Retail Prices of Fuel Oil

No major changes in the average retail price of fuel oil were reported for any of the selected cities during the third quarter. The average price remained highest in Winnipeg where fuel oil was, on average, 42.6 cents per liter from July to September. The lowest prices were found in Regina, where the average price per liter increased marginally from 35.8 cents to 36.2 cents, and in Charlottetown/Summerside where the average price has remained steady at 36.0 cents.

Après une progression de 0,8% au deuxième trimestre, l'indice des aliments a diminué de 1,0% au troisième trimestre. L'indice des aliments et boissons non alcoolisées achetés au magasin a régressé de 1,4% par suite d'une baisse marquée des prix des légumes frais (-27,5%), particulièrement des tomates et des oignons. Une diminution de 0,8% de l'indice des produits de boulangerie a également contribué à la baisse globale du prix moyen des aliments achetés au magasin. L'indice des aliments et boissons non alcoolisées achetés au restaurant a avancé de 0,1% durant le troisième trimestre.

La diminution de 0,2% de l'indice des biens au troisième trimestre est attribuable surtout à un mouvement à la baisse des prix des biens non durables (-0.5%), qui a toutefois été compensé en grande partie par des hausses des indices des biens durables (0,7%) et des biens semi-durables (0,1%). L'indice des services a enregistré une hausse importante de 1,0% durant le troisième trimestre.

Si on ne tient pas compte de la composante des aliments et de celle de l'énergie, l'IPC a progressé de 0,8% au troisième trimestre, ce qui marque une différence considérable par rapport à la hausse de 0,4% de l'indice d'ensemble. Les indices des aliments et de l'énergie ont affiché ensemble une baisse de 0,9%, tandis que l'indice de l'énergie à lui seul a régressé de 0,7%.

Comparaisons entre le Canada et les autres pays

Comparativement aux États-Unis, le taux de variation mensuelle de l'indice d'ensemble sans correction des variations saisonnières pour le Canada était plus faible pour deux des trois mois composant le troisième trimestre de 1993. En juillet, l'IPC s'est accru de 0,2% au Canada, comparativement à 0,0% aux États-Unis; en août et en septembre, il a augmenté de 0,1% au Canada, comparativement à 0,3% et 0,2% respectivement aux États-Unis. Au troisième trimestre, le taux de variation annuelle pour les mois correspondants a été beaucoup plus faible au Canada qu'aux États-Unis, tendance qui se maintient depuis janvier 1992. En effet, le taux de variation annuelle est passé progressivement de 1,6% à 1,9% de juillet à septembre, alors qu'il est resté relativement stable à environ 2,8% aux États-Unis.

Seuls le Danemark et le Royaume-Uni ont affiché des taux de variation annuelle moins élevé que le Canada tout au long du troisième trimestre. Au Danemark, l'IPC est demeuré stable à 1,2% de juillet à septembre, tandis qu'il est passé de 1,4% à 1,8% au Royaume-Uni durant cette période. L'Allemagne, l'Italie et la Suède ont toutes enregistré des hausses annuelles de 4,0% ou plus de leur IPC.

Prix de détail moyen du mazout

Durant le troisième trimestre, on n'a observé aucune variation importante du prix de détail moyen du mazout dans les villes choisies. Le prix moyen est resté le plus haut à Winnipeg, où le mazout s'est vendu en moyenne 42,6 cents le litre de juillet à septembre. Les prix les plus bas ont été enregistrés à Regina, où le prix moyen le litre a augmenté légèrement, passant de 35,8 cents à 36,2 cents, et à Charlottetown/ Summerside, où le prix moyen a resté stable à 36.0 cents le litre.

Inter-city Indexes of Retail Prices

Among the cities for which spatial indexes are compiled, Vancouver registered the highest for Food purchased from stores at 107 (City averages = 100). This follows from higher than average prices for Bakery and other cereal products. Toronto and Vancouver registered the highest level (104) for both the Household operation, furnishings, equipment and related services, and Transportation indexes. With an index level of 106, Ottawa had, by far, the highest public transportation costs. The Recreation, reading education index was highest (104) in Charlottetown/Summerside, Halifax, Saint John, and Regina. With a level of 116, St. John's had the highest Tobacco products and smokers' supplies index, as a result of higher than average prices for tobacco products in that city.

Indices de prix de détail entre les villes

Parmi les villes pour lesquelles des indices spatiaux sont compilés, Vancouver a enregistré le plus haut niveau pour les aliments achetés au magasin, 107 (moyenne = 100), après avoir affiché des prix plus élevés que la moyenne pour les produits de boulangerie et les autres produits céréaliers. Toronto et Vancouver ont enregistré le niveau le plus haut (104) à la fois pour l'indice du fonctionnement du ménage, de l'ameublement, de l'équipement et des services connexes et pour celui des transports. A 106, le niveau affiché par Ottawa pour le prix des transports en commun était de loin le plus élevé. En ce qui concerne l'indice des loisirs, de la lecture et de la formation, c'est à Charlottetown/Summerside, à Halifax, à Saint-Jean et à Regina qu'on a observé le niveau le plus haut (104). A 116, le niveau observé à St. John's pour l'indice des produits du tabac et des articles pour fumeurs était plus élevé que partout ailleurs parce que les produits du tabac coûtent plus cher en moyenne dans cette ville.

Introduction

This quarterly publication presents a compendium of consumer prices and price index related information of both a current and historical nature. It provides a wide range of timely and detailed statistical information and serves as a complement to the monthly publication, The Consumer Price Index, Catalogue 62-001.

Part I of this report presents a synopsis of current consumer price index movements. This is presented in the form of tabular and graphic information. Some tabular information on international prices is also presented, in particular for some Canada - U.S. comparisons.

Parts II and III provide a detailed historical summary of monthly consumer price indexes in recent years. This summary contains considerable disaggregated information, again in the perspective of both the urban Canada and the separate city contexts.

Part IV of this report contains tables for the All-items and seven major components for each province.

Place-to-place comparative retail price information forms Part V of the report. This segment presents the most recent data with regards to average city retail prices and inter-city indexes of retail price differentials. Special feature articles, which are periodically included in the publication, are presented in Part VI.

Appendices serve as sources of reference for the statistical data presented in the preceding segments of the report. Appendices 1 and 2 contain explanatory notes pertaining to consumer price index data; Appendix 3 provides reference material for seasonal adjustment methodology in the context of its application to the Consumer Price Index; Appendices 4, 5 and 6 present background information relating to place-to-place retail price comparisons.

Introduction

Cette publication présente un résumé de renseignements historiques et courants des prix à la consommation et des indices de prix. Elle fournit une gamme d'informations statistiques étendue, d'une façon détaillée, et sert de complément à la publication mensuelle, L'indice des prix à la consommation, n° 62-001 au catalogue.

La partie I de ce rapport contient un aperçu synoptique qui présente les mouvements courants des prix à la consommation. Ces informations sont présentées sous la forme de tableaux et de graphiques. Des tableaux comportant de l'information sur les prix internationaux sont également présentés, particulièrement en ce qui regarde certaines comparaisons entre le Canada et les É.-U.

Les parties II et III fournissent un résumé historique détaillé des indices mensuels des prix à la consommation des dernières années. Ce résumé contient des renseignements pour le Canada et les villes à un niveau beaucoup plus désagrégé.

La partie IV de ce rapport contient des tableaux pour l'ensemble et les sept composantes principales pour chaque province.

Des informations sur les prix de détail comparés d'un endroit à l'autre composent la partie V de ce rapport. Cette section fournit les plus récentes données au sujet des prix de détail moyens par ville et des indices comparatifs des prix de détail entre les villes. Les articles spéciaux, qui font périodiquement partie de cette publication, se retrouvent à la partie VI.

Les appendices servent de référence aux données statistique présentées dans les parties précédentes du rapport. Les appendices 1 et 2 contiennent les notes explicatives reliées aux données de l'indice des prix à la consommation; l'appendice 3 fait référence à la méthode des ajustements saisonniers dans son application à l'indice des prix à la consommation; les appendices 4, 5 et 6 fournissent des informations de base reliées aux comparaisons de prix d'un endroit à l'autre.

Seasonal adjustment of the Consumer Price Index for Canada is undertaken separately for each of the seven major components of the CPI with the calculation being made before linking or chaining takes place. The resulting seven major component indexes as well as the All-items and All-items excluding Food aggregates are then "linked" or "chained" to form continuous series starting from September 1978. The seasonally adjusted monthly data are published without further revision until the year end, when revisions to any months data may be made from January 1989 forward (the start of the 1986 basket). These revision are published with the January release.

La désaisonnalisation de l'indice des prix à la consommation pour le Canada est effectuée séparément pour chacune des sept composantes principale de l'IPC. Les calculs sont faits avant de procéder à l'enchaînement. Les indices des sept composantes principales, d'ensemble et d'ensemble sans les aliments ainsi obtenus sont ensuite "enchaînés" pour déterminer les séries continues à partir de septembre 1978. Les données désaisonnalisées mensuelles sont publiés sans autre révision jusqu'à la fin de l'année où une révision peut être effectuée pour tout mois à compter de janvier 1989 (le début du panier de 1986). Ces révisions sont émis avec la publication de janvier.

THE CONSUMER PRICE INDEX

The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is of an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time. Changes in the costs of this basket are therefore due only to "pure" price movements, i.e., price movements that are not associated with changes in the quality and/or quantity of the set of consumer goods and services in the basket.

The Consumer Price Index for each city measures price change from one time period to another within that specific city. Thus, while city CPI's show the **movement** of prices over time in each city, they do not indicate price level differences between cities or between cities and Canada. Such inter-city price comparisons for a selected number of items sold in grocery stores for 26 cities are available at present in Part V of this publication. Inter-spatial indexes covering approximately two thirds of the CPI basket for a selected number of cities are also available in this section.

Coverage

Beginning with the December 1988 to January 1989 price change, the weights used in the Consumer Price Index are those pertaining to 1986 expenditure patterns. Data used for establishing these patterns were obtained through the 1986 Family Expenditure Surveys. The expenditure data represents the expenditures of all private households (families and individuals) living in Canadian urban centres with a population of 30,000 or more. Population estimates for 1986 revealed 82 such urban centres. Largely due to limitations on the availability of detailed information on consumer expenditures it has become necessary to group the 82 urban centres into 34 urban centre strata. An urban centre stratum may be interpreted as a geographical unit around which the sampling framework of the CPI is constructed.

Separate CPI's are published for 18 of these centres which, together, accounted for approximately 75% of the total 1986 current consumption expenditures reported in the 82 centres. These 18 centres were, in part, selected in order to permit the publication of at least one CPI in each province. Some 300 commodities are priced in each of these 18 cities while in the remaining 64 urban centres, the number of commodities surveyed is fewer, with clothing and home furnishings being the notable exclusions.

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION

L'indice des prix à la consommation (IPC) mesure la variation dans le temps, exprimée en pourcentage, du coût à l'achat d'un "panier" constant de biens et de services, qui représente les achats faits par un groupe particulier de la population au cours d'une période donnée. Le "panier" renferme des biens et des services de quantité et de qualité invariables ou équivalentes et dont les prix sont mesurables au cours du temps. C'est ainsi que les variations de son coût résultent uniquement des mouvements "purs" de prix, c.-à-d. des mouvements de prix qui ne sont pas attribuables à des changements de qualité ou de quantité des biens et services de consommation du panier.

L'indice des prix à la consommation de chaque agglomération urbaine mesure les variations de prix entre deux périodes dans cette agglomération. Aussi les IPC des villes indiquent-ils le **mouvement** des prix dans le temps dans chaque agglomération, mais non les différences de niveau des prix entre les villes ou bien entre les villes et le Canada. De telles comparaisons entre les villes en ce qui concerne les niveaux de prix de certains articles vendus dans les épiceries sont présentées, pour 26 villes, à la Partie V de la présente publication. On y trouve également, pour certaines villes, des indices interspatiaux portant sur les deux tiers environ du panier de l'IPC.

Champ d'observation

À compter de janvier 1989, les pondérations utilisées pour l'indice des prix à la consommation se rapportent à la composition des dépenses de 1986. Les données qui ont servi à établir cette composition proviennent des enquêtes sur les dépenses des familles de 1986. Les données sur les dépenses représentent les dépenses de tous les ménages privés (familles et personnes seules) qui habitent les centres urbains du Canada qui comptent 30,000 habitants ou plus. D'après les estimations démographiques pour 1986, 82 centres urbains répondent à ce critère de population. En raison principalement du manque de renseignements détaillés sur les dépenses des consommateurs, il a été nécessaire de grouper les 82 centres urbains en 34 strates de centres urbains. Une strate de centres urbains peut se définir comme une unité géographique à partir de laquelle est constituée la base de sondage de l'IPC.

Des IPC distincts sont publiés pour 18 centres qui, ensemble, interviennent pour près de 75% du total des dépenses courantes de consommation déclarées en 1986 par les 82 centres. Les 18 centres ont été choisis, en partie, parce qu'ils permettent la publication d'un IPC au moins dans chaque province. On relève les prix de quelque 300 produits dans chacune des 18 villes; ce nombre est plus faible dans les 64 centres restants, les produits exclus étant principalement l'habillement et les articles d'ameublement.

Prices

The prices used in the calculation of the CPI are retail prices without regard to whether they are described as regular, special, etc. inclusive of all sales and excise taxes applicable to individual commodities. The pricing cycle starts in the latter part of each month and extends to the middle part of the following month. Although prices for most CPI items are collected on a monthly basis, some are priced less frequently, e.g., property taxes, automobile registration fees, dry cleaning services. However, such goods or services scheduled for pricing at less than monthly intervals will be priced in any month when there is evidence to suggest that significant price changes may occur prior to the next regularly scheduled pricing. The number of prices observed in a given city depends upon the importance of that city's expenditures to the total Canada expenditure and also the nature of the commodity, with those commodities displaying a high variability of price change generally requiring more observations. The selection of outlets in which prices are to be collected is judgmental (other than for rents) with the sample being designed to cover volume selling establishments.

Weights and Linking

The weights used in the calculation of the Consumer Price Index are periodically updated. This is a necessary procedure which serves to ensure that weights reflect changes in consumer expenditures thereby maintaining the relevancy of the index. As a result, different weighting systems are in effect in different time periods.

The 1982 family expenditure patterns were used to compile the CPI from January 1985 to December 1988. In January 1989 the 1982 weights were replaced by those derived from the expenditure patterns of 1986. This updating continues the policy of updating on a four-year cycle.

Prix

Les prix servant au calcul de l'IPC sont les prix au détail qu'il s'agisse de prix réguliers, de prix spéciaux, etc. et englobent toutes les taxes de vente, d'accise et autres taxes imposées aux produits. Le cycle des relevés commence vers la fin de chaque mois et se termine au milieu du mois suivant. Les prix de la plupart des articles de l'IPC sont recueillis chaque mois, mais certains articles sont observés moins souvent, notamment l'impôt foncier, l'immatriculation d'automobiles, le nettoyage à sec. Cependant, dans le cas des biens et services dont l'observation est prévue à des intervalles de plus d'un mois, on en relèvera le prix dans tout mois où il apparaît qu'une variation importante se produira avant le prochain relevé prévu au calendrier. Le nombre de prix observés dans une ville donnée dépend de l'importance des dépenses de cette ville par rapport au total des dépenses pour le Canada ainsi que de la nature du produit, les observations étant généralement plus fréquentes pour les produits dont les prix varient beaucoup. Le choix des points de vente où les prix doivent être recueillis est fait au jugé (sauf pour les loyers) et l'échantillon a pour but de couvrir les établissements à gros volume de vente.

Pondérations et enchaînement

Les pondérations utilisées dans le calcul de l'indice des prix à la consommation sont mises à jour périodiquement. Ce procédé est nécessaire pour que les pondérations tiennent compte des changements qui s'opèrent au niveau des dépenses à la consommation et, par le fait même, pour que l'indice conserve son utilité. En conséquence, différents schémas de pondérations sont utilisés pour des périodes de temps distinctes.

La composition des dépenses des familles de 1982 a servi au calcul de l'IPC à partir de janvier 1985 jusqu'à décembre 1988. En janvier 1989, les pondérations de 1982 ont été remplacées par d'autres dérivées de la composition des dépenses de 1986. Cette mise à jour poursuit la politique de Statistique Canada de mettre à jour les pondérations régulièrement à tous les quatre ans.

TEXT TABLE II. Comparison of 1982 and 1986 Expenditure Weights Used in the Consumer Price Index, by Major Component for Canada

TABLEAU EXPLICATIF II. Comparaison des pondérations des dépenses de 1982 et de 1986 utilisées pour l'indice des prix à la consommation, par composante principale pour le Canada

Major components	Weights 1982	Weights 1986
Composantes principales	Pondérations 1982	Pondérations 1986
All-items - Ensemble	100.00¹	100.00¹
Food - Aliments Housing - Habitation	20.02	18.05 36.32
Clothing - Habillement	8.37	8.69
Transportation - Transports Health and personal care - Santé et soins personnels	15.75	18.29 4.20
Recreation, reading and education – Loisirs, lecture et formation Tobacco products and alcoholic beverages – Produits du tabac et boissons	8.25	8.84
alcoolisées	5.45	5.60

¹ Figures may not add up due to rounding.

The weights shown in Text Table II represent expenditures in 1982 (1982 quantities valued in 1982 prices) and in 1986 (1986 quantities valued in 1986 prices). They cannot be used to reconstruct or reaggregate indexes on a 1981 = 100 time base. The methodology required to permit such a reaggregation can be obtained on request by contacting the:

Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (Telephone: (613) 951-9606).

The indexes based on 1986 weights were linked or connected in December 1988 to the appropriate indexes based on 1982 weights which had been in use since January 1985.

This linking procedure ensures that conceptually equivalent series are made continuous over time. It should be noted that the linking method is such that aggregate indexes cannot be considered as the direct average of their respective component indexes. In exceptional cases, this may cause the level, as well as the percentage changes, of an aggregate index to fall slightly outside the range of its component indexes.

Les pondérations du tableau explicatif II représentent les dépenses en 1982 (quantités et prix de 1982) et en 1986 (quantités et prix de 1986). Elles ne peuvent servir à reconstruire ni à réagréger des indices sur la base de 1981 = 100. La méthode à suivre pour une telle reconstruction peut être obtenue sur demande auprès de la:

Section des prix à la consommation Division des prix, Statistique Canada Ottawa (Ontario) K1A 0T6 (Téléphone: (613) 951-9606).

Les indices fondés sur les pondérations de 1986 ont été enchaînés ou raccordés en décembre 1988 aux indices correspondants fondés sur les pondérations de 1982, en usage depuis janvier 1985.

Grâce à cet enchaînement, des séries équivalentes sur le plan conceptuel sont continues dans le temps. On notera que cette méthode d'enchaînement ne permet pas de considérer les indices composés comme des moyennes directes de leur composante respective. Dans des cas exceptionnels, le niveau et les variations en pourcentage d'un indice agrégé peuvent ainsi dépasser légèrement l'étendue des indices composantes.

¹ Les chiffres ayant été arrondis, les totaux peuvent ne pas correspondre.

Time Base

The All-items Consumer Price Index for Canada and each index city is expressed in terms of 1986 = 100, except for certain items, as noted, where the pricing survey was introduced subsequent to that year. The 1986 = 100 time base became effective with the release of the June 1990 index. The base period for the Consumer Price Index, as well as for other Statistics Canada index series, is revised periodically.

Rebasing the CPI is a straightforward arithmetic operation which does not change the picture of economic events. Percentage changes computed will be the same, except for small differences due to rounding, regardless of whether the 1981 = 100 or 1986 = 100 time base is used. Rebasing of the CPI does not involve changes in the base period expenditure weights. Furthermore, the method employed in converting to the 1986 = 100 time base does not affect the continuity or statistical comparability of the index series.

It should be noted, however, that although the percentage changes in an index series will be the same, except for small differences due to rounding, regardless of whether they are computed from the 1981 or 1986 time base series, the same is not true for changes measured in terms of index points.

Current Annual Rate of Change

A rate of change representative of an annual movement in prices may be derived in several ways, none of which is free of shortcomings and interpretational problems. Statistics Canada presently calculates three measures of annual change, the percentage change between any given month and the same month a year ago, the percentage change between annual averages based on a calendar year and the current annual rate of change.

The method selected for calculating the current seasonally adjusted annual rate of change in the CPI in Table 1 involves compounding the growth rate over the latest three-month period on the seasonally adjust ed level (see Appendix 3). For more information on CPI growth rates, see "A Note on the Current Annual Rate of Change of the Consumer Price Index", **Retail Prices and Living Costs** – Service Bulletin (Catalogue 62-005), Vol. 4, No. 4, April 1975.

Reconstructed Indexes

With the release of the January 1985 Consumer Price Index, certain series were reconstructed historically to reflect the introduction of the Consumer Classification System of Statistics Canada which was introduced with the 1982 Updating. A few additional reconstructions were made with the introduction of the 1986 basket. For further information, contact Prices Division (613-951-9606 or 951-3353).

Période de base

L'indice d'ensemble des prix à la consommation du Canada et les indices de chaque ville sont exprimés sur la base de 1986 = 100, sauf pour certains articles, qui sont signalés et dont l'enquête sur les prix n'a été introduite qu'après cette année là. La base temporelle de 1986 = 100 est devenue effective à partir de la diffusion de l'indice de juin 1990. La période de base pour l'indice des prix à la consommation, et pour d'autres séries d'indices de Statistique Canada, fait l'objet d'une révision periodiquement.

Pour recalculer la base de l'IPC, il suffit d'effectuer une opération arithmétique simple qui ne modifie pas le tableau des événements économiques. Les variations en pourcentage calculées sur la base 1981 = 100 et 1986 = 100 sont équivalentes, les petites différences étant attribuables à l'arrondissement. Le calcul de la nouvelle base de l'IPC ne change pas les pondérations des dépenses de la période de base. De plus, la méthode de conversion selon la base 1986 = 100 ne compromet pas la continuité ou la comparabilité statistique des séries d'indices.

Toutefois, même si les variations en pourcentage d'une série d'indices seront identiques, à quelques différences d'arrondissement près, quelle que soit la base (1981 ou 1986) utilisée pour les calculer, tel ne sera pas le cas de ses mouvements exprimés en points.

Taux de variation annuel courant

Plusieurs méthodes permettent de dériver un taux de variation pour représenter le mouvement annuel des prix, mais toutes comportent des points faibles et des problèmes d'interprétation. Statistique Canada calcule actuellement trois mesures de la variation annuelle, soit le changement en pourcentage pour un mois donné par rapport à un autre et au mois correspondant de l'année précédente, le changement en pourcentage entre des moyennes annuelles basées sur l'année civile et le taux de variation annuel courant.

La méthode retenue pour calculer le taux de variation annuel courant après désaisonnalisation de l'IPC au tableau 1 consiste à prendre un taux de croissance composé sur le niveau désaisonnalisé des trois derniers mois (voir appendice 3). Pour plus de renseignements sur le taux de croissance de l'IPC, se reporter à "Note sur le taux annuel courant de l'indice des prix à la consommation", **Prix de détail et coût de la vie** - Bulletin de service (n° 62-005 au catalogue), vol. 4, n° 4, avril 1975.

Indices reconstruits

À compter de l'émission de l'indice des prix à la consommation de janvier 1985, certaines séries historiques ont été reconstruites de façon à ce qu'elles représentent l'introduction du système de classification de la consommation de Statistique Canada qui fut introduit avec la mise à jour de 1982. L'adoption du panier de 1986 a amené quelques autres remaniements. Pour plus de renseignements, communiquez avec la Divison des prix (613-951-9606 ou 951-3353).

Whitehorse and Yellowknife

In keeping with its commitment to publish consumer price indexes for at least one urban centre in each province and territory, Statistics Canada, as part of the 1978 Updating, began to develop consumer price indexes for the urban centres of Whitehorse and Yellowknife. As no Family Expenditure Survey was conducted in these centres in 1978, 1972 expenditure patterns for these two centres were extrapolated to 1978 using the change in expenditure patterns between 1972 and 1978 in other urban centres. As the 1978 expenditure patterns were incorporated into the official CPI, commencing with the release of the April 1982 index, consumer price indexes for Whitehorse and Yellowknife were developed on a March 1982 = 100 time reference base. Since the expenditure patterns for Whitehorse and Yellowknife were derived and not directly observed, the indexes for these two urban centres were not included in the calculation of the official CPI for Canada. With the introduction of the 1982 Updating, these two centres were included in the calculation of the official CPI for Canada.

It was not possible, at this time, to develop an owned accommodation index for these two comparable to that in concept of the national CPI. The nature and the relatively small size of the housing market in these two centres is such that Statistics Canada was unable to construct reliable price indexes for new houses. It was decided that as an interim and available alternative measure, the price movement of rental accommodation would be used to represent that of owned accommodation. As a consequence, the All-items indexes published for these centres are not comparable to those for Canada or for any of the sixteen urban centres for which a CPI is produced. The rent data used are collected on a quarterly basis by the respective territorial governments. For rents, the data are incorporated into the consumer price indexes for these two centres with a two-month lag.

Provincial CPI's

Consumer price indexes for provincial urban centres were published for the first time in the July-September 1988 issue of this publication. An article describing the coverage and method of these indexes was published in the same issue. Updated Provincial CPI's are now a permanent feature of this publication.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in **The Consumer Price Index, Reference Paper, Updating Based on 1986 Expenditures,** (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in Family Expenditure in Canada, 1986, Catalogue 62-555.

Whitehorse et Yellowknife

Statistique Canada, conformément à son engagement de publier des indices des prix à la consommation pour au moins un centre urbain dans chaque province et territoire, a commencé à élaborer des indices de prix à la consommation pour les centres urbains de Whitehorse et Yellowknife dans le cadre de la mise à jour de 1978. Puisqu'il n'y a pas eu dans ces centres d'enquête sur les dépenses des familles en 1978, les données sur la composition des dépenses de 1972 pour ces deux villes ont été extrapolées pour l'année 1978 en se fondant sur l'évolution de la composition des dépenses entre 1972 et 1978 dans d'autres centres urbains. Étant donné que la composition des dépenses de 1978 a été incorporée dans l'IPC officiel à la consommation avec l'indice d'avril 1982, les indices des prix à la consommation pour Whitehorse et Yellowknife ont été élaborés sur la base mars 1982 = 100. La composition des dépenses pour Whitehorse et Yellowknife ayant été dérivée plutôt qu'observée directement, les indices pour ces deux centres urbains n'étaient pas compris dans le calcul de l'IPC officiel pour le Canada. Avec l'introduction de la mise à jour de 1982, ces deux centres ont été pris en compte lors du calcul de l'IPC officiel pour le Canada.

Il n'a pas été possible d'élaborer, pour ces deux centres, un indice du logement en propriété qui soit conceptuellement comparable à celui incorporé à l'IPC national. La nature et la petitesse relative du marché de l'habitation dans ces deux centres ont empêché Statistique Canada de construire des indices de prix fiables pour les maisons neuves. Comme c'est la seule mesure disponible, il a été décidé d'utiliser, pour le moment, le mouvement des prix du logement en location pour représenter celui du logement en propriété. En conséquence, les indices d'ensemble publiés pour ces centres ne sont pas comparables à ceux du Canada ou d'aucun des seize autres centres urbains pour lesquels un IPC est calculé. Les données sur les loyers utilisées sont recueillies trimestriellement par les deux administrations publiques territoriales. S'agissant des loyers, les données pour ces deux centres sont incorporées aux indices de prix à la consommation avec deux mois de retard.

IPC Provinciaux

Des indices de prix à la consommation pour les centres urbains provinciaux ont été publiés pour la première fois dans le numéro de juillet-septembre 1988 de la présente publication. Un article décrivant la couverture et la méthodologie de ces indices est paru dans ce même numéro. Les IPC provinciaux mis à jour sont devenus partie intégrante de la présente publication.

Renseignements supplémentaires et publications connexes

Le Document de référence de l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1986, (hors-série), n° 62-553 au catalogue, décrit en détail les méthodes et les concepts de l'IPC. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans Dépenses des familles au Canada, 1986, n° 62-555 au catalogue.

The latest information on the Consumer Price Index for Canada and 18 cities is also available in the **Consumer Price Index**, Catalogue 62-001 monthly. In addition, selected educational and promotional material are available. For these and further information contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606 or 613-951-3353).

De plus, les derniers renseignements sur l'indice des prix à la consommation du Canada et de 18 villes sont publiés dans le bulletin mensuel **L'indice des prix à la consommation**, n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606 ou 613-951-3353).

THE PURCHASING POWER OF THE CONSUMER DOLLAR

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

Changes in the purchasing power of the consumer dollar, put simply, are inversely related to movements in the Consumer Price Index. For example, between 1986 and June 1990, consumer prices as measured by the CPI rose 19.2% such that, goods and services which could have been purchased for \$100.00 in 1986 would cost \$119.20 in June 1990. Each consumer dollar in June 1990 therefore buys less than in 1986. The extent to which the purchasing power of the dollar has declined is matched precisely by the increase in the consumer price index. Thus the purchasing power of a dollar in June 1990 compared to the 1986

dollar was 83.9 (100 cents X
$$\frac{100.0}{119.2}$$
 = 83.9 cents).

This process may be interpreted as the deflation of money, that is, adjusting values expressed in monetary terms in order to eliminate price effects.

Users of the tabulation which shows the purchasing power of the consumer dollar compared to the 1986 dollar at different points in time (Table 2) should note that, as in the case of the Consumer Price Index from which the numbers are derived, the data may not measure closely the experiences of any one specific family within the large urban group to which the CPI relates. At the same time changes in the purchasing power of the dollar are not expected to match the experience of other population groups whose expen diture behaviour is significantly different from those associated with the CPI target population. It should also be noted that like the CPI, changes in the purchasing power of the dollar are not directly affected by changes in income taxes, unemployment insurance premiums, other types of security payments and all other goods and services that are not included in the CPI basket.

Appendice 2

LE POUVOIR D'ACHAT DU DOLLAR DE CONSOMMATION

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie et la baisse des prix est liée à la hausse du pouvoir d'achat.

En somme, le pouvoir d'achat du dollar de consommation varie en relation inverse avec les mouvements de l'indice des prix à la consommation. Par exemple, entre 1986 et juin 1990, les prix à la consommation mesurés par l'IPC ont grimpé de 19.2% de sorte que les biens et services qu'on pouvait acheter en 1986 avec \$100.00 coûtaient \$119.20 en juin 1990. Chaque dollar de consommation en juin 1990 achète donc moins qu'en 1986. Le pouvoir d'achat du dollar a baissé exactement dans la même proportion que l'indice des prix à la consommation a augmenté. Par conséquent, le pouvoir d'achat d'un dollar en juin 1990, par rapport au dollar de 1986.

Ce processus peut être assimilé à la déflation de l'argent, c'est-à-dire à la correction des valeurs monétaires afin d'éliminer l'influence des prix.

Les utilisateurs des totalisations qui indiquent le pouvoir d'achat du dollar de consommation à différentes périodes par rapport à 1986 (tableau 2) doivent noter que ces chiffres sont tirés de l'indice des prix à la consommation et qu'ils peuvent, tout comme ce dernier, ne pas mesurer fidèlement la situation particulière d'une famille faisant partie du grand groupe urbain auguel se rapporte l'IPC. Par ailleurs, les variations du pouvoir d'achat du dollar ne reflètent pas les changements touchant les autres groupes de population dont les habitudes de dépenses diffèrent sensiblement de celles du groupe cible pour l'IPC. Il faut également noter que, tout comme l'IPC, les variations du pouvoir d'achat du dollar ne sont pas touchées directement par les changements de l'impôt sur le revenu, des primes d'assurance-chômage, d'autres paiements de sécurité sociale et des prix de tous les autres biens et services ne faisant pas partie du panier de l'IPC.

SEASONAL ADJUSTMENT OF THE CONSUMER PRICE INDEX

Economic time series, measuring changes through time in economic activities, reflect the combined effects of the underlying seasonal, cyclical, trend and irregular factors which influence them. Such series can be decomposed into distinct movements representing the separate effects of the seasonal, cyclical and trend factors and a residual movement representing factors causing irregular non-repetitive movements.

Seasonal fluctuations in a series are those that can be identified with a particular season or time of year. These fluctuations tend to occur at about the same time each year with roughly the same magnitude and are the composite result of climatic influences and social and commercial customs (e.g., harvests, end of season sales).

Cyclical movements consist of sequences of change over periods longer than a year, during which the series rises to a peak and then falls back, subsequently to rise again. For many series this type of movement is associated with expansion and contraction of the economy over the "business cycle".

The trend is a steady underlying movement which reflects continuing or slowly changing economic forces.

Finally, the fluctuations that remain unaccounted for by the seasonal, cyclical and trend movements of a series are termed irregular. The factors causing irregular movements in a series are of a non-repetitive, ad-hoc nature. The irregular component tends to have a stable random appearance, but may include some extreme movements having identifiable causes (e.g., strikes or severe weather). They therefore can be distinguished from the much smaller random irregular variations.

Appendice 3

LA DÉSAISONNALISATION DE L'INDICE DES PRIX À LA CONSOMMATION

Les séries chronologiques économiques mesurent l'évolution dans le temps de l'activitié économique. Ces séries reflètent les effets combinés de la saisonnalité, du cycle, de la tendance générale et d'autres facteurs accidentels qui leur sont propres et qui agissent sur elles. Il est possible de décomposer de telles séries ou mouvements distincts représentant séparément les effets de tel ou tel facteur (saisonnalité, cycle, tendance) et en un mouvement résiduel représentant les facteurs de mouvements accidentels (non répétitifs).

Les fluctuations saisonnières d'une série sont celles que l'on peut relier à une saison ou une période donnée de l'année; elles ont tendance à se produire généralement à peu près à la même époque de l'année et avec la même ampleur. Elles sont le résultat à la fois de conditions climatiques et d'habitudes sociales et commerciales (telle les récoltes, les ventes de fin de saison).

Les mouvements cycliques se définissent comme une suite de variations sur des périodes supérieures à un an, au cours desquelles la série atteint un sommet, descend puis remonte à nouveau. Ce type de mouvement est associé, pour de nombreuses séries, à l'expansion et à la récession économique au cours du "cycle économique".

La tendance générale est un mouvement fondamental stable qui reflète la continuité ou un changement lent de l'économie.

Enfin, les fluctuations qui ne se classent ni dans la saisonnalité, ni dans le cycle, ni dans la tendance générale sont désignées comme mouvements accidentels. Les facteurs expliquant ce type de mouvement dans une série sont de nature spéciale et non répétitive. L'élément accidentel tend à présenter une apparence aléatoire stable mais il peut comprendre certains mouvements extrêmes, dont on peut identifier les causes (comme des grèves ou de fortes intempéries). Ils peuvent donc être distingués des variations irrégulières aléatoires beaucoup moins prononcées.

The methodologies used for removing as much of the seasonal fluctuation as possible from a series have been described in detail in numerous articles and texts on the subject. Rather than reiterating those texts, an outline of the methodologies employed in the derivation of seasonally adjusted consumer price indexes for Canada is provided below.

With the introduction of the 1982 basket, the seasonal adjustment methodology was changed. seasonal adjustment is performed at the level of the seven major components with the seasonally adjusted All-items and All-items excluding Food indexes being the weighted average of their components. This indirect seasonal adjustment of the two aggregate series ensures (except for possible rounding differences) that the aggregate movements will be within the range of their components' movements. Since each basket has its own weights, the move to indirect seasonal adjustment of the aggregates dictated the use of unlinked series as the basis for the seasonal adjustment. Estimating a separate seasonal pattern for each basket has some conceptual advantages since it means that the classification and weight changes introduced with each updating of the basket will not distort the estimates. However, there is an operational difficulty which arises due to the desirability of having at least seven years of data for estimation of the seasonal pattern and the current rapidity with which CPI baskets are updated. Given the current updating cycle, at the time a new basket is introduced, we have only three years of data for the new basket. To create a longer time series, we chain on data from the previous basket back to it's beginning. This reintroduces some of the distortions present in estimating seasonal patterns from linked data.

The above distortion will be minimized through the use of concurrent seasonal adjustment rather than forecast seasonal factors. With the concurrent methodology, the seasonal pattern is estimated each month using all available data. However, to minimize revisions we will revise past indexes only at the end of each calendar year.

Les méthodes utilisées pour éliminer le plus possible de saisonnalité d'une série ont fait l'objet de descriptions détaillées dans de nombreux articles et ouvrages sur la question¹. Au lieu d'en reprendre ici le contenu, nous présentons ci-dessous les grandes lignes des méthodes utilisées pour dériver les indices des prix à la consommation désaisonnalisés pour le Canada.

Avec l'introduction du panier 1982, la méthode de désaisonnalisation fût changée. La désaisonnalisation directe est effectuée à l'échelle des sept composantes principales; les versions désaisonnalisées de l'indice des aliments et de l'indice d'ensemble sans les aliments correspondent à la movenne pondérée de leurs composantes. désaisonnalisation indirecte des deux séries agrégées garantit que les mouvements agrégés se situeront dans les limites des mouvements de leurs composantes (exception faite des différences attribuables à l'arrondissement). Puisque chaque panier a ses propres coefficients de pondération, le passage à la méthode indirecte de désaisonnalisation des séries agrégées a entraîné l'utilisation, à titre de base de la désaisonnalisation, des séries non enchaînées. L'estimation de tendances saisonnières distinctes pour chacun des paniers représente certains avantages au point de vue conceptuel, puisqu'elle signifie que les changements apportés à la classification et aux coefficients de pondération au moment de la mise à jour du panier n'entraîneront aucune distortion. Toutefois, une difficulté opérationnelle existe étant donné, d'une part, qu'il est souhaitable d'avoir au moins sept années de données pour estimer la tendance saisonnière et, d'autre part, en raison de la rapidité avec laquelle on met maintenant à jour le panier de l'IPC. étant donné le cycle courant de mise-à-jour, nous n'avons que trois ans de données pour un nouveau panier lorsque celui-ci est introduit. Afin de créer une série plus longue, nous enchaînons les données du nouveau panier à celles du panier précédent jusqu'à son début. Cette mesure ramène certaines distorsions que l'on retrouvait dans l'estimation des tendances saisonnières des données enchaînées.

Ces distortions seront toutefois minimisées par l'utilisation de désaisonnalisations concomitantes plutôt que de coefficients saisonniers projetés. Dans la méthodologie concomitante, la tendance saisonnière est estimée chaque mois au moyen de toutes les données accessibles. Nous ne recalculerons toutefois les indices antérieurs qu'à la fin de chaque année civile, et ce pour réduire au minimum le nombre de révisions.

L'étude technique nº 12 de Julius Shiskin et de Harry Eisenpress "Seasonal Adjustments by Electronic Computer Methods", National Bureau of Economic Research, New York, 1958.

CITY AVERAGE RETAIL PRICES

Introduction

The Average Retail Price Survey is under taken to produce an accurate measure of average prices at one point in time which will permit comparison between cities. In order not to generate artificial price differentials it is essential that the qualities, brands and sizes selected are sufficiently similar. Prices of approximately 60 items, consisting mainly of food and some personal care items and household supply items are collected in representative outlets in 26 cities. These cities are: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria and Whitehorse. This survey is normally under taken during the first week of January, April, July and October.

In order that the average prices generated for one city will be comparable with those for another city, price collection is generally limited to widely available manufacturers' brands. For meat and produce, care is taken to narrowly define cuts and qualities. The goods and services tax (GST) and the provincial retail sales tax are included in the retail averages where applicable.

Calculation Methodology

City Prices. Prices are collected in both chain and independent stores. (A chain stores organization is defined as one operating four or more stores under the same legal ownership.) A city average price is calculated for each item by weighting the average prices obtained for chain and independent stores according to their overall market sales share in that city. For branded items sold under brand labels, an average price for each brand is first calculated in the manner described above; the brand averages are then weighted together to form the item average. The weight assigned each brand in this process is proportionate to the number of price quotes obtained for each of the brands in that city.

Appendice 4

PRIX DE DÉTAIL MOYENS PAR VILLE

Introduction

L'enquête sur les prix moyens de détail est effectuée afin d'obtenir une mesure adéquate des prix moyens, à une période donnée, qui permette une comparaison entre les villes. Il est essentiel que les qualités, les marques et les tailles choisies soient suffisamment équivalentes afin de ne pas introduire des différences de prix artificielles. Les prix de quelques 60 articles, principalement des produits alimentaires, certains articles de soins personnels et des fournitures de ménage, sont relevés dans de nombreux points de vente dans 26 villes: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria et Whitehorse. Cette enquête est normalement effectuée durant la première semaine de janvier, d'avril, de juillet et d'octobre.

Afin que les prix moyens calculés pour une ville puissent être comparables à ceux d'une autre ville, l'observation des prix se limite généralement aux marques des fabricants largement distribuées. Dans le cas de la viande, des fruits et des légumes, on prend soin de définir avec précision les morceaux et les qualités. La taxe sur les produits et services (TPS) et la taxe de vente au détail sont ajoutées au prix de détail moyen s'il y a lieu.

Méthode de calcul

Prix urbains. Les prix sont recueillis dans les magasins à succursales multiples et les magasins indépendants. (Une entreprise à succursales multiples est définie comme celle qui exploite quatre magasins ou plus sous la même raison sociale.) On calcule un prix moyen par ville pour chaque article en pondérant les prix moyens recueillis dans les magasins à succursales multiples et dans les magasins indépendants selon la part de leurs ventes sur le marché général dans leur ville. Dans le cas ces articles vendus sous marque déposée, on calcule d'abord un prix moyen pour chaque marque déposée de la façon décrite plus haut: ensuite on pondère ensemble les moyennes des marques déposées afin d'en arriver à la moyenne pour l'article. Le poids assigné à chaque marque déposée lors de ce processus est proportionnel au nombre de prix observés dans la ville en question pour cette marque déposée.

Weighted city averages. A weighted city average price for each item is derived by weighting the relevant city averages. The importance of each city in calculating the weighted city average is determined by the volume of retail sales in that city.

Item Specifications

A description of the approximately 60 items covered in the Average Prices Survey can be acquired by contacting Prices Division.

Average Retail Prices for Gasoline

Tables 16 through 19 present average retail prices for two types of gasoline retailed in two types of filling stations. The information is collected on a monthly basis as part of the Consumer Price Index survey. Gasoline prices are collected at the pump from a sample of full service and self-serve filling stations in major urban centres across Canada. The prices collected included all applicable Federal and Provincial taxes. They are presented as average prices per litre of gasoline. The series presented in these tables are confined to the 16 urban centres for which Consumer Price Indexes are produced and cover the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to January 1979, are, however, based on the average prices per imperial gallon.

Average Retail Prices for Fuel Oil

Table 20 presents average retail prices for fuel oil. The information is collected nine times yearly as part of the Consumer Price Index Survey. Fuel oil prices are collected from a sample of distributors in major urban centres across Canada. The prices collected include all applicable Federal and Provincial taxes. They are presented as average prices per litre. The series presented in Table 20 are confined to 16 urban centres and for the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to October 1980 are, however, based on the average prices per imperial gallon.

Moyennes pondérées des villes. Une moyenne pondérée du prix de chaque article pour l'ensemble des villes est calculée en pondérant les moyennes appropriées des villes. L'importance de chaque ville dans le calcul de la moyenne pondérée des villes est déterminée par le volume des ventes au détail dans cette ville.

Spécification des articles

Une description des quelques 60 articles contenus dans l'enquête des prix moyens peut être obtenu en communiquant avec la Division des prix.

Prix de détail moyens de l'essence

Les tableaux 16 à 19 présentent les prix de détail moyens de deux types d'essence vendus dans deux genres de stations. Cette information est relevée à chaque mois dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix de l'essence sont relevés, sur place, auprès d'un échantillon de stations offrant un service complet et de stations libre service dans les principaux centres urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ces tableaux sont ceux d'un litre d'essence. Les séries présentées se limitent aux 16 centres urbains pour lesquels on produit un IPC pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant janvier 1979 sont, toutefois, sur la base d'un gallon impérial.

Prix de détail moyens du mazout

Le tableau 20 présente les prix de détail moyens du mazout. Cette information est relevée neuf fois par année dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix du mazout sont relevés auprès d'un échantillon de distributeurs dans les principaux centre urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ce tableau sont ceux d'un litre. Les séries présentées au tableau 20 se limitent à 16 centres urbains, pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant octobre 1980 sont, toutefois, sur la base d'un gallon impérial.

CANADIAN INTER-CITY RETAIL PRICE COMPARISONS

Table 21 shows consumer price differentials prevailing amongst 11 Canadian cities situated in all 10 provinces for a selection of commodities and services at the specified point in time.

The data base of this place-to-place study of comparative retail prices was largely drawn from the large volume of price quotations collected for the production of the monthly city consumer price indexes. For the inter-city food price differentials, however, use was also made of data gathered in a special program of pricing undertaken quarterly for publication of City Average Retail Prices.¹

In developing these spatial price relationships, efforts were made to achieve comparability by seeking to equate qualities of goods and services in the various locations and by matching types of retail outlets so far as possible. To optimize price comparability between locations, differential price measurements were initially derived separately as between the following pairs of cities:

St. John's - Halifax Charlottetown - Halifax - Halifax Saint John - Halifax Ottawa - Montréal Toronto - Toronto Ottawa Toronto - Winnipeg Regina - Winnipeg Edmonton - Winnipea - Vancouver Edmonton

Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names whenever possible and also with some regard for comparability of retail outlets and merchandising practices. By means of a linking procedure, the paired city item were initially compared with counterparts in a common base city; subsequently they were related to the weighted average of the combined 11 cities equalling 100. The city-to-city price relationships for individual items thus derived were then aggregated by application of the combined 11-city CPI weighting patterns updated for price change to the time of the inter-city retail price comparison study. Measurements of inter-city retail price differentials are updated, as required, by application of the relative movement of item prices in each city, obtained from the relevant city CPI.

Appendice 5

COMPARAISONS ENTRE LES PRIX DÉTAIL DANS DIFFÉRENTES VILLES DU CANADA

Le tableau 21 présente les différences de prix à la consommation de 11 villes du Canada, situées dans les 10 provinces, pour un nombre choisi de biens et de services, pour la période de temps spécifiée.

Les données de cette étude comparative de prix de détail proviennent en grande partie du relevé de prix utilisé pour la production de l'indice mensuel des prix à la consommation. On a, toutefois, utilisé les données obtenues dans le cadre d'un programme trimestriel spécial de relevé des prix servant à la publication des prix de détail moyens par ville¹ pour déterminer les différences de prix de la nourriture entre les villes.

Des efforts ont été entrepris pour développer des comparaisons valables en cherchant à obtenir des qualités identiques de biens et de services dans les différents endroits et en couplant, lorsque possible, des points de vente au détail comparables, pour déterminer les relations de prix spatiales. Afin d'optimiser la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont été calculées séparément pour les paires de villes suivantes:

St. John's - Halifax - Halifax Charlottetown - Halifax Saint john - Halifax Ottawa Toronto - Montréal Ottawa - Toronto - Winnipeg Toronto Regina - Winnipea Edmonton - Winnipea Edmonton - Vancouver

À l'intérieur de chaque paire de villes, les prix ont été couplés au niveau de l'article en s'assurant que les spécifications étaient identiques, y compris les marques, lorsque c'était possible et aussi en tenant compte de la comparaison des points de vente au détail et des méthodes de vente. Grâce à la procédure de couplage, les indices couplés des villes ont d'abord été comparés au niveau de l'article et transformés sur la base d'une ville commune, ils ont ensuite été reliés à une moyenne pondérée (la combinaison de 11 villes étant égale à 100). Les relations entre les prix d'articles entre les villes ainsi déduites ont été regroupées en applicant le schéma de pondération de l'IPC des 11 villes combinées, mis à jour par la variation de prix qui s'est effectuée jusqu'au moment de l'étude comparative des prix de détail entre les villes. Les mesures de comparaison des prix de détail entre villes sont mises à jour, lorsque nécessaire, en utilisant le mouvement des prix obtenu des IPC de chaque ville, au niveau de l'article.

¹ See Table 15 and Appendix 4

Voir tableau 15 et appendice 4.

It should be noted, especially in periods of volatile price movement, that city-to-city retail price relationships may be significantly affected by the timing and the relative rate of price change occurring in each location. Furthermore, since the retail prices used in this study are those faced by consumers, they include sales and excise taxes as applicable. Thus, comparative rates of provincial sales tax in effect in the various cities at the time of price comparison, as well as changes in the rate of incidence of such taxes, can be of importance in explaining inter-city price differentials for tax-affected items or groups of items.

Il convient de noter, surtout dans une période de fluctuation des prix, que les relations entre les prix de détail d'une ville à l'autre peuvent varier de façon significative selon la période de relevé des prix et le taux relatif de variation des prix à chaque endroit. De plus, puisque les prix de détail utilisés pour cette étude sont ceux que les consommateurs doivent payer, les taxes de vente et d'accise y sont incluses. Donc, les taux comparatifs des taxes de vente provinciale effectives dans les diverses villes au temps de la comparaison, de même que le changement dans le taux ou l'incidence de ces taxes, peuvent être importantes pour expliquer les différences de prix entre les villes, des articles ou groupes d'articles taxables.

Footnotes for Table 21

- (2) The weights shown are rounded 1986 weights as contained in the report The Consumer Price Index Reference Paper, Updating Based on 1986 Expenditures (Occasional), Catalogue No. 62-553. They are provided for illustration only; the weights actually used are combined cities weights with adjustments for price change since 1986.
- (3) Includes the following sub-groups: Condiments, spices and vinegar, sugar and sugar preparations, coffee and tea, fats and oils, and other foods, food preparation materials and food preparations.

Notes pour le tableau 21

- (2) Les poids indiqués sont les poids arrondis pour 1986 figurant dans Document de référence de l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1986 (hors-série, n°. 62-553 au catalogue). Ils ne sont présentés qu'à titre documentaire; les poids utilisés en fait sont les poids des villes combinés rajustés en fonction des variations des prix observées depuis 1986.
- (3) Comprend les sous-groupes suivants: Condiments, épices et vinaigre, sucre et préparations à base de sucre, le café et le thé, les huiles et matières grasses et les autres aliments, ingrédients et préparations alimentaires.

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to

Appendice 6

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger: en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des movens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking an other complete survey.

parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 7 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 7 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

THE 1994 CANADA YEAR BOOK

Your indispensable and comprehensive reference source on Canada

For essential information on Canada, turn to the *Canada Year Book*. An invaluable resource, the 1994 edition is beautifully designed in an inviting and easy-to-read format.

The 1994 Canada Year Book examines recent events, changes and trends in great detail. Organized carefully into 22 chapters, it answers questions on virtually every topic from geography through health to banking.

This edition features:

- Over 700 crisply written pages packed with eye-opening information on life in Canada from social, economic, cultural and demographic perspectives
- 250 concise tables plus 63 charts and graphs that put statistical information into focus
- Stunning photographs capturing distinctively Canadian scenes by some of this country's finest photographers
- Fascinating short feature articles covering everything from archaeology to white collar trends

Trusted for over 125 years by students, teachers, researchers, librarians and business people, the *Canada Year Book* is the reference source to consult first on all aspects of Canada.

An enduring addition to any home or office library!

ORDER YOUR COPY OF CANADA YEAR BOOK TODAY.

Available in separate English and French editions, the 1994 *Canada Year Book* (Catalogue No. 11-402E) is \$59.95 plus \$5.05 shipping and handling in Canada, US \$72 in the United States, and US \$84 in other countries.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, Ottawa, Ontario K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and charge it to your VISA or MasterCard.

L'ANNUAIRE DU CANADA 1994

Un ouvrage complet et indispensable sur le Canada

Pour obtenir des renseignements essentiels sur le Canada, consultez l'Annuaire du Canada. Inestimable source d'information, l'édition de 1994 est un ouvrage d'une présentation très soignée, attrayant et facile à lire.

L'Annuaire du Canada 1994 étudie en profondeur les événements, les tendances et les changements récents. Divisé en 22 chapitres, il répond à vos questions sur presque tous les sujets, depuis la géographie jusqu'à la santé et la banque.

Voici ce que vous trouverez dans l'édition de 1994 :

- Plus de 700 pages écrites dans un style vif et pleines de renseignements intéressants sur les dimensions sociales, économiques, culturelles et démographiques de la vie canadienne
- 250 tableaux concis et 63 graphiques et diagrammes qui permettent de mettre en perspective l'information statistique
- Remarquables photographies de paysages typiquement canadiens par certains des photographes canadiens les plus illustres
- Courts articles fascinants sur des sujets divers, depuis l'archéologie jusqu'à l'évolution de la situation des cols blancs

Ouvrage de référence de prédilection des étudiants, des enseignants, des chercheurs, des bibliothécaires et des gens d'affaires, et ce depuis plus de 125 ans, l'*Annuaire du Canada* est celui qu'il faut consulter <u>en premier</u> pour en savoir plus long sur tous les aspects du Canada.

Un volume que vous voudrez conserver longtemps dans votre bibliothèque ou au bureau!

COMMANDEZ DES AUJOURD'HUI VOTRE EXEMPLAIRE DE L'ANNUAIRE DU CANADA

Vous pouvez vous procurer la version française ou anglaise de l'*Annuaire du Canada* 1994 (no 11-402F au catalogue) au coût de 59,95 \$ (supplément de 5,05 \$ pour les frais d'expédition et de manutention) au Canada, 72 \$ US aux États-Unis et 84 \$ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division du marketing, Vente et service, Ottawa (Ontario) K1A 0T6, ou communiquez avec le centre de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous le préférez, télécopiez votre commande en signalant le 1-613-951-1584 ou téléphonez sans frais au 1-800-267-6677 et portez les frais à votre compte VISA ou MasterCard.

MERCI DE VOTRE COMMANDE!

Statistique Canada Statistics Canada Canadä

THE MARKET RESEARCH HANDBOOK 1993/1994

1991 CENSUS INCLUDED

The fastest way to get off to a good start!

Brainstorming with your colleagues produces some great marketing ideas. But which ones will you use? The Market Research Handbook can help you narrow

your options before you commit any more time and resources to developing your strategy.

This handbook is the most comprehensive statistical compendium on Canadian consumers and the businesses that serve them. It helps you to identify, define and locate your target markets.

Looking for...

...socio-economic and demographic profiles of 45 urban areas?

...revenue and expenditure data for retailers and small businesses?

The **Market Research Handbook** has it all... and more. It provides information on:

- 1991 Census information
- personal expenditures on goods and services
- size and composition of households and families
- wages, salaries and employment
- investment in Canadian industries
- labour force in various industries
- industry and consumer prices

It has been one of our bestsellers since 1977 for the simple reason that it offers such a range and depth of market data. Save time and money when you're looking for data or data sources, keep the **Market Research Handbook** close at hand for easy reference.

The **Market Research Handbook** (Cat. no. 63-224) is \$94 (plus 7 % GST) in Canada, US\$113 in the United States and US\$132 in other countries

To order, write to Statistics Canada, Marketing Division, Publication Sales, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to (613) 951-1584. Or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

LE RECUEIL STATISTIQUE DES ÉTUDES DE MARCHÉ 1993/1994

RECENSEMENT DE 1991

Pour partir du bon pied!

Des séances de remue-méninges jaillissent d'excellentes idées de commercialisation. Mais lesquelles choisir ? Le **Recueil**

statistique des études de marché peut

vous faciliter les choix avant que vous n'engagiez plus de temps et de ressources à l'élaboration de votre stratégie.

Ce recueil statistique est le plus exhaustif qui soit sur les consommateurs canadiens et les entreprises

qui les servent. Il vous aide à définir et situer vos marchés cibles.

Vous cherchez...

...des profils socio-économiques et démographiques de 45 régions urbaines ?

...des données sur les recettes et les dépenses de détaillants et de petites entreprises ?

Le Recueil contient tout cela... et plus encore :

- données sur le recensement de 1991
- dépenses personnelles en biens et en services
- taille et composition des ménages et des familles
- traitements, salaires et emploi
- investissements par secteur d'activité économique
- population active par secteur d'activité
- prix de l'industrie et de la consommation

Si c'est l'un de nos succès depuis 1977, c'est parce qu'il vous renseigne en long et en large sur le marché. Pour économiser temps et argent, vous ne sauriez vous en passer.

Le **Recueil statistique des études de marché** (n° 63-224 au catalogue) coûte 94 \$ (plus 7% de TPS) au Canada, 113 \$ US aux États-Unis et 132 \$ US dans les autres pays.

Pour commander, veuillez écrire à Statistique Canada, Division du marketing, Vente des publications, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre de consultation de Statistique Canada le plus proche (voir la liste figurant dans la présente publication).

Vous pouvez également commander par télécopieur au (613) 951-1584 ou composer sans frais le 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

re you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistics Canada's *Canadian Economic Observer* for their monthly briefing.

Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

My purchase CEO?

As a subscriber, you'll be <u>directly connected</u> to Statistics Canada's economic analysts. Names and phone numbers of the experts who can help solve your particular research problem or find specialized data are listed with articles and features.

You'll also receive a complimentary copy of CEO's annual **Historical Statistical Supplement**. Sixty years of historical perspectives right at your fingertips – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue number 10-230) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries.

To order, write: Statistics Canada

Marketing Division Sales and Service Ottawa, Ontario, K1A 0T6

or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, l'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

ne seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter l'OEC dans son format actuel en deux parties, qui a été bien accueilli. La section de l'analyse contient des commentaires qui donnent à réfléchir sur la conjoncture économique, les problèmes, les tendances et les développements. L'aperçu statistique contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

ourquoi acheter l'OEC?

En tant qu'abonné à l'OEC, vous êtes <u>directement relié</u> aux analystes économiques de Statistique Canada. Le nom et le numéro de téléphone des experts qui peuvent vous aider à résoudre vos problèmes particuliers de recherche ou trouver des données spécialisées sont cités dans les articles et les rubriques de l'OEC.

Vous recevrez également un exemplaire gratuit du **Supplément statistique historique** annuel. Vous aurez ainsi devant vous soixante années de données rétrospectives et ce, <u>à titre gracieux</u>.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-230 au catalogue) est de 220 \$ au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays.

Pour commander, écrivez à : Statistique Canada

Division du marketing Vente et service Ottawa (Ontario) K1A 0T6

ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication.

Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer printout, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct on line access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Information and Current Analysis Unit, Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9606) or to the Statistics Canada reference centre in:

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, Its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

Most of the data published in this publication is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. The Databank identification numbers, by which data may be retrieved from CANSIM, are given in the headings of the relevant series in Tables in the publication. For further information on CANSIM call (613) 951-8200 or write to Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

This publication was prepared under the direction of:

- Louis Marc Ducharme, Assistant Director, Prices Division
- François Bordé, Chief, Consumer Prices Section
- Harold Harnarine, Head, Information and Current Analysis Unit

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans cette publication peuvent être obtenues sous forme lisible par machine de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Les numéros d'identification de la Databank qui servent à retrouver les données de CANSIM sont inscrits à l'en-tête des séries respectives de la publication. Pour plus d'information sur CANSIM, composer le (613) 951-8200 ou écrire à la Division du marketing, Statistique Canada, Immeuble R.H. Coats Building, Ottawa, K1A 0T6.

Cette publication a été rédigée sous la direction de:

- Louis Marc Ducharme, Directeur adjoint, Division des prix
- François Bordé, Chef, Section des prix à la consommation
- Harold Harnarine, Chef, Sous-section de l'information et de l'analyse courante

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

HIGHLIGHTS

Consumer Price Behaviour

Fourth quarter, 1993

Trends in the All-items Index

The All-items Consumer Price Index (CPI) for Canada rose by 0.5% prior to seasonal adjustment in the fourth quarter (September-December) 1993. This follows a slightly smaller advance of 0.4% for the previous three month period. The fourth quarter rate of change was slightly lower than that of the same period in 1992 when the index advanced 0.6%. The three-month compound annual rate of change during the fourth quarter was 1.9%, as compared with 2.6% for the same period in 1992.

During the fourth quarter, the CPI increased on a month-to- month basis, by 0.2% in October and 0.5% in November, but decreased by 0.2% in December. Compared with the corresponding month last year, the CPI increased by 1.9% in both October and November; in December the index rose by 1.7%. The resulting index levels were 130.9 (1986 = 100), and 131.5 and 131.3, respectively.

On a seasonally adjusted basis1, the All-items CPI for Canada moved up 0.1% in October and 0.2% in both November and December. In terms of the current annual rate of change, the rate of increase for the CPI All-items accelerated to 2.8% in November compared with 2.5% in October. The December change in the index, however, fell to 2.2%.

Major Components (not seasonally adjusted)

Price increases were recorded for five of the seven major components in the fourth quarter while two registered a decline. As in the last quarter, the most significant upward pressure originated from the Transportation index which moved up 2.1%. This was largely the result of a 6.7% increase in the average price for new automobile models which were initially recorded in November; the impact, however, was partly offset by the continued decline in the Gasoline index (-6.0%).

The second major contributor to the overall increase in prices was the Food index which moved up 0.9%, completely neutralizing the previous quarter's 1.0% decline. The upward movement in food prices was the result of important price increases for most categories of fresh vegetables (23.1%) which were, in many cases, imported during those months. A 6.6% decline in the Fresh Fruit index held back the increase in the overall Food index.

POINTS SAILLANTS

Comportement des prix à la consommation

Quatrième trimestre de 1993

Tendances de l'indice d'ensemble

L'indice d'ensemble des prix à la consommation (IPC) pour le Canada a augmenté de 0,5% avant désaisonnalisation au cours du quatrième trimestre (septembre-décembre) de 1993. Cette hausse fait suite à l'augmentation légèrement inférieure de 0,4% enregistrée au cours du trimestre précédent. Le taux de variation enregistré au cours du quatrième trimestre est inférieur à celui enregistré pendant la même période de 1992, où l'indice avait augmenté de 0,6%. Le taux de variation annuel composé pour trois mois au cours du quatrième trimestre est de 1,9%, en comparaison de 2,6% pour la période équivalente de 1992.

Durant le quatrième trimestre, l'augmentation d'un mois à l'autre de l'IPC était de 0,2% en octobre et de 0,5% en novembre, mais a enregistré une diminution de 0,2% en décembre. En comparaison avec le mois correspondant de l'année précédente, l'IPC a augmenté de 1,9% tant en octobre qu'en novembre; en décembre, l'indice a augmenté de 1,7%. Il en résulte des niveaux de l'indice qui s'élèvent respectivement à 130,9 (1986 = 100), 131,5 et 131,3.

Sur une base désaisonnalisée¹, l'indice d'ensemble de l'IPC pour le Canada a augmenté de 0,1% en octobre et de 0,2% tant en novembre qu'en décembre. En ce qui a trait au taux annuel courant de variation, le taux d'accroissement pour l'indice d'ensemble de l'IPC a augmenté de 2,8% en novembre, en comparaison avec 2,5% en octobre. Le taux de variation de l'indice enregistré en décembre a diminué de 2,2%.

Principales composantes (non désaisonnalisées)

On enregistre durant le quatrième trimestre des augmentations de prix pour cinq des sept principales composantes, les deux autres enregistrant une baisse. Comme pour le trimestre précédent, la pression à la hausse la plus importante provient de l'indice des transports, qui avance de 2,1%. La progression résulte en grande partie de l'augmentation de 6,7% du prix moyen des nouveaux modèles d'automobiles, qui est rendu initialement public au mois de novembre; l'effet toutefois est partiellement compensé par la baisse continue de l'indice de l'essence (-6,0%).

Le deuxième facteur le plus important contribuant à l'augmentation de l'ensemble des prix réside dans l'indice des aliments, qui enregistre une hausse de 0,9%, ce qui annule complètement la baisse de 1,0% enregistrée au cours du trimestre précédent. Le mouvement à la hausse des prix des aliments résulte de l'augmentation importante des prix de la plupart des catégories de légumes frais (23,1%), qui ont été dans beaucoup de cas, importés durant ces mois. Une baisse de 6.6% de l'indice des fruits frais freine l'augmentation de l'indice de l'ensemble des aliments.

As a consequence of offsetting effects stemming from increases for both property taxes (3.0%) and piped gas (10.1%), and decreases in mortgage interest costs (1.9%), the Housing index edged up 0.1%. This was somewhat smaller than that registered for the previous quarter when the index increased 0.5%. Additional upward influences, although to a smaller degree, were registered for the Health and Personal Care (0.1%), and the Recreation, Reading, and Education (0.5%) components.

After rising by 0.3% in the last quarter, the Clothing index decreased by 1.4% in the fourth quarter. The decline was largely due to seasonal sale prices for women's wear (-1.8%) and men's wear (-1.6%). The other source of downward pressure on the All-items CPI came from the Tobacco Products and Alcoholic Beverages index which edged down 0.3%. The prices for cigarettes and alcoholic beverages having declined by 0.3% and 0.2%, respectively.

Special Aggregates (not seasonally adjusted)

The Goods index rose 0.7% in the fourth quarter compared to a 0.2% decline in the previous quarter. The major contributor to the rise was a 2.9% increase in the Durable Goods index as a result of the inclusion of new car prices in the November index, (as is always the case). The Semi-durable Goods index edged down 1.0%. The 0.1% increase in the Non-durable Goods index had only a marginal effect on the overall rate of increase of the CPI. The Services index in the fourth quarter decelerated, registering 0.3% compared with 1.0% in the previous quarter.

The All-items excluding Food and Energy index moved up by 0.5% in the fourth quarter. The combined Food and Energy index rose by 0.2%, which was in sharp contrast to the 0.9% drop recorded in the previous quarter. Taken alone, the Energy index declined by 1.7%.

Canada-Other Country Comparisons

Compared with the United States, the monthly percentage change for the All-items CPI prior to seasonal adjustment for Canada was lower for two of the three months of the fourth quarter in 1993. In October, the Canada CPI grew 0.2% against 0.4% for the United States; consumer price changes in November were 0.5% in Canada as opposed to 0.1% in the United States; as for December, the corresponding changes were -0.2% for Canada and 0.0% for the United States. As in the last quarter, the year-over-year changes in the CPI were much smaller for Canada than for the United States. While Canada's CPI moved down from 1.9% to 1.7% from October to December, the United States' rate went from 2.8% to 2.7%.

L'indice de l'habitation se redresse de 0,1% suite aux effets compensateurs provenant des augmentations enregistrées tant pour les impôts fonciers (3,0%) que pour le gaz naturel (10,1%), et des diminutions enregistrées dans les coûts des intérêts hypothécaires (1,9%). Cette augmentation est quelque peu inférieure à celle enregistrée au cours du trimestre précédent, durant lequel l'indice avait augmenté de 0,5%. On enregistre d'autres mouvements à la hausse, quoique de moindre ampleur, dans la composante de la santé et des soins personnels (0,1%), et dans celle des loisirs, lecture et formation (0,5%).

Après avoir augmenté de 0,3% au cours du dernier trimestre, l'indice de l'habillement diminue de 1,4% au quatrième trimestre. Cette baisse est due en grande partie aux rabais de la saison pour les vêtements pour femmes (-1,8%) et pour hommes (-1,6%). L'autre source des pressions à la baisse s'exerçant sur l'indice d'ensemble de l'IPC provient de l'indice des produits du tabac et des boissons alcoolisées, qui fléchit de 0,3%. Les prix des cigarettes et des boissons alcoolisées enregistrent respectivement des diminutions de 0,3% et de 0,2%.

Agrégats spéciaux (non désaisonnalisés)

L'indice des biens augmente de 0,7% au cours du quatrième trimestre, en comparaison d'une baisse de 0,2% enregistrée au cours du trimestre précédent. Le facteur principal de cette augmentation réside dans la hausse de 2,9% enregistrée dans l'indice des biens durables suite à l'introduction dans l'indice de novembre (comme c'est toujours le cas) des prix des nouvelles voitures. L'indice des biens semi-durables a fléchit de 1,0%. L'augmentation de 0,1% de l'indice des biens non durables n'a qu'un effet secondaire sur le taux d'augmentation global de l'IPC. L'indice des services ralentit durant le quatrième trimestre, augmentant de 0,3% en comparaison de 1,0% au cours du trimestre précédent.

L'indice d'ensemble sans les aliments et l'énergie enregistre une augmentation de 0,5% au quatrième trimestre. L'indice combiné des aliments et de l'énergie augmente de 0,2%, ce qui représente un contraste marqué par rapport à la baisse de 0,9% enregistrée au cours du trimestre précédent. Considéré séparément, l'indice de l'énergie enregistre une diminution de 1,7%.

Comparaisons entre le Canada et les autres pays

En comparaison avec les États-Unis, la variation mensuelle en pourcentage de l'IPC d'ensemble avant désaisonnalisation pour le Canada est inférieur pendant deux des trois mois constituant le quatrième trimestre de 1993. En octobre, l'IPC du Canada augmente de 0,2% par rapport à 0,4% aux États-Unis; la variation des prix à la consommation en novembre est de 0,5% au Canada, en comparaison avec 0,1% aux États-Unis; en décembre, les changements correspondants sont de -0,2% au Canada et de 0,0% aux États-Unis. Comme pour le trimestre précédent, les changements d'une année à l'autre pour l'IPC sont sensiblement inférieurs au Canada par rapport aux États-Unis. Alors que l'IPC du Canada enregistre un mouvement à la baisse de 1,9% à 1,7% entre octobre et décembre, le taux des États-Unis passe de 2,8% à 2,7%.

Among the other selected industrial countries, year-over- year consumer price movements for the months comprising the fourth quarter varied from a low of 0.9% for Japan to a high of 4.8% for Sweden. Only Japan, the United Kingdom and Denmark had generally lower rates of inflation throughout the fourth quarter than Canada.

Average Retail Prices for Regular Unleaded Gasoline

At the end of the fourth quarter, the average retail prices for regular unleaded gasoline at self-service stations were highest in Québec City (56.5 cents per liter). The lowest average prices were found in Edmonton (43.8 cents a liter). From September to December, price decreases were recorded for fourteen of the sixteen selected cities. The largest variations were recorded in Ottawa, Toronto and Montreal where average prices declined by 5.4 cents, 4.7 cents and 4.3 cents, respectively. Only two of the cities had price increases. The average retail prices went from 53.9 cents in Regina and 51.3 cents in Saskatoon to 54.9 cents in December for both cities.

Average Retail Prices of Fuel Oil

No major changes in the retail prices of fuel oil were reported for any of the selected cities during the fourth quarter. The average prices remained highest in Winnipeg, where fuel oil increased from 42.6 cents per liter to 42.8 cents per liter during the period. The lowest prices were found in Regina and Charlottetown/Summerside. In the case of Regina, the average price per liter decreased from 36.2 cents per liter to 35.9 cents, while that of Charlottetown/ Summerside has remained at 36.0 cents per liter since February.

Parmi les autres pays industriels choisis, les mouvements des prix à la consommation d'une année à l'autre pour les mois composant le quatrième trimestre varient d'un creux de 0,9% pour le Japon à un sommet de 4,8% pour la Suède. Seuls le Japon, le Royaume-Uni et le Danemark enregistrent régulièrement des taux d'inflation inférieurs à ceux du Canada tout au long du quatrième trimestre.

Prix de détail moyens pour l'essence sans plomb ordinaire

A la fin du quatrième trimestre aux stations libre service, c'est dans la ville de Québec que l'on enregistre les prix de détail moyens les plus élevés pour l'essence sans plomb ordinaire (56.5 cents le litre). Les prix moyens les plus bas sont enregistrés à Edmonton (43.8 cents le litre). De septembre à décembre des diminutions de prix sont enregistrées dans quatorze des seize villes choisies. Les variations les plus importantes sont enregistrées à Ottawa, Toronto et Montréal où les prix moyens ont diminué respectivement de 5.4 cents, de 4.7 cents et 4.3 cents. Seulemnt deux villes enregistrent des augmentations de prix au troisième trimestre. Le prix de détail moyen de l'essence est passé de 53.9 cents le litre à Regina et 54.9 cents le litre à Saskatoon en septembre à 54.9 cents pour ces villes en décembre.

Prix de détail moyens du mazout

On n'enregistre aucun changement important des prix de détail du combustible dans les différentes villes choisies au cours du quatrième trimestre. Les prix moyens demeurent les plus élevés à Winnipeg, où le mazout passe durant cette période de 42.6 cents le litre à 42.8 cents le litre. Les prix les plus bas sont enregistrés à Regina et à Charlottetown/Summerside. Dans le cas de Regina, le prix moyen du litre diminue de 36.2 cents le litre à 35.9 cents. Dans le cas de Charlottetown/ Summerside, le prix moyen demeure depuis le mois de février à 36.0 cents le litre.

Introduction

This quarterly publication presents a compendium of consumer prices and price index related information of both a current and historical nature. It provides a wide range of timely and detailed statistical information and serves as a complement to the monthly publication, The Consumer Price Index, Catalogue 62-001.

Part I of this report presents a synopsis of current consumer price index movements. This is presented in the form of tabular and graphic information. Some tabular information on international prices is also presented, in particular for some Canada - U.S. comparisons.

Parts II and III provide a detailed historical summary of monthly consumer price indexes in recent years. This summary contains considerable disaggregated information, again in the perspective of both the urban Canada and the separate city contexts.

Part IV of this report contains tables for the All-items and seven major components for each province.

Place-to-place comparative retail price information forms Part V of the report. This segment presents the most recent data with regards to average city retail prices and inter-city indexes of retail price differentials. Special feature articles, which are periodically included in the publication, are presented in Part VI.

Appendices serve as sources of reference for the statistical data presented in the preceding segments of the report. Appendices 1 and 2 contain explanatory notes pertaining to consumer price index data; Appendix 3 provides reference material for seasonal adjustment methodology in the context of its application to the Consumer Price Index; Appendices 4, 5 and 6 present background information relating to place-to-place retail price comparisons.

Introduction

Cette publication présente un résumé de renseignements historiques et courants des prix à la consommation et des indices de prix. Elle fournit une gamme d'informations statistiques étendue, d'une façon détaillée, et sert de complément à la publication mensuelle, L'indice des prix à la consommation, n° 62-001 au catalogue.

La partie I de ce rapport contient un aperçu synoptique qui présente les mouvements courants des prix à la consommation. Ces informations sont présentées sous la forme de tableaux et de graphiques. Des tableaux comportant de l'information sur les prix internationaux sont également présentés, particulièrement en ce qui regarde certaines comparaisons entre le Canada et les É.-U.

Les parties II et III fournissent un résumé historique détaillé des indices mensuels des prix à la consommation des dernières années. Ce résumé contient des renseignements pour le Canada et les villes à un niveau beaucoup plus désagrégé.

La partie IV de ce rapport contient des tableaux pour l'ensemble et les sept composantes principales pour chaque province.

Des informations sur les prix de détail comparés d'un endroit à l'autre composent la partie V de ce rapport. Cette section fournit les plus récentes données au sujet des prix de détail moyens par ville et des indices comparatifs des prix de détail entre les villes. Les articles spéciaux, qui font périodiquement partie de cette publication, se retrouvent à la partie VI.

Les appendices servent de référence aux données statistique présentées dans les parties précédentes du rapport. Les appendices 1 et 2 contiennent les notes explicatives reliées aux données de l'indice des prix à la consommation; l'appendice 3 fait référence à la méthode des ajustements saisonniers dans son application à l'indice des prix à la consommation; les appendices 4, 5 et 6 fournissent des informations de base reliées aux comparaisons de prix d'un endroit à l'autre.

Seasonal adjustment of the Consumer Price Index for Canada is undertaken separately for each of the seven major components of the CPI with the calculation being made before linking or chaining takes place. The resulting seven major component indexes as well as the All-items and All-items excluding Food aggregates are then "linked" or "chained" to form continuous series starting from September 1978. The seasonally adjusted monthly data are published without further revision until the year end, when revisions to any months data may be made from January 1989 forward (the start of the 1986 basket). These revision are published with the January release.

La désaisonnalisation de l'indice des prix à la consommation pour le Canada est effectuée séparément pour chacune des sept composantes principale de l'IPC. Les calculs sont faits avant de procéder à l'enchaînement. Les indices des sept composantes principales, d'ensemble et d'ensemble sans les aliments ainsi obtenus sont ensuite "enchaînés" pour déterminer les séries continues à partir de septembre 1978. Les données désaisonnalisées mensuelles sont publiés sans autre révision jusqu'à la fin de l'année où une révision peut être effectuée pour tout mois à compter de janvier 1989 (le début du panier de 1986). Ces révisions sont émis avec la publication de lanvier.

TABLE 2. Purchasing Power of the Consumer Dollar Expressed in Cents, Compared to 1986, 1984-1993

TABLEAU 2. Pouvoir d'achat du dollar à la consommation 1 (en cents), par rapport à 1986, 1984-1993

For explanatory notes and detail, see Appendix 4.

Blanks appear on this table where the quality and (or) quantity of the prices were insufficient to produce a good average. Whitehorse is not included in weighted city averages.

As of October 1990, tenderloin removed in all cities.

Chicoutimi (450 g).

One package yielding 2.25 L in total.

Pour de plus amples renseignements et détails, consulter l'appendice 4.
Nous avons laissé les espaces en blanc dans ce tableau lorsque la qualité et (ou) la quantité des prix relevés ne nous a pas permis d'établir des moyennes fiables.
Mittehorse n'est pas inclus dans les moyennes pondérées des villes.
À compter d'octobre 1990, les prix du biffeck de surlonge sans la partie du filet sont relevés dans toutes les villes.
Chicoutimi (450 g).
Un paquet donnant en tout 2.25 L

THE CONSUMER PRICE INDEX

The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is of an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time. Changes in the costs of this basket are therefore due only to "pure" price movements, i.e., price movements that are not associated with changes in the quality and/or quantity of the set of consumer goods and services in the basket.

The Consumer Price Index for each city measures price change from one time period to another within that specific city. Thus, while city CPI's show the **movement** of prices over time in each city, they do not indicate price level differences between cities or between cities and Canada. Such inter-city price comparisons for a selected number of items sold in grocery stores for 26 cities are available at present in Part V of this publication. Inter-spatial indexes covering approximately two thirds of the CPI basket for a selected number of cities are also available in this section.

Coverage

Beginning with the December 1988 to January 1989 price change, the weights used in the Consumer Price Index are those pertaining to 1986 expenditure patterns. Data used for establishing these patterns were obtained through the 1986 Family Expenditure Surveys. The expenditure data represents the expenditures of all private households (families and individuals) living in Canadian urban centres with a population of 30,000 or more. Population estimates for 1986 revealed 82 such urban centres. Largely due to limitations on the availability of detailed information on consumer expenditures it has become necessary to group the 82 urban centres into 34 urban centre strata. An urban centre stratum may be interpreted as a geographical unit around which the sampling framework of the CPI is constructed.

Separate CPI's are published for 18 of these centres which, together, accounted for approximately 75% of the total 1986 current consumption expenditures reported in the 82 centres. These 18 centres were, in part, selected in order to permit the publication of at least one CPI in each province. Some 300 commodities are priced in each of these 18 cities while in the remaining 64 urban centres, the number of commodities surveyed is fewer, with clothing and home furnishings being the notable exclusions.

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION

L'indice des prix à la consommation (IPC) mesure la variation dans le temps, exprimée en pourcentage, du coût à l'achat d'un "panier" constant de biens et de services, qui représente les achats faits par un groupe particulier de la population au cours d'une période donnée. Le "panier" renferme des biens et des services de quantité et de qualité invariables ou équivalentes et dont les prix sont mesurables au cours du temps. C'est ainsi que les variations de son coût résultent uniquement des mouvements "purs" de prix, c.-à-d. des mouvements de prix qui ne sont pas attribuables à des changements de qualité ou de quantité des biens et services de consommation du panier.

L'indice des prix à la consommation de chaque agglomération urbaine mesure les variations de prix entre deux périodes dans cette agglomération. Aussi les IPC des villes indiquent-ils le **mouvement** des prix dans le temps dans chaque agglomération, mais non les différences de niveau des prix entre les villes ou bien entre les villes et le Canada. De telles comparaisons entre les villes en ce qui concerne les niveaux de prix de certains articles vendus dans les épiceries sont présentées, pour 26 villes, à la Partie V de la présente publication. On y trouve également, pour certaines villes, des indices interspatiaux portant sur les deux tiers environ du panier de l'IPC.

Champ d'observation

À compter de janvier 1989, les pondérations utilisées pour l'indice des prix à la consommation se rapportent à la composition des dépenses de 1986. Les données qui ont servi à établir cette composition proviennent des enquêtes sur les dépenses des familles de 1986. Les données sur les dépenses représentent les dépenses de tous les ménages privés (familles et personnes seules) qui habitent les centres urbains du Canada qui comptent 30,000 habitants ou plus. D'après les estimations démographiques pour 1986, 82 centres urbains répondent à ce critère de population. En raison principalement du manque de renseignements détaillés sur les dépenses des consommateurs, il a été nécessaire de grouper les 82 centres urbains en 34 strates de centres urbains. Une strate de centres urbains peut se définir comme une unité géographique à partir de laquelle est constituée la base de sondage de l'IPC.

Des IPC distincts sont publiés pour 18 centres qui, ensemble, interviennent pour près de 75% du total des dépenses courantes de consommation déclarées en 1986 par les 82 centres. Les 18 centres ont été choisis, en partie, parce qu'ils permettent la publication d'un IPC au moins dans chaque province. On relève les prix de quelque 300 produits dans chacune des 18 villes; ce nombre est plus faible dans les 64 centres restants, les produits exclus étant principalement l'habillement et les articles d'ameublement.

Prices

The prices used in the calculation of the CPI are retail prices without regard to whether they are described as regular, special, etc. inclusive of all sales and excise taxes applicable to individual commodities. The pricing cycle starts in the latter part of each month and extends to the middle part of the following month. Although prices for most CPI items are collected on a monthly basis, some are priced less frequently, e.g., property taxes, automobile registration fees, dry cleaning services. However, such goods or services scheduled for pricing at less than monthly intervals will be priced in any month when there is evidence to suggest that significant price changes may occur prior to the next regularly scheduled pricing. The number of prices observed in a given city depends upon the importance of that city's expenditures to the total Canada expenditure and also the nature of the commodity, with those commodities displaying a high variability of price change generally requiring more observations. The selection of outlets in which prices are to be collected is judgmental (other than for rents) with the sample being designed to cover volume selling establishments.

Weights and Linking

The weights used in the calculation of the Consumer Price Index are periodically updated. This is a necessary procedure which serves to ensure that weights reflect changes in consumer expenditures thereby maintaining the relevancy of the index. As a result, different weighting systems are in effect in different time periods.

The 1982 family expenditure patterns were used to compile the CPI from January 1985 to December 1988. In January 1989 the 1982 weights were replaced by those derived from the expenditure patterns of 1986. This updating continues the policy of updating on a four-year cycle.

Prix

Les prix servant au calcul de l'IPC sont les prix au détail qu'il s'agisse de prix réguliers, de prix spéciaux, etc. et englobent toutes les taxes de vente, d'accise et autres taxes imposées aux produits. Le cycle des relevés commence vers la fin de chaque mois et se termine au milieu du mois suivant. Les prix de la plupart des articles de l'IPC sont recueillis chaque mois, mais certains articles sont observés moins souvent, notamment l'impôt foncier, l'immatriculation d'automobiles, le nettovage à sec. Cependant, dans le cas des biens et services dont l'observation est prévue à des intervalles de plus d'un mois, on en relèvera le prix dans tout mois où il apparaît qu'une variation importante se produira avant le prochain relevé prévu au calendrier. Le nombre de prix observés dans une ville donnée dépend de l'importance des dépenses de cette ville par rapport au total des dépenses pour le Canada ainsi que de la nature du produit, les observations étant généralement plus fréquentes pour les produits dont les prix varient beaucoup. Le choix des points de vente où les prix doivent être recueillis est fait au jugé (sauf pour les loyers) et l'échantillon a pour but de couvrir les établissements à gros volume de vente.

Pondérations et enchaînement

Les pondérations utilisées dans le calcul de l'indice des prix à la consommation sont mises à jour périodiquement. Ce procédé est nécessaire pour que les pondérations tiennent compte des changements qui s'opèrent au niveau des dépenses à la consommation et, par le fait même, pour que l'indice conserve son utilité. En conséquence, différents schémas de pondérations sont utilisés pour des périodes de temps distinctes.

La composition des dépenses des familles de 1982 a servi au calcul de l'IPC à partir de janvier 1985 jusqu'à décembre 1988. En janvier 1989, les pondérations de 1982 ont été remplacées par d'autres dérivées de la composition des dépenses de 1986. Cette mise à jour poursuit la politique de Statistique Canada de mettre à jour les pondérations régulièrement à tous les quatre ans.

TEXT TABLE II. Comparison of 1982 and 1986 Expenditure Weights Used in the Consumer Price Index, by Major Component for Canada

TABLEAU EXPLICATIF II. Comparaison des pondérations des dépenses de 1982 et de 1986 utilisées pour l'indice des prix à la consommation, par composante principale pour le Canada

Major components	Weights 1982	Weights 1986
Composantes principales	Pondérations 1982	Pondérations 1986
All-items - Ensemble	100.00¹	100.00 ¹
Food - Aliments Housing - Habitation Clothing - Habillement Transportation - Transports Health and personal care - Santé et soins personnels Recreation, reading and education - Loisirs, lecture et formation Tobacco products and alcoholic beverages - Produits du tabac et boissons alcoolisées	20.02 38.14 8.37 15.75 4.02 8.25	18.05 36.32 8.69 18.29 4.20 8.84

¹ Figures may not add up due to rounding.

The weights shown in Text Table II represent expenditures in 1982 (1982 quantities valued in 1982 prices) and in 1986 (1986 quantities valued in 1986 prices). They cannot be used to reconstruct or reaggregate indexes on a 1981 = 100 time base. The methodology required to permit such a reaggregation can be obtained on request by contacting the:

Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (Telephone: (613) 951-9606).

The indexes based on 1986 weights were linked or connected in December 1988 to the appropriate indexes based on 1982 weights which had been in use since January 1985.

This linking procedure ensures that conceptually equivalent series are made continuous over time. It should be noted that the linking method is such that aggregate indexes cannot be considered as the direct average of their respective component indexes. In exceptional cases, this may cause the level, as well as the percentage changes, of an aggregate index to fall slightly outside the range of its component indexes.

Les pondérations du tableau explicatif II représentent les dépenses en 1982 (quantités et prix de 1982) et en 1986 (quantités et prix de 1986). Elles ne peuvent servir à reconstruire ni à réagréger des indices sur la base de 1981 = 100. La méthode à suivre pour une telle reconstruction peut être obtenue sur demande auprès de la:

Section des prix à la consommation Division des prix, Statistique Canada Ottawa (Ontario) K1A 0T6 (Téléphone: (613) 951-9606).

Les indices fondés sur les pondérations de 1986 ont été enchaînés ou raccordés en décembre 1988 aux indices correspondants fondés sur les pondérations de 1982, en usage depuis janvier 1985.

Grâce à cet enchaînement, des séries équivalentes sur le plan conceptuel sont continues dans le temps. On notera que cette méthode d'enchaînement ne permet pas de considérer les indices composés comme des moyennes directes de leur composante respective. Dans des cas exceptionnels, le niveau et les variations en pourcentage d'un indice agrégé peuvent ainsi dépasser légèrement l'étendue des indices composantes.

¹ Les chiffres avant été arrondis, les totaux peuvent ne pas correspondre.

Time Base

The All-items Consumer Price Index for Canada and each index city is expressed in terms of 1986 = 100, except for certain items, as noted, where the pricing survey was introduced subsequent to that year. The 1986 = 100 time base became effective with the release of the June 1990 index. The base period for the Consumer Price Index, as well as for other Statistics Canada index series, is revised periodically.

Rebasing the CPI is a straightforward arithmetic operation which does not change the picture of economic events. Percentage changes computed will be the same, except for small differences due to rounding, regardless of whether the 1981 = 100 or 1986 = 100 time base is used. Rebasing of the CPI does not involve changes in the base period expenditure weights. Furthermore, the method employed in converting to the 1986 = 100 time base does not affect the continuity or statistical comparability of the index series.

It should be noted, however, that although the percentage changes in an index series will be the same, except for small differences due to rounding, regardless of whether they are computed from the 1981 or 1986 time base series, the same is not true for changes measured in terms of index points.

Current Annual Rate of Change

A rate of change representative of an annual movement in prices may be derived in several ways, none of which is free of shortcomings and interpretational problems. Statistics Canada presently calculates three measures of annual change, the percentage change between any given month and the same month a year ago, the percentage change between annual averages based on a calendar year and the current annual rate of change.

The method selected for calculating the current seasonally adjusted annual rate of change in the CPI in Table 1 involves compounding the growth rate over the latest three-month period on the seasonally adjust ed level (see Appendix 3). For more information on CPI growth rates, see "A Note on the Current Annual Rate of Change of the Consumer Price Index", Retail Prices and Living Costs — Service Bulletin (Catalogue 62-005), Vol. 4, No. 4, April 1975.

Reconstructed Indexes

With the release of the January 1985 Consumer Price Index, certain series were reconstructed historically to reflect the introduction of the Consumer Classification System of Statistics Canada which was introduced with the 1982 Updating. A few additional reconstructions were made with the introduction of the 1986 basket. For further information, contact Prices Division (613-951-9606 or 951-3353).

Période de base

L'indice d'ensemble des prix à la consommation du Canada et les indices de chaque ville sont exprimés sur la base de 1986 = 100, sauf pour certains articles, qui sont signalés et dont l'enquête sur les prix n'a été introduite qu'après cette année là. La base temporelle de 1986 = 100 est devenue effective à partir de la diffusion de l'indice de juin 1990. La période de base pour l'indice des prix à la consommation, et pour d'autres séries d'indices de Statistique Canada, fait l'objet d'une révision periodiquement.

Pour recalculer la base de l'IPC, il suffit d'effectuer une opération arithmétique simple qui ne modifie pas le tableau des événements économiques. Les variations en pourcentage calculées sur la base 1981 = 100 et 1986 = 100 sont équivalentes, les petites différences étant attribuables à l'arrondissement. Le calcul de la nouvelle base de l'IPC ne change pas les pondérations des dépenses de la période de base. De plus, la méthode de conversion selon la base 1986 = 100 ne compromet pas la continuité ou la comparabilité statistique des séries d'indices.

Toutefois, même si les variations en pourcentage d'une série d'indices seront identiques, à quelques différences d'arrondissement près, quelle que soit la base (1981 ou 1986) utilisée pour les calculer, tel ne sera pas le cas de ses mouvements exprimés en points.

Taux de variation annuel courant

Plusieurs méthodes permettent de dériver un taux de variation pour représenter le mouvement annuel des prix, mais toutes comportent des points faibles et des problèmes d'interprétation. Statistique Canada calcule actuellement trois mesures de la variation annuelle, soit le changement en pourcentage pour un mois donné par rapport à un autre et au mois correspondant de l'année précédente, le changement en pourcentage entre des moyennes annuelles basées sur l'année civile et le taux de variation annuel courant.

La méthode retenue pour calculer le taux de variation annuel courant après désaisonnalisation de l'IPC au tableau 1 consiste à prendre un taux de croissance composé sur le niveau désaisonnalisé des trois derniers mois (voir appendice 3). Pour plus de renseignements sur le taux de croissance de l'IPC, se reporter à "Note sur le taux annuel courant de l'indice des prix à la consommation", **Prix de détail et coût de la vie** - Bulletin de service (n° 62-005 au catalogue), vol. 4, n° 4, avril 1975.

Indices reconstruits

À compter de l'émission de l'indice des prix à la consommation de janvier 1985, certaines séries historiques ont été reconstruites de façon à ce qu'elles représentent l'introduction du système de classification de la consommation de Statistique Canada qui fut introduit avec la mise à jour de 1982. L'adoption du panier de 1986 a amené quelques autres remaniements. Pour plus de renseignements, communiquez avec la Divison des prix (613-951-9606 ou 951-3353).

Whitehorse and Yellowknife

In keeping with its commitment to publish consumer price indexes for at least one urban centre in each province and territory. Statistics Canada, as part of the 1978 Updating, began to develop consumer price indexes for the urban centres of Whitehorse and Yellowknife. As no Family Expenditure Survey was conducted in these centres in 1978, 1972 expenditure patterns for these two centres were extrapolated to 1978 using the change in expenditure patterns between 1972 and 1978 in other urban centres. As the 1978 expenditure patterns were incorporated into the official CPI, commencing with the release of the April 1982 index, consumer price indexes for Whitehorse and Yellowknife were developed on a March 1982 = 100 time reference base. Since the expenditure patterns for Whitehorse and Yellowknife were derived and not directly observed, the indexes for these two urban centres were not included in the calculation of the official CPI for Canada. With the introduction of the 1982 Updating, these two centres were included in the calculation of the official CPI for Canada.

It was not possible, at this time, to develop an owned accommodation index for these two centres comparable to that in concept of the national CPI. The nature and the relatively small size of the housing market in these two centres is such that Statistics Canada was unable to construct reliable price indexes for new houses. It was decided that as an interim and only available alternative measure, the price movement of rental accommodation would be used to represent that of owned accommodation. As a consequence, the All-items indexes published for these centres are not comparable to those for Canada or for any of the sixteen urban centres for which a CPI is produced. The rent data used are collected on a quarterly basis by the respective territorial governments. For rents, the data are incorporated into the consumer price indexes for these two centres with a two-month lag.

Provincial CPI's

Consumer price indexes for provincial urban centres were published for the first time in the July-September 1988 issue of this publication. An article describing the coverage and method of these indexes was published in the same issue. Updated Provincial CPI's are now a permanent feature of this publication.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in **The Consumer Price Index**, **Reference Paper**, **Updating Based on 1986 Expenditures**, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in Family Expenditure in Canada, 1986, Catalogue 62-555.

Whitehorse et Yellowknife

Statistique Canada, conformément à son engagement de publier des indices des prix à la consommation pour au moins un centre urbain dans chaque province et territoire, a commencé à élaborer des indices de prix à la consommation pour les centres urbains de Whitehorse et Yellowknife dans le cadre de la mise à jour de 1978. Puisqu'il n'y a pas eu dans ces centres d'enquête sur les dépenses des familles en 1978, les données sur la composition des dépenses de 1972 pour ces deux villes ont été extrapolées pour l'année 1978 en se fondant sur l'évolution de la composition des dépenses entre 1972 et 1978 dans d'autres centres urbains. Étant donné que la composition des dépenses de 1978 a été incorporée dans l'IPC officiel à la consommation avec l'indice d'avril 1982, les indices des prix à la consommation pour Whitehorse et Yellowknife ont été élaborés sur la base mars 1982 = 100. La composition des dépenses pour Whitehorse et Yellowknife avant été dérivée plutôt qu'observée directement, les indices pour ces deux centres urbains n'étaient pas compris dans le calcul de l'IPC officiel pour le Canada. Avec l'introduction de la mise à jour de 1982, ces deux centres ont été pris en compte lors du calcul de l'IPC officiel pour le Canada.

Il n'a pas été possible d'élaborer, pour ces deux centres, un indice du logement en propriété qui soit conceptuellement comparable à celui incorporé à l'IPC national. La nature et la petitesse relative du marché de l'habitation dans ces deux centres ont empêché Statistique Canada de construire des indices de prix fiables pour les maisons neuves. Comme c'est la seule mesure disponible, il a été décidé d'utiliser, pour le moment, le mouvement des prix du logement en location pour représenter celui du logement en propriété. En conséquence, les indices d'ensemble publiés pour ces centres ne sont pas comparables à ceux du Canada ou d'aucun des seize autres centres urbains pour lesquels un IPC est calculé. Les données sur les loyers utilisées sont recueillies trimestriellement par les deux administrations publiques territoriales. S'agissant des loyers, les données pour ces deux centres sont incorporées aux indices de prix à la consommation avec deux mois de retard.

IPC Provinciaux

Des indices de prix à la consommation pour les centres urbains provinciaux ont été publiés pour la première fois dans le numéro de juillet-septembre 1988 de la présente publication. Un article décrivant la couverture et la méthodologie de ces indices est paru dans ce même numéro. Les IPC provinciaux mis à jour sont devenus partie intégrante de la présente publication.

Renseignements supplémentaires et publications connexes

Le Document de référence de l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1986, (hors-série), n° 62-553 au catalogue, décrit en détail les méthodes et les concepts de l'IPC. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans Dépenses des familles au Canada, 1986, n° 62-555 au catalogue.

The latest information on the Consumer Price Index for Canada and 18 cities is also available in the **Consumer Price Index**, Catalogue 62-001 monthly. In addition, selected educational and promotional material are available. For these and further information contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606 or 613-951-3353).

De plus, les derniers renseignements sur l'indice des prix à la consommation du Canada et de 18 villes sont publiés dans le bulletin mensuel **L'indice des prix à la consommation,** n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606 ou 613-951-3353).

THE PURCHASING POWER OF THE CONSUMER DOLLAR

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

Changes in the purchasing power of the consumer dollar, put simply, are inversely related to movements in the Consumer Price Index. For example, between 1986 and June 1990, consumer prices as measured by the CPI rose 19.2% such that, goods and services which could have been purchased for \$100.00 in 1986 would cost \$119.20 in June 1990. Each consumer dollar in June 1990 therefore buys less than in 1986. The extent to which the purchasing power of the dollar has declined is matched precisely by the increase in the consumer price index. Thus the purchasing power of a dollar in June 1990 compared to the 1986

dollar was 83.9 (100 cents X
$$\frac{100.0}{119.2}$$
 = 83.9 cents).

This process may be interpreted as the deflation of money, that is, adjusting values expressed in monetary terms in order to eliminate price effects.

Users of the tabulation which shows the purchasing power of the consumer dollar compared to the 1986 dollar at different points in time (Table 2) should note that, as in the case of the Consumer Price Index from which the numbers are derived, the data may not measure closely the experiences of any one specific family within the large urban group to which the CPI relates. At the same time changes in the purchasing power of the dollar are not expected to match the experience of other population groups whose expen diture behaviour is significantly different from those associated with the CPI target population. It should also be noted that like the CPI, changes in the purchasing power of the dollar are not directly affected by changes in income taxes, unemployment insurance premiums, other types of security payments and all other goods and services that are not included in the CPI basket.

Appendice 2

LE POUVOIR D'ACHAT DU DOLLAR DE CONSOMMATION

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie et la baisse des prix est liée à la hausse du pouvoir d'achat.

En somme, le pouvoir d'achat du dollar de consommation varie en relation inverse avec les mouvements de l'indice des prix à la consommation. Par exemple, entre 1986 et juin 1990, les prix à la consommation mesurés par l'IPC ont grimpé de 19.2% de sorte que les biens et services qu'on pouvait acheter en 1986 avec \$100.00 coûtaient \$119.20 en juin 1990. Chaque dollar de consommation en juin 1990 achète donc moins qu'en 1986. Le pouvoir d'achat du dollar a baissé exactement dans la même proportion que l'indice des prix à la consommation a augmenté. Par conséquent, le pouvoir d'achat d'un dollar en juin 1990, par rapport au dollar de 1986,

s'établissait à 83.9 cents (100 cents X
$$\frac{100.0}{119.2}$$
 = 83.9 cents).

Ce processus peut être assimilé à la déflation de l'argent, c'est-à-dire à la correction des valeurs monétaires afin d'éliminer l'influence des prix.

Les utilisateurs des totalisations qui indiquent le pouvoir d'achat du dollar de consommation à différentes périodes par rapport à 1986 (tableau 2) doivent noter que ces chiffres sont tirés de l'indice des prix à la consommation et qu'ils peuvent, tout comme ce dernier, ne pas mesurer fidèlement la situation particulière d'une famille faisant partie du grand groupe urbain auquel se rapporte l'IPC. Par ailleurs, les variations du pouvoir d'achat du dollar ne reflètent pas les changements touchant les autres groupes de population dont les habitudes de dépenses diffèrent sensiblement de celles du groupe cible pour l'IPC. Il faut également noter que, tout comme l'IPC, les variations du pouvoir d'achat du dollar ne sont pas touchées directement par les changements de l'impôt sur le revenu, des primes d'assurance-chômage, d'autres paiements de sécurité sociale et des prix de tous les autres biens et services ne faisant pas partie du panier de l'IPC.

SEASONAL ADJUSTMENT OF THE CONSUMER PRICE INDEX

Economic time series, measuring changes through time in economic activities, reflect the combined effects of the underlying seasonal, cyclical, trend and irregular factors which influence them. Such series can be decomposed into distinct movements representing the separate effects of the seasonal, cyclical and trend factors and a residual movement representing factors causing irregular non-repetitive movements.

Seasonal fluctuations in a series are those that can be identified with a particular season or time of year. These fluctuations tend to occur at about the same time each year with roughly the same magnitude and are the composite result of climatic influences and social and commercial customs (e.g., harvests, end of season sales).

Cyclical movements consist of sequences of change over periods longer than a year, during which the series rises to a peak and then falls back, subsequently to rise again. For many series this type of movement is associated with expansion and contraction of the economy over the "business cycle".

The trend is a steady underlying movement which reflects continuing or slowly changing economic forces.

Finally, the fluctuations that remain unaccounted for by the seasonal, cyclical and trend movements of a series are termed irregular. The factors causing irregular movements in a series are of a non-repetitive, ad-hoc nature. The irregular component tends to have a stable random appearance, but may include some extreme movements having identifiable causes (e.g., strikes or severe weather). They therefore can be distinguished from the much smaller random irregular variations.

Appendice 3

LA DÉSAISONNALISATION DE L'INDICE DES PRIX À LA CONSOMMATION

Les séries chronologiques économiques mesurent l'évolution dans le temps de l'activitié économique. Ces séries reflètent les effets combinés de la saisonnalité, du cycle, de la tendance générale et d'autres facteurs accidentels qui leur sont propres et qui agissent sur elles. Il est possible de décomposer de telles séries ou mouvements distincts représentant séparément les effets de tel ou tel facteur (saisonnalité, cycle, tendance) et en un mouvement résiduel représentant les facteurs de mouvements accidentels (non répétitifs).

Les fluctuations saisonnières d'une série sont celles que l'on peut relier à une saison ou une période donnée de l'année; elles ont tendance à se produire généralement à peu près à la même époque de l'année et avec la même ampleur. Elles sont le résultat à la fois de conditions climatiques et d'habitudes sociales et commerciales (telle les récoltes, les ventes de fin de saison).

Les mouvements cycliques se définissent comme une suite de variations sur des périodes supérieures à un an, au cours desquelles la série atteint un sommet, descend puis remonte à nouveau. Ce type de mouvement est associé, pour de nombreuses séries, à l'expansion et à la récession économique au cours du "cycle économique".

La tendance générale est un mouvement fondamental stable qui reflète la continuité ou un changement lent de l'économie.

Enfin, les fluctuations qui ne se classent ni dans la saisonnalité, ni dans le cycle, ni dans la tendance générale sont désignées comme mouvements accidentels. Les facteurs expliquant ce type de mouvement dans une série sont de nature spéciale et non répétitive. L'élément accidentel tend à présenter une apparence aléatoire stable mais il peut comprendre certains mouvements extrêmes, dont on peut identifier les causes (comme des grèves ou de fortes intempéries). Ils peuvent donc être distingués des variations irrégulières aléatoires beaucoup moins prononcées.

The methodologies used for removing as much of the seasonal fluctuation as possible from a series have been described in detail in numerous articles and texts on the subject. Rather than reiterating those texts, an outline of the methodologies employed in the derivation of seasonally adjusted consumer price indexes for Canada is provided below.

With the introduction of the 1982 basket, the seasonal adjustment methodology was changed. Direct seasonal adjustment is performed at the level of the seven major components with the seasonally adjusted All-items and All-items excluding Food indexes being the weighted average of their components. This indirect seasonal adjustment of the two aggregate series ensures (except for possible rounding differences) that the aggregate movements will be within the range of their components' movements. Since each basket has its own weights, the move to indirect seasonal adjustment of the aggregates dictated the use of unlinked series as the basis for the seasonal adjustment. Estimating a separate seasonal pattern for each basket has some conceptual advantages since it means that the classification and weight changes introduced with each updating of the basket will not distort the estimates. However, there is an operational difficulty which arises due to the desirability of having at least seven years of data for estimation of the seasonal pattern and the current rapidity with which CPI baskets are updated. Given the current updating cycle, at the time a new basket is introduced, we have only three years of data for the new basket. To create a longer time series, we chain on data from the previous basket back to it's beginning. This reintroduces some of the distortions present in estimating seasonal patterns from linked data.

The above distortion will be minimized through the use of concurrent seasonal adjustment rather than forecast seasonal factors. With the concurrent methodology, the seasonal pattern is estimated each month using all available data. However, to minimize revisions we will revise past indexes only at the end of each calendar year.

Les méthodes utilisées pour éliminer le plus possible de saisonnalité d'une série ont fait l'objet de descriptions détaillées dans de nombreux articles et ouvrages sur la question¹. Au lieu d'en reprendre ici le contenu, nous présentons ci-dessous les grandes lignes des méthodes utilisées pour dériver les indices des prix à la consommation désaisonnalisés pour le Canada.

Avec l'introduction du panier 1982, la méthode de désaisonnalisation fût changée. La désaisonnalisation directe est effectuée à l'échelle des sept composantes principales; les versions désaisonnalisées de l'indice des aliments et de l'indice d'ensemble sans les aliments correspondent à la pondérée de leurs composantes. désaisonnalisation indirecte des deux séries agrégées garantit que les mouvements agrégés se situeront dans les limites des mouvements de leurs composantes (exception faite des différences attribuables à l'arrondissement). Puisque chaque panier a ses propres coefficients de pondération, le passage à la méthode indirecte de désaisonnalisation des séries agrégées a entraîné l'utilisation, à titre de base de la désaisonnalisation, des séries non enchaînées. L'estimation de tendances saisonnières distinctes pour chacun des paniers représente certains avantages au point de vue conceptuel, puisqu'elle signifie que les changements apportés à la classification et aux coefficients de pondération au moment de la mise à jour du panier n'entraîneront aucune distortion. Toutefois, une difficulté opérationnelle existe étant donné, d'une part, qu'il est souhaitable d'avoir au moins sept années de données pour estimer la tendance saisonnière et, d'autre part, en raison de la rapidité avec laquelle on met maintenant à jour le panier de l'IPC. étant donné le cycle courant de mise-à-jour, nous n'avons que trois ans de données pour un nouveau panier lorsque celui-ci est introduit. Afin de créer une série plus longue, nous enchaînons les données du nouveau panier à celles du panier précédent jusqu'à son début. Cette mesure ramène certaines distorsions que l'on retrouvait dans l'estimation des tendances saisonnières des données enchaînées.

Ces distortions seront toutefois minimisées par l'utilisation de désaisonnalisations concomitantes plutôt que de coefficients saisonniers projetés. Dans la méthodologie concomitante, la tendance saisonnière est estimée chaque mois au moyen de toutes les données accessibles. Nous ne recalculerons toutefois les indices antérieurs qu'à la fin de chaque année civile, et ce pour réduire au minimum le nombre de révisions.

CITY AVERAGE RETAIL PRICES

Introduction

The Average Retail Price Survey is under taken to produce an accurate measure of average prices at one point in time which will permit comparison between cities. In order not to generate artificial price differentials it is essential that the qualities, brands and sizes selected are sufficiently similar. Prices of approximately 60 items, consisting mainly of food and some personal care items and household supply items are collected in representative outlets in 26 cities. These cities are: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Regina. Saskatoon. Winnipea. Edmonton, Vancouver, Victoria and Whitehorse, This survey is normally under taken during the first week of January, April, July and October.

In order that the average prices generated for one city will be comparable with those for another city, price collection is generally limited to widely available manufacturers' brands. For meat and produce, care is taken to narrowly define cuts and qualities. The goods and services tax (GST) and the provincial retail sales tax are included in the retail averages where applicable.

Calculation Methodology

City Prices. Prices are collected in both chain and independent stores. (A chain stores organization is defined as one operating four or more stores under the same legal ownership.) A city average price is calculated for each item by weighting the average prices obtained for chain and independent stores according to their overall market sales share in that city. For branded items sold under brand labels, an average price for each brand is first calculated in the manner described above; the brand averages are then weighted together to form the item average. The weight assigned each brand in this process is proportionate to the number of price quotes obtained for each of the brands in that city.

Appendice 4

PRIX DE DÉTAIL MOYENS PAR VILLE

Introduction

L'enquête sur les prix moyens de détail est effectuée afin d'obtenir une mesure adéquate des prix moyens, à une période donnée, qui permette une comparaison entre les villes. Il est essentiel que les qualités, les marques et les tailles choisies soient suffisamment équivalentes afin de ne pas introduire des différences de prix artificielles. Les prix de articles, principalement des produits auelaues 60 alimentaires, certains articles de soins personnels et des fournitures de ménage, sont relevés dans de nombreux points de vente dans 26 villes: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria et Whitehorse. Cette enquête est normalement effectuée durant la première semaine de janvier, d'avril, de juillet et d'octobre.

Afin que les prix moyens calculés pour une ville puissent être comparables à ceux d'une autre ville, l'observation des prix se limite généralement aux marques des fabricants largement distribuées. Dans le cas de la viande, des fruits et des légumes, on prend soin de définir avec précision les morceaux et les qualités. La taxe sur les produits et services (TPS) et la taxe de vente au détail sont ajoutées au prix de détail moyen s'il y a lieu.

Méthode de calcul

Prix urbains. Les prix sont recueillis dans les magasins à succursales multiples et les magasins indépendants. (Une entreprise à succursales multiples est définie comme celle qui exploite quatre magasins ou plus sous la même raison sociale.) On calcule un prix moyen par ville pour chaque article en pondérant les prix moyens recueillis dans les magasins à succursales multiples et dans les magasins indépendants selon la part de leurs ventes sur le marché général dans leur ville. Dans le cas ces articles vendus sous marque déposée, on calcule d'abord un prix moyen pour chaque marque déposée de la façon décrite plus haut: ensuite on pondère ensemble les moyennes des marques déposées afin d'en arriver à la moyenne pour l'article. Le poids assigné à chaque marque déposée lors de ce processus est proportionnel au nombre de prix observés dans la ville en question pour cette marque déposée.

Weighted city averages. A weighted city average price for each item is derived by weighting the relevant city averages. The importance of each city in calculating the weighted city average is determined by the volume of retail sales in that city.

Item Specifications

A description of the approximately 60 items covered in the Average Prices Survey can be acquired by contacting Prices Division.

Average Retail Prices for Gasoline

Tables 16 through 19 present average retail prices for two types of gasoline retailed in two types of filling stations. The information is collected on a monthly basis as part of the Consumer Price Index survey. Gasoline prices are collected at the pump from a sample of full service and self-serve filling stations in major urban centres across Canada. The prices collected included all applicable Federal and Provincial taxes. They are presented as average prices per litre of gasoline. The series presented in these tables are confined to the 16 urban centres for which Consumer Price Indexes are produced and cover the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to January 1979, are, however, based on the average prices per imperial gallon.

Average Retail Prices for Fuel Oil

Table 20 presents average retail prices for fuel oil. The information is collected nine times yearly as part of the Consumer Price Index Survey. Fuel oil prices are collected from a sample of distributors in major urban centres across Canada. The prices collected include all applicable Federal and Provincial taxes. They are presented as average prices per litre. The series presented in Table 20 are confined to 16 urban centres and for the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to October 1980 are, however, based on the average prices per imperial gallon.

Moyennes pondérées des villes. Une moyenne pondérée du prix de chaque article pour l'ensemble des villes est calculée en pondérant les moyennes appropriées des villes. L'importance de chaque ville dans le calcul de la moyenne pondérée des villes est déterminée par le volume des ventes au détail dans cette ville.

Spécification des articles

Une description des quelques 60 articles contenus dans l'enquête des prix moyens peut être obtenu en communiquant avec la Division des prix.

Prix de détail moyens de l'essence

Les tableaux 16 à 19 présentent les prix de détail moyens de deux types d'essence vendus dans deux genres de stations. Cette information est relevée à chaque mois dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix de l'essence sont relevés, sur place, auprès d'un échantillon de stations offrant un service complet et de stations libre service dans les principaux centres urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ces tableaux sont ceux d'un litre d'essence. Les séries présentées se limitent aux 16 centres urbains pour lesquels on produit un IPC pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant janvier 1979 sont, toutefois, sur la base d'un gallon impérial.

Prix de détail moyens du mazout

Le tableau 20 présente les prix de détail moyens du mazout. Cette information est relevée neuf fois par année dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix du mazout sont relevés auprès d'un échantillon de distributeurs dans les principaux centre urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ce tableau sont ceux d'un litre. Les séries présentées au tableau 20 se limitent à 16 centres urbains, pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant octobre 1980 sont, toutefois, sur la base d'un gallon impérial.

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to

Appendice 5

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail: les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking an other complete survey.

parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the differentials between locations being price encountered by those to whom they are applicable.

Table 7 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 7 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

THE MARKET RESEARCH HANDBOOK 1993/1994

1991 CENSUS INCLUDED

The fastest way to get off to a good start!

Brainstorming with your colleagues produces some great marketing ideas. But which ones will you use? The Market Research Handbook can help you narrow your options before you commit any more time and resources to developing your strategy.

This handbook is the most comprehensive statistical compendium on Canadian consumers and the businesses that serve them. It helps you to identify, define and locate your target markets.

Looking for...

...socio-economic and demographic profiles of 45 urban areas?

... revenue and expenditure data for retailers and small businesses?

The **Market Research Handbook** has it all... and more. It provides information on:

- 1991 Census information
- personal expenditures on goods and services
- size and composition of households and families
- wages, salaries and employment
- investment in Canadian industries
- labour force in various industries
- industry and consumer prices

It has been one of our bestsellers since 1977 for the simple reason that it offers such a range and depth of market data. Save time and money when you're looking for data or data sources, keep the **Market Research Handbook** close at hand for easy reference.

The **Market Research Handbook** (Cat. no. 63-224) is \$94 (plus 7 % GST) in Canada, US\$113 in the United States and US\$132 in other countries.

To order, write to Statistics Canada, Marketing Division, Publication Sales, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to (613) 951-1584. Or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

LE RECUEIL STATISTIQUE DES ÉTUDES DE MARCHÉ 1993/1994

RECENSEMENT DE 1991

Pour partir du bon pied!

Des séances de remue-méninges jaillissent d'excellentes idées de commercialisation. Mais lesquelles choisir ? Le **Recueil**

statistique des études de marché peut

vous faciliter les choix avant que vous n'engagiez plus de temps et de ressources à l'élaboration de votre stratégie.

Ce recueil statistique est le plus exhaustif qui soit sur les consommateurs canadiens et les entreprises

qui les servent. Il vous aide à définir et situer vos marchés cibles.

Vous cherchez...

... des profils socio-économiques et démographiques de 45 régions urbaines ?

...des données sur les recettes et les dépenses de détaillants et de petites entreprises ?

Le Recueil contient tout cela... et plus encore :

- données sur le recensement de 1991
- dépenses personnelles en biens et en services
- taille et composition des ménages et des familles
- traitements, salaires et emploi
- investissements par secteur d'activité économique
- population active par secteur d'activité
- prix de l'industrie et de la consommation

Si c'est l'un de nos succès depuis 1977, c'est parce qu'il vous renseigne en long et en large sur le marché. Pour économiser temps et argent, vous ne sauriez vous en passer.

Le **Recueil statistique des études de marché** (n° 63-224 au catalogue) coûte 94 \$ (plus 7% de TPS) au Canada. 113 \$ US aux États-Unis et 132 \$ US dans les autres pays.

Pour commander, veuillez écrire à Statistique Canada. Division du marketing. Vente des publications. Ottawa (Ontario). K1A 0T6 ou communiquer avec le Centre de consultatio de Statistique Canada le plus proche (voir la liste figurant dans la présente publication).

Vous pouvez également commander par télécopieur au (613) 951-1584 ou composer san frais le 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

THE 1994 CANADA
YEAR BOOK

Your indispensable and comprehensive reference source on Canada

For essential information on Canada, turn to the Canada Year Book. An invaluable resource, the 1994 edition is beautifully designed in an inviting and easy-to-read format.

The 1994 Canada Year Book examines recent events, changes and trends in great detail. Organized carefully into 22 chapters, it answers questions on virtually every topic from geography through health to banking.

This edition features:

- Over 700 crisply written pages packed with eye-opening information on life in Canada from social, economic, cultural and demographic perspectives
- 250 concise tables plus 63 charts and graphs that put statistical information into focus
- Stunning photographs capturing distinctively Canadian scenes by some of this country's finest photographers
- Fascinating short feature articles covering everything from archaeology to white collar trends

Trusted for over 125 years by students, teachers, researchers, librarians and business people, the *Canada Year Book* is the reference source to consult <u>first</u> on all aspects of Canada.

An enduring addition to any home or office library!

ORDER YOUR COPY OF CANADA YEAR BOOK TODAY.

Available in separate English and French editions, the 1994 *Canada Year Book* (Catalogue No. 11-402E) is \$59.95 plus \$5.05 shipping and handling in Canada, US \$72 in the United States, and US \$84 in other countries.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, Ottawa, Ontario K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and charge it to your VISA or MasterCard.

L'ANNUAIRE DU CANADA 1994

Un ouvrage complet et indispensable sur le Canada

Pour obtenir des renseignements essentiels sur le Canada, consultez l'Annuaire du Canada. Inestimable source d'information, l'édition de 1994 est un ouvrage d'une présentation très soignée, attrayant et facile à lire.

L'Annuaire du Canada 1994 étudie en profondeur les événements, les tendances et les changements récents. Divisé en 22 chapitres, il répond à vos questions sur presque tous les sujets, depuis la géographie jusqu'à la santé et la banque.

Voici ce que vous trouverez dans l'édition de 1994 :

- Plus de 700 pages écrites dans un style vif et pleines de renseignements intéressants sur les dimensions sociales, économiques, culturelles et démographiques de la vie canadienne
- 250 tableaux concis et 63 graphiques et diagrammes qui permettent de mettre en perspective l'information statistique
- Remarquables photographies de paysages typiquement canadiens par certains des photographes canadiens les plus illustres
- Courts articles fascinants sur des sujets divers, depuis l'archéologie jusqu'à l'évolution de la situation des cols blancs

Ouvrage de référence de prédilection des étudiants, des enseignants, des chercheurs, des bibliothécaires et des gens d'affaires, et ce depuis plus de 125 ans, l'*Annuaire du Canada* est celui qu'il faut consulter en premier pour en savoir plus long sur tous les aspects du Canada.

Un volume que vous voudrez conserver longtemps dans votre bibliothèque ou au bureau!

re you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistics Canada's *Canadian Economic Observer* for their monthly briefing.

Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Thy purchase CEO?

As a subscriber, you'll be <u>directly connected</u> to Statistics Canada's economic analysts. Names and phone numbers of the experts who can help solve your particular research problem or find specialized data are listed with articles and features.

You'll also receive a complimentary copy of CEO's annual **Historical Statistical Supplement**. Sixty years of historical perspectives right at your fingertips – at <u>no additional cost</u>.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The Canadian Economic Observer (catalogue number 10-230) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries.

Sales and Service
Ottawa, Ontario, K1A 0T6

or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, l'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

ne seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter l'OEC dans son format actuel en deux parties, qui a été bien accueilli. La section de l'analyse contient des commentaires qui donnent à réfléchir sur la conjoncture économique, les problèmes, les tendances et les développements. L'aperçu statistique contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant. *L'Observateur* économique canadien vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

ourquoi acheter l'OEC?

En tant qu'abonné à l'OEC. vous êtes <u>directement relié</u> aux analystes économiques de Statistique Canada. Le nom et le numéro de téléphone des experts qui peuvent vous aider à résoudre vos problèmes particuliers de recherche ou trouver des données spécialisées sont cités dans les articles et les rubriques de l'OEC.

Vous recevrez également un exemplaire gratuit du **Supplément statistique historique** annuel. Vous aurez ainsi devant vous soixante années de données rétrospectives et ce, <u>à titre gracieux</u>.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à **L'Observateur économique canadien** dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-230 au catalogue) est de 220 S au Canada, de 260 S US aux États-Unis et de 310 S US dans les autres pays.
